
Contents

Preface		vii
Chapter I	Neuronal Cell Apoptosis <i>Amany A. Abdin</i>	1
Chapter II	Witnessing the Mechanistic Insights of Neuronal Apoptosis from a Global Transcriptomic View: Comparative Microarray Analysis of Multiple Neurodegenerative Models <i>Minghui Jessica Chen, Jian Ming Jeremy Ng, Zhao Feng Peng, and Nam Sang Cheung</i>	37
Chapter III	Death of Neuronal and Glial Cells Induced by Photodynamic Treatment: Ultrastructural Changes and Signaling Mechanisms <i>A. B. Uzdensky</i>	79
Chapter IV	Cell Death During Cerebellar Development <i>Laura Lossi, Graziana Gambino, Silvia Alasia, and Chiara Salio</i>	119
Chapter V	Fundamental Mechanisms and Implications of Neuronal Apoptosis <i>Binu Tharakan, Indrajit Chowdhury and Ganapathy Bhat</i>	143
Chapter VI	How Can We Prevent Neuronal Apoptosis? <i>G. H. Doherty</i>	167
Chapter VII	Neuronal Cell Apoptosis <i>Fawziah Al Rouq</i>	191
Chapter VIII	Bcl-2 Homology-3 Domain (BH3)-Only Proteins: Harbingers of Neuronal Demise and Neurodegeneration <i>Trisha R. Stankiewicz and Daniel A. Linseman</i>	199
