
Contents

	List of Contributors	v
	Preface	vii
1	Recent Advances in Understanding Microbial Systematics Radhey S. Gupta and Beile Gao	1
2	Comparative Microbial Genomics: Analytical Tools, Population Genetic Patterns and Evolutionary Implications Yingqin Luo, Kui Lin and Jianping Xu	15
3	Patterns of Horizontal Gene Transfer in Bacteria Weilong Hao and G. Brian Golding	49
4	Population Genetics of Human Pathogenic Bacteria: Implications for Source Tracking and Rapid Identification Ruifu Yang, Yujun Cui, Yanjun Li and Yanfeng Yan	61
5	Population Genetics of the Symbiotic Nitrogen-fixing Bacteria Rhizobia Bertrand D. Eardly and Jianping Xu	79
6	Population Genetics of Cyanobacteria Scott R. Miller	97
7	Population Genetics of Microalgae Jim Provan	109
8	Population Genetics of Fungal Mutualists of Plants Teresa E. Pawlowska	125
9	Population Genetics of Pathogenic Fungi in Humans and Other Animals Thomas G. Mitchell	139
10	Population Genetics of Human Malaria Parasites Deirdre A. Joy	159
11	Population Genetics and Epidemiology of Human Viral Pathogens Fernando González Candelas and Rafael Sanjuán	167

12	Population Genetics in the Age of Metagenomics: Impact on Investigations of Viral, Bacterial, Archaeal and Eukaryotic Microbial Communities	189
	Jianping Xu	
	Index	205
