

CONTENTS

Preface		vii
Chapter 1	Molecular Recognition of Carboxylic Acids and Carboxylate Anions by Synthetic Receptor <i>Ivan I. Stoikov, Maria N. Agafonova, Luidmila S. Yakimova, Igor S. Antipin and Alexander I. Konovalov</i>	1
Chapter 2	Next Generation Molecular Imprinted Polymers: Examples of Liquid Crystalline Materials and Hydrogels for Protein Recognition <i>Mingotaud Anne-Françoise, Fitremann Juliette, Mauzac Monique, Rodriguez Vilches Seila, Doucet Jean-Baptiste, Séverac Childérick, Laurent Elisabeth, Binet Corinne, Marty Jean-Daniel, Palaprat Guillaume and Weyland Marie</i>	45
Chapter 3	Molecular Recognition and Crystal Growth <i>J. S. Redinha and A. J. Lopes Jesus</i>	79
Chapter 4	Spectroscopic and Microscopic Examination of Chiral Recognition at the Molecular Level <i>Marek Graff</i>	119
Chapter 5	Molecular Imprinting: State of the Art and Applications <i>Nada F. Atta, Ahmed Galal and Ali M. Abdel-Mageed</i>	151
Chapter 6	Recent Advances in DNA-Ligand Molecular Recognition and Allosteric Interactions <i>Jonathan T. B. Huang, Robin C. K. Yang, Wei-Kang Hung, Michael J. Waring and Leung Sheh</i>	175
Chapter 7	Molecular Recognition of Odorant-Binding Proteins in Insect Olfaction <i>Xin Jin and Long Zhang</i>	199
Chapter 8	The Proteomic Code: A Molecular Recognition Code for Proteins <i>Jan C. Biro</i>	211

Chapter 9	On/Off-Switched Molecular Recognition by A Smart Aminopurine-Imprinted Polymer	283
	<i>Songjun Li, Ashutosh Tiwari and Mani Prabakaran</i>	
Index		297
