	List of contributors	v
1	Introduction Osnat Gillor and Margaret A. Riley	1
2	Bacteriocin Biosynthesis, Structure, and Function Des Field, Paul Cotter, Colin Hill, and R. Paul Ross	5
3	Genetically Modified Bacteriocins Gunnar Fimland and Jon Nissen-Meyer	43
4	Potential Application of Bacteriocins as Antimicrobials Osnat Gillor, Lisa M. Nigro, and Margaret A. Riley	67
5	Cytotoxic Activity of Bacteriocins Against Eukaryotic Cells Rosalba Lagos	81
6	Lantibiotic Production by <i>Streptococcus mutans</i> : their Uses in Replacement Therapy for the Prevention of Dental Caries and as Antibiotics for the Treatment of Various Infectious Diseases Geif Smith, Ravi S. Orugunty, and J.D. Hillman	95
7	Use of Bacteriocins in Livestock Francisco Diez-Gonzalez	117
8	Bacteriocins of Plant-associated Bacteria and their Potential as Biocontrol Agents against Phytopathogens René De Mot	131
9	Application of Bacteriocins in the Food Industry E.B. O'Connor, R.P. Ross, and C. Hill	153
10	Nisin: Past, Present, and Future Timo M. Takala and Per E. J. Saris	181
