|    | Preface                                                                                                                                                                                                                                                                       | ix  |
| 1  | An Overview of the Genus <i>Aspergillus</i><br>Joan W. Bennett                                                                                                                                                                                                                | 1   |
| 2  | Molecular Systematics of <i>Aspergillus</i> and its Teleomorphs<br>Robert A. Samson and János Varga                                                                                                                                                                           | 19  |
| 3  | Comparative Genomics of <i>Aspergilli</i><br>Natalie D. Fedorova and William C. Niernan                                                                                                                                                                                       | 41  |
| 4  | Bioinformatics and Systems Biology of <i>Aspergillus</i><br>Warwipa Vongsangnak and Jens Nielsen                                                                                                                                                                              | 61  |
| 5  | Transcriptional Regulation in <i>Aspergillus</i><br>Tetsuo Kobayashi and Masashi Kato                                                                                                                                                                                         | 85  |
| 6  | Genetics and Genomics of Sexual Development of <i>Aspergillus nidulans</i><br>Kap-Hoon Han and Dong-Min Han                                                                                                                                                                   | 115 |
| 7  | Genomics and Secondary Metabolism in <i>Aspergillus</i><br>Geoffrey Turner                                                                                                                                                                                                    | 139 |
| 8  | Ecology, Development and Gene Regulation in <i>Aspergillus flavus</i><br>Gary A. Payne and Jiujiang Yu                                                                                                                                                                        | 157 |
| 9  | Functional Systems Biology of <i>Aspergillus</i><br>Christian Rank, Thomas O. Larsen and Jens C. Frisvad                                                                                                                                                                      | 173 |
| 10 | Novel Industrial Applications of <i>Aspergillus oryzae</i> Genomics<br>Keietsu Abe, Kentaro Furukawa, Tomonori Fujioka, Daisuke Hagiwara, Hiroshi Maeda, Jun-ichiro Marui, Osamu Mizutani, Toru Takahashi, Akira Yoshimi, Youhei Yamagata, Katsuya Gomi and Fumihiko Hasegawa | 199 |
|    | Index                                                                                                                                                                                                                                                                         | 229 |
