
Contents

Preface		vii
Chapter 1	Cytogenetic Mapping and Contribution to the Knowledge of Animal Genomes <i>Cesar Martins, Diogo Cavalcanti Cabral-de-Mello, Guilherme Targino Valente, Juliana Mazzuchelli and Sarah Gomes de Oliveira</i>	1
Chapter 2	Somatic Cell Count in Cow's Milk: Factors, Diagnosis and Breeding Implications <i>Katarzyna Wojdak-Maksymiec</i>	83
Chapter 3	Cost/Benefit of Mutation Induction under PARP1 Deficiency: From Genomic Instability to Therapy <i>Henriqueta Louro and Maria João Silva</i>	109
Chapter 4	Analysis and Visualization of Genotyping Data for Autozygosity Mapping and Other Genetic Mapping Projects <i>Ian M. Carr, Carmel Toomes and Colin A. Johnson</i>	135
Chapter 5	Common Characteristics of Cancer Cell and Logical Corroborations of Its Hybrid Essence <i>G. K. Gogichadze</i>	161
Chapter 6	Alkylation Chemotherapy: Mechanistic Potential and Pitfalls <i>Timothy C. Mueser and Kandace J. Williams</i>	179
Chapter 7	Ionizing Radiation, DNA Double Strand Break and Mutation <i>Wei Han and K. N. Yu</i>	197
Chapter 8	Reprogramming of Somatic Cells <i>Stina Simonsson and Dzeneta Vizlin-Hodzie</i>	211
Chapter 9	Soybean Functional Genomics through Reverse Genetics: Opportunities and Challenges <i>Xiaoyan Yin and Zhanyuan J. Zhang</i>	225

Chapter 10	Cell Necrosis Pathway in Coffee Cell Suspension Culture Is Triggered by Two Independent Sets of Signals	237
	<i>Juan Gualberto Colli, Angela Ku Gonzalez, Luis Carlos Rodríguez Zapata and Enrique Castaño de la Serna</i>	
Chapter 11	Functional Genomics of Early Earth Microbial Communities	251
	<i>Brendan P. Burns</i>	
Chapter 12	Effective Contribution of the <i>nDartI</i> Transposon-Tagging System to Rice Functional Genomics	259
	<i>Masahiko Maekawa, Kazuo Tsugane and Shigeru Iida</i>	
Index		273
