
Contents

Preface		ix
Chapter I	Molecular Chaperones of the Endoplasmic Reticulum <i>Martin Schröder</i>	1
Chapter II	Type III Secretion Chaperones: A Molecular Toolkit for All Occasions <i>Matthew S. Francis</i>	79
Chapter III	Advances in Heat Shock Proteomics: Towards a Better Understanding of the Physiology and Pathophysiology of Molecular Chaperones <i>Roberto Scatena, Patrizia Bottoni and Bruno Giardina</i>	149
Chapter IV	System Specific Chaperones for Membrane Redox Enzyme Maturation in Bacteria <i>Raymond J. Turner, Tara M. L. Winstone, Vy A. Tran and Cathy S. Chan</i>	179
Chapter V	Role of Molecular Biology in Molecular Imaging <i>Archana Mukherjee and Mathew L. Thakur</i>	209
Chapter VI	Yeast Protein Aggregates, Containing Chaperones and Glucose Metabolism Enzymes <i>O. V. Nevzglyadova, A. V. Artemov, A. G. Mittenberg, E. V. Mikhailova, I. M. Kuznetsova, K. K. Turoverov and T. R. Soidla</i>	241
Chapter VII	Structure and Multiple Functions of Cyclophilin 40: A Divergent Loop Cyclophilin <i>Thomas Ratajczak, Bryan K. Ward, Carmel Cluning and Rudi K Allan</i>	271

Chapter VIII	Free-Living Protists as a Model for Studying Heat Shock Proteins in the Cell <i>Andrew V. Goodkov, Alexei O. Smurov and Yulia I. Podlipaeva</i>	293
Chapter IX	Quality Control in the Secretory Pathway <i>Joanna Jung, Helen Coe, Jody Groenendyk and Marek Michalak</i>	313
Chapter X	Structure, Properties and Multiple Functions of Human Small Heat Shock Protein HspB8 (Hsp22, H11 Protein Kinase or E2IG1) <i>Anton A. Shemetov, Evgeny V. Mymrikov, Alim S. Seit-Nebi and Nikolai B. Gusev</i>	333
Chapter XI	Small Stress Proteins and Their Therapeutic Potential <i>Scott Houck, Joy G. Ghosh and John I Clark</i>	353
Chapter XII	The Eukaryotic Chaperonin CCT (TRiC): Structure, Mechanisms of Action and Substrate Diversity <i>Julie Grantham</i>	377
Chapter XIII	The Role of Molecular Chaperones in Plant Stress Response <i>Youko Oono, Yuhya Wakasa, Lijun Yang and Fumio Takaiwa</i>	393
Chapter XIV	Chaperone Activity of Intrinsically Disordered Proteins <i>Denes Kovacs and Peter Tompa</i>	411
Chapter XV	Fluorescence Study on Aggregation of α -Crystallin and Insulin <i>N. L. Vekshin</i>	429
Chapter XVI	The Induction of Hepatic Heat Shock Protein 27 and 70 by an Anti-Hepatitis Drug-Bicyclol and Its Role in Protection against Liver Injury <i>Geng-Tao Liu and Xiu-Qi Bao</i>	445
Chapter XVII	Plant Heat Shock Proteins as Molecular Chaperones in Normal and Stress Conditions <i>Biliana Grigorova</i>	463
Chapter XVIII	Different Mechanisms Responsible for Stress Resistance Operate in the Same Insect Order (Diptera) <i>D.G. Garbuz, O.G. Zatsepina, I. Yushenova, A. Przhiboro and M.B. Evgen'ev</i>	479

Chapter XIX	Bi-Directional Hsp Response in Homeothermic Livestock	497
	<i>Ariel Shabtay</i>	
Chapter XX	The Chaperonin Containing T-Complex Polypeptide: Do Monomeric Subunits Have Discrete Individual Functions?	511
	<i>Sandeep Kathju and Latha Satish</i>	
Chapter XXI	Evidence for In Vivo Phosphorylation of Hsp26 from <i>Saccharomyces cerevisiae</i>	521
	<i>D.N. Peixoto, R.M. Ferreira, V.M.F. Paschoalin, and J.T. Silva</i>	
Index		533
