

Table of Contents

Preface	xiii
Amine NAÏT-ALI and Régis FOURNIER	
Chapter 1. Introduction to Biometrics	1
Bernadette DORIZZI	
1.1. Background: from anthropometry to biometrics	1
1.2. Biometrics today	2
1.3. Different modes of use of a biometric system and associated uses	3
1.4. Biometrics as a pattern recognition problem	4
1.4.1. Capture module: from the sensor to the image	5
1.4.2. From the image to the features	6
1.4.3. The matching	7
1.5. Evaluation of different modalities	8
1.6. Quality	9
1.7. Multimodality	10
1.8. Biometrics and preservation of privacy	11
1.9. Conclusion	12
1.10. Bibliography	12
Chapter 2. Introduction to 2D Face Recognition	15
Amine NAÏT-ALI and Dalila CHERIFI	
2.1. Introduction	15
2.2. Global face recognition techniques	16
2.2.1. Principal component analysis	16
2.2.2. Face recognition using PCA	19
2.2.3. Linear discriminant analysis	24
2.2.4. Face recognition using LDA	24
2.3. Local face recognition techniques	25

2.3.1. Geometric techniques	25
2.3.2. Elastic graph matching techniques.	26
2.4. Hybrid face recognition techniques.	28
2.5. Some guidances	32
2.6. Some databases	35
2.7. Conclusion	35
2.8. Bibliography	36
Chapter 3. Facial Soft Biometrics for Person Recognition	39
Antitza DANTCHEVA, Christelle YEMDJ, Petros ELIA and Jean-Luc DUGELAY	
3.1. Introduction to soft biometrics	39
3.1.1. Domains of application	40
3.1.2. Related work.	41
3.2. Soft biometric systems for human identification	42
3.2.1. Spread of the category set Φ	43
3.2.2. Bounding N for a given interference probability	45
3.2.3. Simulation evaluation of the system in the interference-limited setting of very high sensor resolution	47
3.3. Overall error probability of a soft biometrics system	48
3.3.1. P_{err} of a soft biometric system in a frontal-to-side re-identification scenario	50
3.4. Conclusions and future directions.	53
3.5. Bibliography	53
Chapter 4. Modeling, Reconstruction and Tracking for Face Recognition	57
Catherine HEROLD, Vincent DESPIEGEL, Stéphane GENTRIC, S��verine DUBUISSON and Isabelle BLOCH	
4.1. Background.	57
4.1.1. Applications of face recognition	58
4.1.2. On-the-fly authentication	58
4.2. Types of available information	61
4.2.1. Information related to the acquisition system	61
4.2.2. Facial features.	62
4.3. Geometric approaches for the reconstruction	63
4.3.1. Stereovision – Multiview	63
4.3.2. Shape from shading	65
4.4. Model-based approaches for reconstruction.	67
4.4.1. Modeling of the face	67
4.4.2. Estimation of the model parameters	70
4.5. Hybrid approaches.	76
4.6. Integration of the time aspect	77

4.6.1. Face tracking	77
4.6.2. Static approach from video streams	79
4.6.3. Time consolidation from video streams	81
4.7. Conclusion	82
4.8. Bibliography	83
Chapter 5. 3D Face Recognition	89
Mohsen ARDABILIAN, Przemyslaw SZEPTYCKI, Di HUANG and Liming CHEN	
5.1. Introduction.	89
5.2. 3D face databases	90
5.2.1. FRGC.	91
5.2.2. GavabDB.	91
5.2.3. 3DTEC	92
5.3. 3D acquisition	92
5.4. Preprocessing and normalization	94
5.4.1. Sensor noise processing	95
5.4.2. Processing of holes	96
5.4.3. Localization of anthropometric landmarks	96
5.5. 3D face recognition	101
5.5.1. 3D face recognition based on local features matching: a case study	102
5.6. Asymmetric face recognition	109
5.7. Conclusion	110
5.8. Bibliography	111
Chapter 6. Introduction to Iris Biometrics.	117
Kamel ALOUI, Amine NAÏT-ALI, Régis FOURNIER and Saber NACEUR	
6.1. Introduction.	117
6.2. Iris biometric systems.	118
6.3. Iris recognition methods: state-of-the-art	119
6.4. Preprocessing of iris images	122
6.4.1. Extraction of the region of interest.	122
6.4.2. Construction of the noise mask.	123
6.4.3. Normalization	124
6.5. Features extraction and encoding	125
6.6. Similarity measure between two IrisCodes	126
6.7. Iris biometrics: emerging methods	127
6.8. Conclusion	128
6.9. Bibliography	128

Chapter 7. Voice Biometrics: Speaker Verification and Identification . . . 131
 Foezur CHOWDHURY, Sid-Ahmed SELOUANI
 and Douglas O'SHAUGHNESSY

7.1. Introduction.	131
7.1.1. Voice biometric techniques	132
7.1.2. Challenge of speaker recognition on mobile devices	133
7.2. Acoustic analysis for robust speaker recognition.	134
7.2.1. Mel-frequency analysis	135
7.2.2. Wiener filtering for noise reduction	137
7.3. Distributed speaker recognition through UBM-GMM models	138
7.3.1. Bayesian adaptation to target models	139
7.3.2. Scoring technique for speaker identification	140
7.3.3. Likelihood ratio for speaker verification	140
7.3.4. Normalization of the verification score and Z-norm	141
7.4. Performance evaluation of DSIDV	142
7.4.1. Corpus	142
7.4.2. Experimental protocol	142
7.4.3. Experimental results	143
7.5. Conclusion	145
7.6. Bibliography	146

