

## Table of contents

*Note: the full authorship of each contribution is shown at the beginning of the contribution. This table of contents identifies the colleagues, friends and former students who were invited to contribute to the volume.*

### INTRODUCTION

O. Mayo (Adelaide, Australia)

The origin and purpose of this book ix

William Harvey's advice in many languages xii

### HISTORY OF HUMAN AND MEDICAL GENETICS

A.G. Bearn (Philadelphia, USA)

Aspects of the development of human genetics since 1956 1

B.S. Blumberg (Philadelphia, USA)

Australia antigen and the biology of hepatitis B 4

L.L. Cavalli-Sforza (Stanford, USA)

A tribute to Sir Ronald Fisher 20

A.E.H. Emery (Oxford, United Kingdom)

Some thoughts on early ideas of heredity 23

A. Freire-Maia (São Paulo, Brazil)

George Fraser, a wonderful friend, and the story of Arthur MacMurrough Kavanagh,  
an Irish squire born without hands and feet 28

H. Galjaard (Rotterdam, The Netherlands)

'Hij is een bijzonder mens, dat is hij' He is a special person, that he is 36

D.J. Kevles (New Haven, USA)

Lionel Penrose, mental deficiency and human genetics 39

E.I.D. Konotey-Ahulu (Cape Coast, Ghana)

The Male Procreative Superiority Index (MPSI):  
its relevance to genetical counselling in Africa 48

M.I. Koukourakis (Alexandroupolis, Greece)

Anaximandros: bowing to the fathers of genetics 51

A.G. Motulsky (Seattle, USA)

George Fraser: a unique human and medical geneticist 55

W.J. Schull (Houston, USA)

George R Fraser: scholar 57

J.J.P. van de Kamp (Leiden, The Netherlands)

Réflexions sur le Φαινόμενο Fraser on the occasion van zijn 75ste Geboortstag  
(Reflections on the phenomenon 'G.R. Fraser' on the occasion of his 75th birthday) 63

### BIOCHEMICAL AND MOLECULAR GENETICS

N.D. Carter (London, United Kingdom)

Persistent Truncus Arteriosus associated with a homoeodomain mutation of *NKX2.6* 67
