

CONTENTS

Preface		ix
Abbreviations		xi
Introduction	To Small Heat Shock Proteins <i>Chantal van de Schootbrugge and Wilbert C. Boelens</i>	1
Part 1:	Protective Functions of Small Heat Shock Proteins, Roles in Conformational, Inflammation and Redox State Related Diseases	29
Chapter 1.1	Cytoprotective Functions of Small Stress Proteins in Protein Conformational Diseases <i>Serena Carra and Harm H. Kampinga</i>	31
Chapter 1.2	Functional Symbiosis between the Intermediate Filament Cytoskeleton and Small Heat Shock Proteins <i>Andrew Landsbury, Ming Der Perng, Ehmke Pohl and Roy A. Quinlan</i>	55
Chapter 1.3	The Two Lens Structure Proteins, α A-Crystallin (HspB4) and α B-Crystallin (HspB5), Control Apoptosis through Regulation of Multiple Signaling Transduction Pathways <i>David W. Li, Lili Gong, Mi Deng, Jinping Liu, Mugen Liu and Ying-Wei Mao</i>	89
Chapter 1.4	Small Stress Proteins in the Central Nervous System: From Neurodegeneration to Neuroprotection <i>Andreas Wytenbach, Sarah Hands and Vincent O'Connor</i>	117
Chapter 1.5.	Small Stress Proteins in Protecting the Heart <i>Guo-Chang Fan and Evangelia G. Kranias</i>	147

Chapter 1.6	Protein Quality Control in Heart Disease: Small Heat Shock Proteins and Autophagy <i>Paul Tannous, Beverly A. Rothermel and Joseph A. Hill</i>	171
Chapter 1.7	The Two-Faced Nature of Small Heat-Shock Proteins: Amyloid Fibril Assembly and the Inhibition of Fibril Formation. Relevance to Disease States <i>Heath Ecroyd, Sarah Meehan and John A. Carver</i>	189
Part II :	Mutations in Small Stress Proteins Responsive of Human Diseases	213
Chapter 2.1	From Sequence to Pathology: The Required Integrity of the Structure-Dynamics-Function Relationships at the Molecular Level <i>Annette Tardieu, Magalie Michiel, F�riel Skouri-Panet, Elodie Duprat, St�phanie Simon, St�phanie Finet</i>	215
Chapter 2.2	Alpha-Crystallins (HspB4 and HspB5) and Cataract Diseases <i>Usha P. Andley</i>	245
Chapter 2.3	B-crystallin (HspB5) and Myofibrillar Myopathies <i>Isidre Ferrer, Dolores Moreno and Anna Janu�</i>	263
Chapter 2.4	HSPB5 (<i>CryAB</i> ; α B-crystallin) and Protein Aggregation Cardiomyopathy <i>Huali Zhang and Ivor J. Benjamin</i>	287
Chapter 2.5	HspB1 and HspB8 Mutations in Neuropathies <i>Rainer Benndorf</i>	301
Part III:	Small Heat Shock Proteins in Cancer Diseases	325
Chapter 3.1	Small Stress Proteins, Biomarkers of Cancer <i>Daniel R. Ciocca, Mariel A. Fanelli, F. Dar�o Cuello-Carri�n and Gisela N. Castro</i>	327
Chapter 3.2	Small Heat Shock Proteins as potential Messengers in the pathways to Cancer <i>Anastassia Vertii and Matthias Gaestel</i>	353
Chapter 3.3	HSP16.2 in Cancers <i>Szabolcs Bellyei, Eva Pozsgai and Balazs Sumegi</i>	379
Chapter 3.4	Small Heat Shock protein HSP27 (HspB1), α B-crystallin (HspB5) and HSP22 (HspB8): Apoptotic and Tumorigenic Functions <i>Aur�lie de Thonel, Guillaume Wettstein, Anne-Laure Joly, Nathalie Decologne, Adonis Hazoum� and Carmen Garrido</i>	387

Part IV.	Therapeutic Approaches	415
Chapter 4.1	Small Stress Proteins and their Therapeutic Potential <i>Scott A. Houck, Joy G. Ghosh and John I Clark</i>	417
Chapter 4.2	Antisense and RNAi Approaches to Interfere with Hsp27 (HspB1) Activity in Cancer <i>Amina Zoubeidi and Martin E Gleave</i>	439
Chapter 4.3	Beneficial and Deleterious, The Dual Role of Small Stress Proteins in Human Diseases: Implications for Therapeutic Strategies <i>Stéphanie Simon and André-Patrick Arrigo</i>	457
Index		477
