

CONTENTS

	Preface	vii
1.	X-ray Study of Protein-Protein Complexes and Analysis of Interfaces <i>Joel Janin</i>	1
2.	A Structural Perspective on Protein-Protein Interactions in Macromolecular Assemblies <i>Ranjit P. Bahadur</i>	25
3.	Energetics of Protein-Protein Interactions <i>Ilian Jelesarov</i>	46
4.	Kinetics of Biomacromolecular Complex Formation: Theory and Experiment <i>Georgi V. Pachov, Razif R. Gabdoulline and Rebecca C. Wade</i>	89
5.	Evolutionary Trace of Protein Functional Determinants <i>Olivier Lichtarge</i>	119
6.	Protein-Protein Docking <i>Adrien Saladin and Chantal Prevost</i>	147
7.	Data-driven Docking: Using External Information to Spark the Biomolecular Rendez-vous <i>Adrien S.J. Melquiond and Alexandre M.J.J. Bonvin</i>	182
8.	High-resolution Protein-Protein Docking <i>Nir London and Ora Schueler-Furman</i>	209

9. Scoring and Refinement of Predicted Protein-Protein Complexes	
<i>Martin Zacharias</i>	236
10. Motif-mediated Protein Interactions and their Role in Disease	
<i>Holger Dinkel and Heinrich Sticht</i>	272
11. Prediction and Calculation of Protein-Protein Binding Affinities and Mutation Effects	
<i>Sébastien Fiorucci, Serge Antonczak and Jérôme Golebiowski</i>	295
12. Small-molecule Inhibitors of Protein-Protein Interactions	
<i>Thorsten Berg</i>	318
13. Protein Dynamics and Drug Design: The Role of Molecular Simulations	
<i>Giulia Morra, Alessandro Genoni and Giorgio Colombo</i>	340
Index	387