Chapter 8. Introduction to Hand Biometrics 149
 Régis FOURNIER and Amine NAÏT-ALI

8.1. Introduction.	149
8.2. Characterization by minutiae extraction	151
8.2.1. Histogram equalization	151
8.2.2. Binarization	154
8.2.3. Skeletonization (thinning).	156
8.2.4. Detection of minutiae	157
8.2.5. Matching	159
8.2.6. Evaluation of performances	160
8.3. A few databases	160
8.3.1. Fingerprint verification competition (FVC 2000, 2002, 2004, 2006).	161
8.3.2. CASIA fingerprint	162
8.3.3. Wet and wrinkled fingerprint	162
8.3.4. The HK Polytechnic University fingervein image database [HKF]	162
8.3.5. CASIA palmprint (visible/multispectral)	162
8.3.6. Database (THUPALMLAB)	163
8.4. Conclusion	165
8.5. Bibliography	165

Chapter 9. Multibiometrics	167
Romain GIOT, Baptiste HEMERY, Estelle CHERRIER and Christophe ROSENBERGER	
9.1. Introduction	167
9.2. Different principles of multibiometrics	169
9.3. Fusion levels	171
9.3.1. Capture fusion	171
9.3.2. Feature fusion	175
9.3.3. Score fusion	177
9.3.4. Fusion of decision and rank	184
9.3.5. Evaluation	187
9.4. Applications and illustrations	189
9.5. Conclusion	191
9.6. Bibliography	192
Chapter 10. Hidden Biometrics	195
Amine NAÏT-ALI, Régis FOURNIER, Kamel ALOUI and Noureddine BELGACEM	
10.1. Introduction	195
10.2. Biometrics using ECG	196
10.3. Biometrics using EMG: preliminary experiments	198
10.4. Biometrics using medical imaging	200
10.4.1. Biometrics using MRI images	200
10.4.2. Biometrics with X-ray images	203
10.5. Conclusion	205
10.6. Bibliography	205
Chapter 11. Performance Evaluation of Biometric Systems	207
Mohamad EL ABED, Romain GIOT, Baptiste HEMERY, Julien MAHIER and Christophe ROSENBERGER	
11.1. Introduction	207
11.2. Reminders on biometric systems	208
11.2.1. Biometrics	208
11.2.2. Biometric characteristics	209
11.2.3. Biometric models	209
11.2.4. Enrollment, verification and identification	210
11.2.5. Architecture of a biometric system	211
11.3. Results analysis tools	212
11.3.1. Performance of biometric systems	212
11.3.2. Benchmarks	222
11.4. Illustration of the GREYC-Keystroke system	223
11.4.1. Evaluation protocol	223

11.4.2. Experimental results	226
11.5. Conclusion	228
11.6. Bibliography	229
Chapter 12. Classification Techniques for Biometrics	231
Amel BOUCHEMHA, Chérif NAIT-HAMOUD, Amine NAÏT-ALI and Régis FOURNIER	
12.1. Introduction	231
12.2. Generalization aptitude and performance measures	232
12.3. Parametric approaches	234
12.3.1. Naïve Bayesian classification	234
12.3.2. Linear discriminant analysis.	236
12.4. Non-parametric approaches	241
12.4.1. KNN classifier.	241
12.4.2. Classification using artificial neural networks	243
12.4.3. Support vector machine	250
12.5. Conclusion	260
12.6. Bibliography	261
Chapter 13. Data Cryptography	263
Islam NAVEED and William PUECH	
13.1. Introduction	263
13.2. Cryptography	263
13.2.1. Introduction to modern cryptography	264
13.2.2. Definitions	265
13.2.3. Classification of modern cryptography	265
13.2.4. Cryptanalysis.	275
13.3. Conclusion	276
13.4. Bibliography	276
Chapter 14. Visual Data Protection	279
Islam NAVEED and William PUECH	
14.1. Introduction	279
14.2. Visual data hiding	279
14.2.1. Digital watermarking	280
14.2.2. Digital fingerprinting	282
14.3. A proposed homomorphism-based visual secret sharing scheme	284
14.3.1. Image encryption procedure in the proposed scheme	285
14.3.2. The proposed image sharing scheme.	285
14.3.3. Experimental results and discussion	291
14.4. Conclusion	294
14.5. Bibliography	294

Chapter 15. Biometrics in Forensics.	297
Guillaume GALOU and Christophe LAMBERT	
15.1. Introduction	297
15.2. Facial comparison	298
15.2.1. Biometrics dedicated to forensic approximation	298
15.2.2. The problem of facial comparison for forensic assessment	299
15.3. Voice comparison in forensics	301
15.3.1. Introduction	301
15.3.2. Particularities of the voice modality in the field of biometrics	302
15.3.3. Voice comparison and forensic assessment	304
15.3.4. Inference of identity in forensics	304
15.3.5. Automatic voice comparison	306
15.3.6. Conclusion	311
15.4. Bibliography	311
List of Authors	313
Index	317
