

CONTENTS

Preface		vii
Chapter 1	Porous Structure and Adsorption Behaviours of Chitosan <i>O. K. Krasilnikova, O. V. Solovtsova, E. V. Khozina, T. Y. Grankina, N. V. Serebryakova and S. M. Shinkarev</i>	1
Chapter 2	Chitosan: A Promising Biomaterial for Tissue Engineering and Hemorrhage Control <i>Nan Cheng, Xudong Cao and Henry T. Peng</i>	49
Chapter 3	The Applications of Chitosan with Different Modifications in Tissue Engineering <i>Gan Wang, Qiang Ao, Yandao Gong and Xiufang Zhang</i>	83
Chapter 4	Enhanced Biochemical Efficacy of Oligochitosans and Partially Depolymerized Chitosans <i>Riccardo A. A. Muzzarell</i>	115
Chapter 5	Thermal Relaxation Properties and Glass Transition Phenomena in Chitosan Films <i>J. Betzabe González-Campos, Evgen Prokhorov, G. Luna-Bárcenas, L. Chacón-García and Rosa E. N. del Río-Torres</i>	141
Chapter 6	Biological Activities of Chitin, Chitosan and Respective Oligomers <i>Freni K. Tavaría, João Fernandes, Alice Santos-Silva, Sara Baptista da Silva, Bruno Sarmento and Manuela Pintado</i>	171
Chapter 7	The Potential of Chitosan in Drug Delivery Systems <i>Sara Baptista da Silva, João Fernandes, Freni Távira, Manuela Pintado, and Bruno Sarmento</i>	199
Chapter 8	Solid State Synthesis and Modification of Chitosan <i>Tatiana A. Akopova, Alexander N. Zelenetskii and Alexander N. Ozerin</i>	223

Chapter 9	Chitosan Derived Smart Materials	255
	<i>Ashutosh Tiwari, Dohiko Terada, Chiaki Yoshikawa and Hisatoshi Kobayashi</i>	
Chapter 10	Chitosan Copolymers and IPNs for Controlled Drug Release	289
	<i>P. P. Kundu, Vinay Sharma and Kamlesh Kumari</i>	
Chapter 11	Biomedical Applications of Hydrogels Based in the Chemical Modification of Chitosan	317
	<i>E. A. Elizalde-Peña, G. Luna-Bárcenas, E. Prokhorov, J. E. Gough, C. Velasquillo-Martínez, C. E. Schmidt and I. Sanchez</i>	
Chapter 12	A Spectroscopic Study of the Interaction of Metal Ions with Biomaterials	349
	<i>Yassin Jeilanî Beatriz H. Cardelino and Natarajan Ravi</i>	
Chapter 13	Chitosan: Properties and Its Pharmaceutical and Biomedical Aspects	377
	<i>Ali Demir Sezer</i>	
Chapter 14	Combined Use of Biopolymer Chitosan and Enzyme Tyrosinase for Removal of Bisphenol A and its Derivatives from Aqueous Solutions	399
	<i>Kazunori Yamada, Mizuho Suzuki, Ayumi Kashiwada and Kiyomi Matsuda</i>	
Chapter 15	Chitosan Usage in Synthesis of Hydrogel-Biomaterials with Controlled Properties for Biomedical/Biotechnological Applications	427
	<i>Eugenia Dumitra Teodor, Simona Carmen Lițescu, Cristian Petcu and Gabriel Lucian Radu</i>	
Index		455
