

CONTENTS

Preface		vii
Chapter 1	Protein Disulphide Isomerases: Diversity and Roles in Plants <i>Mrinal Bhawe, Huimei Wu and Atul Kamboj</i>	1
Chapter 2	Self-assembling Peptides for Biomedical Applications: IR and Raman Spectroscopies for the Study of Secondary Structure <i>Michele Di Foggia, Paola Taddei, Armida Torreggiani, Monica Dettin and Anna Tinti</i>	41
Chapter 3	Stability and Stabilization of Proteins: The Ribonuclease A Example <i>Ulrich Arnold</i>	83
Chapter 4	Heterologous Protein Folding in Yeast <i>Byung-Kwon Choi</i>	119
Chapter 5	Modelling of Protein Folding and Prediction of Rate Based on Nucleation Mechanism <i>Oxana V. Galzitskaya</i>	151
Chapter 6	Intrinsically Unordered Proteins: Structural Properties, Prediction and Relevance <i>Susan Costantini, Marco Miele and Giovanni Colonna</i>	187
Chapter 7	How Do Homodimeric Proteins Fold and Assemble? <i>Absalom Zamorano-Carrillo, Jonathan Pablo Carrillo-Vázquez, Brenda Chimal-Vega, Oscar Daniel-García, Roberto Isaac López-Cruz, Roberto Carlos Maya-Martínez, Elibeth Mirasol Meléndez and Claudia G. Benítez-Cardoza</i>	217
Chapter 8	The Relationship Between Human MAT1A Mutations and Disease: A Folding and Association Problem? <i>María A. Pajares and Claudia Pérez</i>	261
Chapter 9	Paradigm of Protein Folding in Neurodegenerative Diseases <i>Pratibha Mehta Luthra</i>	289

Chapter 10	Differential Scanning Calorimetry: Thermodynamic Analysis of the Unfolding Transitions of Proteins, Domains and Peptidic Fragments by Using Equilibrium Models <i>Jose C. Martinez, Eva S. Cobos, Irene Luque and Javier Ruiz-Sanz</i>	313
Chapter 11	Study of Folding/Unfolding Kinetics of Lattice Proteins by Applying a Simple Statistical Mechanical Model for Protein Folding <i>Hiroshi Wako and Haruo Abe</i>	349
Chapter 12	Ribosome Assisted Protein Folding: Some of Its Biological Implications <i>Dibyendu Samanta, Anindita Das, Debasis Das, Arpita Bhattacharya, Arunima Basu, Jaydip Ghosh and Chanchal DasGupta</i>	377
Chapter 13	Bacterial Cyclophilins <i>Angel Manteca and Jesus Sanchez</i>	401
Chapter 14	Complete Description of Protein Folding Shapes for Structural Comparison <i>Jiaan Yang</i>	421
Chapter 15	Folding and Unfolding of Hyperthermophilic Proteins; Molecular Basis of Adaptation to Hot Environment <i>Atsushi Mukaiyama and Kazufumi Takano</i>	443
Chapter 16	Decoding Amino Acid Sequences of Proteins Using Inter-Residue Average Distance Statistics to Extract Information on Protein Folding Mechanisms <i>Takeshi Kikuchi</i>	465
Chapter 17	Redox-Dependent Chaperoning, Following PDI Footsteps <i>Olivier Serve, Yukiko Kamiya and Koichi Kato</i>	489
Chapter 18	On the Myoglobin Folding in Organic Solvents and Cosolvents <i>Katia C. S. Figueiredo, Helen C. Ferraz, Cristiano P. Borges and Tito L. M. Alves</i>	501
Chapter 19	Functional Significance of Intrinsically Disordered Conformations in Activation Domains of the Transcription Factors <i>R. Kumar</i>	519
Chapter 20	Coarse Grained Protein Modeling <i>Carlo Guardiani and Fabio Cecconi</i>	531
Chapter 21	Protein Folding: A Perspective From Statistical Physics <i>Jinzhi Lei and Kerson Huang</i>	579
Index		605
