

CONTENTS

Preface		vii
Chapter 1	UV Irradiation as an Alternative to Chemical Treatments: A New Approach Against Algal Biofilms Proliferation Contaminating Building Facades, Historical Monuments and Touristic Subterranean Environments <i>Fabien Borderie, Laurence Alaoui-Sehmer, Faisl Boust, Geneviève Orial, Dominique Rieffel, Hervé Richard, and Badr Alaoui-Sosse</i>	1
Chapter 2	Enhancement and Restoration of Growth of Durum Wheat (<i>Triticum durum</i> , Var. waha) on Saline Soil by Using <i>Azospirillum brasilense</i> NH and Marine Alga <i>Ulva lactuca</i> <i>Elhafid Nabti, Mohamed Sahnoune, Mostefa Ghoul, Doreen Fisher, Mike Rothballer, Michael Schmid, and Anton Hartmann</i>	29
Chapter 3	Production and Properties of Algae Oil Biofuel and Environmental Benefits <i>Mohamed Y. E. Selim and Yousef Haik</i>	53
Chapter 4	<i>Trachydiscus minutus</i> : A New Algal EPA Producer <i>Jaromir Lukavsky</i>	77
Chapter 5	Systematics and Taxonomic Keys for the Marine Green Algal Family Monostromataceae <i>Felix Bast</i>	105
Chapter 6	Soil Algae: Ecophysiological Features, Environmental Impact and Biotechnological Potential <i>Werner Reisser</i>	121

Chapter 7	Phenolic Profile of Crude Extracts Derived from a Red Alga, Corallina Elongata Ellis and Solander	135
	<i>Milagros Rico, Aroa López,</i> <i>Miguel Suárez de Tangil, and Argimiro Rivero</i>
