|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Preface</b>   |                                                                                                                                                                                                                                                                               | <b>vii</b> |
| <b>Chapter 1</b> | On the Trail of Early Birds: A Review of the Fossil Footprint Record of Avian Morphological and Behavioral Evolution<br><i>Martin G. Lockley and Jerald D. Harris</i>                                                                                                         | <b>1</b>   |
| <b>Chapter 2</b> | Trophic Relationships and Mechanisms of Ecological Segregation among Heron Species in the Parana River Floodplain (Birds: Ardeidae)<br><i>Adolfo H. Beltzer, Juan A. Schnack, Martín A. Quiroga, María de la Paz Ducommun, Ana Laura Ronchi Virgolini and Viviana Alessio</i> | <b>49</b>  |
| <b>Chapter 3</b> | Reflections of Winter Season Large-Scale Climatic Phenomena and Local Weather Conditions in Abundance and Breeding Frequency of Vole-Eating Birds of Prey<br><i>Tapio Solonen</i>                                                                                             | <b>95</b>  |
| <b>Chapter 4</b> | Integrating Indigenous Knowledge of Birds into Conservation Planning in New Guinea<br><i>William H. Thomas</i>                                                                                                                                                                | <b>121</b> |
| <b>Chapter 5</b> | European Bird Species have Expanded Northwards During 1950-1993 in Response to Recent Climatic Warming<br><i>Gregorio Moreno-Rueda</i>                                                                                                                                        | <b>137</b> |
| <b>Chapter 6</b> | The Study of Interactions between Birds and Flowers in the Neotropics: A Matter of Point of View<br><i>Márcia A. Rocca and Marlies Sazima</i>                                                                                                                                 | <b>153</b> |

|                  |                                                                                  |            |
|------------------|----------------------------------------------------------------------------------|------------|
| <b>Chapter 7</b> | <b>Radar Ornithology—the Past, Present, and Future:<br/>A Personal Viewpoint</b> | <b>161</b> |
|                  | <i>Sidney A. Gauthreaux</i>                                                      |            |
| <b>Index</b>     |                                                                                  | <b>169</b> |
