Preface to the Second Edition

Preface to the First Edition

What is Biophysics?

Part A: Systemic Biophysics

1. Biomechanics

- 1.1 Biostatics
- 1.2 Biophysics of Muscle
- 1.3 Strength of Bones
- 1.4 Biodynamics
- 1.5 Locomotion on Land
- 1.6 Locomotion in Air
- 1.7 Locomotion in Water
- 1.8 Role of Gravity

2. Biophysics and Fluid Flow

- 2.1 Steady Laminar Flow
- 2.2 Poiseuille's Formula
- 2.3 Energetics of Fluid Flow
- 2.4 Turbulence
- 2.5 Hemodynamics
- 2.6 Fluid Flow in Plants

3. Biophysics and Gas Transport

- 3.1 The Ideal Gas
- 3.2 Convective Transport of Gases
- 3.3 Diffusion of Gases: Fick's Laws
- 3.4 Physiology of Respiration

4. Physics of Audition

- 4.1 Transverse and Longitudinal Waves

54

54

4.2 Physiological Characteristics of Sound	58
4.3 Human Ear	59
4.4a Phase Sensitivity and Determination of Direction	62
4.5 Doppler Effect	63
5. Physics of Vision	65
5.1 Wave Nature of Light	65
5.2 Geometrical Optics	66
5.3 Refractive Power	69
5.4 Retina and Photoreceptors	72
5.5 Photoreceptors and Fiber Optics	76
5.6 Resolving Power of Eye	79
5.7 Polarisation and Vision	80
Part B: Cellular-Molecular Biophysics	83
6. Cell: Its Organelles and Molecules	85
6.1 Prokaryotes and Eukaryotes	85
6.2 Molecular Components of Cell	90
6.3 Carbohydrates	91
6.4 Lipids	94
6.5 Proteins	96
6.6 Nucleic Acids	100
6.7 Heteromacromolecules	103
7. Physics of Biomolecules	104
7.1 Molecular Forces	104
7.2 Strong Force	105
7.3 Inter-Molecular Weak Forces	106
7.4 Structural Organization of Proteins	119
7.5 Structural Organization of Nucleic Acids	123
7.6 Molecular Mechanism of Genetic Information Transfer	125
7.7 Genetic Code	126
7.8 Transfer of Genetic Information	128
7.9 Molecular Mechanism of Protein Synthesis	128
7.10 Principle of Molecular Recognition	132
8. Physics of Bio-membranes	134
8.1 Cell Membrane	134
8.2 Transport Through Membrane	139
8.3 Passive Transport	140
8.4 Facilitated Diffusion	145
8.5 Active Transport	148
9. Thermodynamics and Bio-systems	156
9.1 Equilibrium Thermodynamics	157
9.2 Near-Equilibrium Thermodynamics	159

9.3 Gibbs Free Energy	161
9.4 Chemical Potential	163
9.5 Thermodynamic Analysis of Membrane Transport	165
9.6 Phase Equilibrium	168
9.7 More on Irreversible Thermodynamics	171
10. Bioenergetics	179
10.1 Bioenergetics and ATP Molecules	180
10.2 The Redox Reactions	183
10.3 Cellular Respiration	186
10.4 Chemiosmotic Theory	189
10.5 Photosynthesis	191
10.6 Muscle Contraction	201
11. Neurobiophysics	205
11.1 Anatomy of Neurons	205
11.2 Physico-Chemical Nature of Membrane Potential	206
11.3 Electric Analog of Membrane	213
11.4 Nerve Excitation	217
11.5 The Action Potential	225
11.6 Conduction of Action Potential	228
11.7 Synaptic Transmission	231
12. Physics of Nano-biomachines	234
12.1 Molecular Machines	235
12.2 Thermodynamics of Molecular Machines	243
12.3 Observational Techniques	244
12.4 Scanning Tunneling Microscope	245
12.5 Atomic Force Microscope	246
12.6 Optical Tweezers	247
Part C: Special Topics	249
13. Medical Imaging	251
13.1 Projection Imaging	251
13.2 Computed Tomography (C.T.)	253
13.3 Emission Computed Tomography: SPECT and PET	257
13.4 Magnetic Resonance Imaging (MRI)	259
General Bibliography	263
Subject Index	265
