

CONTENTS

Preface		ix
Chapter I	Mitochondria: The Portrayal of an Executioner <i>Swapna Chaudhuri and Malabika Bhattacharjee</i>	1
Chapter II	Antiapoptosis and Anti-Antiapoptosis <i>Valery G. Veresov</i>	77
Chapter III	Mitochondrial Metabolism in Age-Related Neurodegenerative Disorders: Alzheimer's and Parkinson's Revisited <i>A.R. Esteves, D.M. Arduino, D.F.F. Silva, D. Martins Branco, C.R. Oliveira and S.M. Cardoso</i>	187
Chapter IV	Mitochondrial Functions in Germ Cell Specification and Cell Fate Decisions <i>Yong-Zhong Zhang, Heide Schatten and Rong-Rong Zhou</i>	245
Chapter V	Mitochondria – In Cellular Life and Death <i>Indrajit Chowdhury and Ganapathy K. Bhat</i>	247
Chapter VI	Mitochondria and Ageing: Do Mitochondria Play a key role? <i>Eva Babusikova and Milos Jesenak</i>	377
Chapter VII	Mitochondrial Dysfunctions Related with Oxidative Stress <i>Alfredo Saavedra-Molina, Istvan Boldogh, Salvador Manzo-Avalos, Christian Cortés-Rojo, Leopoldo Aguilera-Aguirre, Rocío Montoya-Pérez and Attila Bacsí</i>	411
Chapter VIII	Mitochondrial Interactosome in Health and Disease: Structural and Functional Aspects of Molecular System Bioenergetics of Muscle and Neuronal Cells <i>Claire Monge, Rita Guzun, Kersti Tepp, Natalja Timohhina, Minna Varikmaa, Peeter Sikk, Tuuli Kaambre and Valdur Saks</i>	441
Chapter IX	Mitochondria as Potential Therapeutic Targets in Mitochondria-Related Diseases <i>Amadou K.S. Camara, Mohammed Aldakkak and David F. Stowe</i>	471

Chapter X	Diabetes, Mitochondria and Brain Endothelium Dysfunction: A Dangerous Triad for Neurodegeneration? <i>Cristina Carvalho, Sónia C. Correia, Renato X. Santos, Susana Cardoso, Maria S. Santos and Paula I. Moreira</i>	553
Chapter XI	Mitochondrial Dysfunction Induced by Transient Global Brain Ischemia <i>Peter Racay, Maria Chomova, Zuzana Tatarkova, Peter Kaplan and Dusan Dobrota</i>	579
Chapter XII	Control of Mitochondrial Outer Membrane Permeability: VDAC Regulation by Dimeric Tubulin and Cytosolic Proteins <i>Tatiana K. Rostovtseva</i>	607
Chapter XIII	Mitochondrial Regulation of Cellular ROS Metabolism <i>P. Venditti, L. Di Stefano and S. Di Meo</i>	635
Chapter XIV	Mitochondrial DNA-Related Respiratory Chain Disorders: From Diagnostic to Treatment Approaches <i>Michelangelo Mancuso, Daniele Orsucci, Luigi Murri and Gabriele Siciliano</i>	659
Chapter XV	Detection and Function of Mitochondrial and Non Mitochondrial Heme Proteins in Oxygen Sensing Tissues <i>Wilhelm Ehleben, Joachim Fandrey and Helmut Acker</i>	683
Chapter XVI	Cellular Responses to Mitochondrial DNA Damage in Yeast <i>Ruth Stuckey, M.Carmen Díaz de la Loza and Ralf Erik Wellinger</i>	709
Chapter XVII	Regulation of Mitochondrial Functions According to the Environmental Changes in Yeast <i>Saccharomyces Cerevisiae</i> <i>Fizikova Anastasia Iu., Sambuk Elena V</i>	731
Chapter XVIII	Role of Mitochondria in Calcium Homeostasis and Contraction of Smooth Muscle Cells <i>Etienne Roux, Jean-Pierre Mazat and Marko Marhl</i>	769
Chapter XIX	Evolution and Coevolution of Tubulin's Carboxy-Terminal Tails and Mitochondria <i>Dan L. Sackett</i>	789
Chapter XX	Mitochondrial Dysfunctions in Response to Mycotoxins: An Overview <i>Chayma Bouaziz and Hassen Bacha</i>	811
Chapter XXI	Characteristics of the Mitochondrial Permeability Transition in Brain Cortex Mitochondria <i>Juanita Bustamante and Silvia Lores-Arnaiz</i>	829

Chapter XXII	Parkinson-Like Disease by 1-Methyl-4-Phenyl-1,2,3,6-Tetrahydropyridine (MPTP) Toxicity on Energy-Linked Non-Synaptic and Intra-Synaptic Mitochondrial Enzyme Systems from <i>Macaca Fascicularis</i> Brain <i>R.F. Villa and A Gorini</i>	849
Chapter XXIII	Inorganic Polyphosphates in Mitochondrial Functions and Dysfunctions <i>Tatyana V. Kulakovskaya, Lydia P. Lichko, Vladimir M. Vagabov and Igor S.Kulaev</i>	865
Chapter XXIV	Plant Mitochondrial Potassium Channel or Channels? <i>Donato Pastore, Maura Nicoletta Laus and Mario Soccio</i>	883
Chapter XXV	The Signalingosome Hypothesis for Intracellular Signal Transduction to Mitochondria <i>Alexandre D. T. Costa, Casey L. Quinlan and Keith D. Garlid</i>	899
Chapter XXVI	The Apoptosis-Inducing Factor (AIF) Moves from Mitochondria to the Nucleus and Back to the Cytoplasm, during Apoptosis <i>Maria Grazia Bottone, Vincenzo Giansanti, Paola Veneroni, Graziella Bernocchi, A. Ivana Scovassi and Carlo Pellicciari</i>	913
Chapter XXVII	TRAP1: A Regulator of Mitochondrial Functions and Apoptosis <i>Yutaka Masuda and Hiroyuki Itabe</i>	927
Chapter XXVIII	Spectroscopic Studies of Protomitochondria <i>N. L. Vekshin</i>	941
Chapter XXIX	The State of Mitochondrial Membrane Ultrastructure as Indicator in the Study of Protective Role of Exogenous Nitrate under Condition of Plant Anaerobic Stress <i>Boris B. Vartapetian and Lyli I. Polyakova</i>	955
Chapter XXX	Mitochondria, Apoptosis and Peritoneal Injury <i>Beatriz Santamaría, Alvaro C. Ucero, Alberto Benito-Martin and Alberto Ortiz</i>	967
Chapter XXXI	Blue Native PAGE, Basis of the Technique and Its Use in Organelle Study: The Mitochondrial Complexome <i>Alexandre Oliveira Campos, André Martinho de Almeida and Ana Varela Coelho</i>	975
Chapter XXXII	Mitochondria are the Main Station in ATP Release Via Ins (1,4,5)P ₃ or Ryanodine- Sensitive Ca ²⁺ -Signal Pathway <i>Takeshi Katsuragi</i>	983
Index		989
