

CONTENTS

Foreword		vii
	<i>John Wooley</i>	
Chapter 1	Metagenomics: Methods, Applications, and Challenges <i>Martina M. Ederer</i>	1
Chapter 2	Towards a More Complete Metagenomics Toolkit <i>Michael E. Sparks and Robert W. Li</i>	33
Chapter 3	Analyzing Metagenomic Data: Inferring Microbial Community Function with MG-RAST <i>Dionysios A. Antonopoulos, Elizabeth M. Glass and Folker Meyer</i>	47
Chapter 4	Automatic Annotation of Microbial Genomes and Metagenomic Sequences <i>Victor Solovyev and Asaf Salamov</i>	61
Chapter 5	Next-Generation and Future DNA Sequencing Technologies and Metagenomics <i>Peiming Zhang, Jian Gu, Jin He, Weimin Gao, Weiwen Zhang, Stuart Lindsay and Deirdre R. Meldrum</i>	79
Chapter 6	Comparison of De novo Short Read Assemblers on Simulated Metagenomic Data <i>Ying Huang, Weizhong Li, David Perkins and Robert W. Li</i>	107
Chapter 7	Submetagenomics: Selective Sampling of Metagenomic Subsets of Interest <i>Yi Vee Chew and Andrew J. Holmes</i>	121
Chapter 8	Dynamics of the Rumen Microbiota <i>Robert W. Li, Michael E. Sparks and Erin E. Connor</i>	135

Chapter 9	Detection of Functional Shifts in the Rumen Microbiota in Response to Propionate Intake in Cattle	165
	<i>Michael E. Sparks, Ying Huang, Ransom L. Baldwin, Weizhong Li, Erin E. Connor, Congjun Li, Tad S. Sonstegard, Steven G. Schroeder, Brian J. Bequette and Robert W. Li</i>	
Chapter 10	Carbohydrate Actives Enzymes Derived from Metagenomes: From Microbial Ecology to Enzymology	185
	<i>Renaud Berlemont and Moreno Galleni</i>	
Chapter 11	An Evolutionary Ecology Perspective on Comparative Metagenomics	211
	<i>Dieter Ebert and Weihong Qi</i>	
Chapter 12	Interactions of the Gut Microbiota and its Host in the Context of Gastrointestinal and Metabolic Diseases	237
	<i>Rodrigo Bibiloni, Lutz Krause and Chieh J. Chou</i>	
Chapter 13	Metagenomic Analysis of Human Gut Microbiota	255
	<i>Volker Mai, Mihai Pop and Mark Schell</i>	
Chapter 14	Emerging Relevance of Metagenomics in Medicine	277
	<i>Vasuki Venkat, Ying Huang, Patricia Finn and David Perkins</i>	
Chapter 15	Metagenomic Gene Discovery	287
	<i>Rolene Bauer, Moola S. Mutondo, Robert J. Huddy, I. Marla Tuffin and Don A. Cowan</i>	
Chapter 16	Emerging Techniques for Metagenome Screening	321
	<i>Takefumi Shimoyama and Kazuya Watanabe</i>	
Chapter 17	Viral Metagenomics: From Fish Slime to the World	337
	<i>Dana Willner, Christelle Desnues and Forest Rohwer</i>	
Chapter 18	Exploration of a Microbial Community for Novel Genetic Resources Using Activity-Based Screening of a Metagenomic Library	367
	<i>Hikaru Suenaga and Kentaro Miyazaki</i>	
Chapter 19	Microbial Communities in Crude Petroleum Oils and Metagenomics	381
	<i>Kunio Yamane, Hideaki Maki, Shigeru Matsuyama and Hiroo Uchiyama</i>	
Chapter 20	Environmental Metaproteomics: Identifying the Protein Machinery that Impact the Activities and Interactions of Microbes in Isolation or Communities	407
	<i>Richard J. Giannone, Martin Keller and Robert Hettich</i>
