
Contents

1 Mathematical Studies of Dynamics and Evolution of Infectious Diseases

Yoh Iwasa, Kazunori Sato, Yasuhiro Takeuchi 1

2 Basic Knowledge and Developing Tendencies in Epidemic Dynamics

Zhien Ma, Jianquan Li 5

3 Delayed SIR Epidemic Models for Vector Diseases

Yasuhiro Takeuchi, Wanbiao Ma 51

4 Epidemic Models with Population Dispersal

Wendi Wang 67

5 Spatial-Temporal Dynamics in Nonlocal Epidemiological Models

Shigui Ruan 97

6 Pathogen Competition and Coexistence and the Evolution of Virulence

Horst R. Thieme 123

7 Directional Evolution of Virus Within a Host Under Immune Selection

Yoh Iwasa, Franziska Michor, Martin Nowak 155

8 Stability Analysis of a Mathematical Model of the Immune Response with Delays

Edoardo Beretta, Margherita Carletti, Denise E. Kirschner, Simeone Marino 177

9 Modeling Cancer Treatment Using Competition: A Survey

H.I. Freedman 207
