

Contents

Contributors	vii
Preface	ix
1 Drought Tolerance in Crops: Physiology to Genomics <i>Lakshmi P. Manavalan and Henry T. Nguyen</i>	1
2 Reactive Oxygen Species and Oxidative Stress in Plants <i>Vadim Demidchik</i>	24
3 Salinity Stress: Physiological Constraints and Adaptive Mechanisms <i>Sergey Shabala and Rana Munns</i>	59
4 Chilling Stress <i>Eric Ruelland and Sylvie Collin</i>	94
5 Heat Stress <i>Anthony E. Hall</i>	118
6 Frost Tolerance in Plants <i>Lawrence V. Gusta and Michael Wisniewski</i>	132
7 Flooding Tolerance in Plants <i>Chiara Pucciariello and Pierdomenico Perata</i>	148
8 Adaptations to Aluminium Toxicity <i>Peter R. Ryan and Emmanuel Delhaize</i>	171
9 Soil pH Extremes <i>Andre Läuchli and Stephen R. Grattan</i>	194
10 Heavy Metal Toxicity in Plants <i>Philip J. White</i>	210
11 Desiccation Tolerance <i>Jill M. Farrant, Keren Cooper and Hanlie Nell</i>	238

12	Ultraviolet-B Radiation: From Stressor to Regulatory Signal	266
	<i>Marcel A.K. Jansen</i>	
13	Biotic Stress Signalling: Calcium-Mediated Pathogen Defence Programmes	291
	<i>Yi Ma and Gerald A. Berkowitz</i>	
	Index	311
