

TABLE OF CONTENTS

Chapter 1: Introduction	1
DNA damage checkpoint	4
Role of Mec1-Ddc2 complex in checkpoint activation	7
Role of γ -H2AX in DNA damage checkpoint	8
Role of resection in DNA damage checkpoint	8
Role of Rad53 and Chk1	9
Role of separase and securin	11
Arrest, adaptation and recovery	13
Exit from mitosis MEN and FEAR pathways.	14
Spindle assembly checkpoint	17
Role of mitotic checkpoint complex	21
Chapter 2: The yeast DNA damage checkpoint proteins control a cytoplasmic response to DNA damage.	23
Summary	23
Introduction	24
Results.	26
Discussion	41
Experimental procedures	43
Chapter 3: Defects in yeast retrograde vesicle transport prevent cell cycle progression after DNA damage checkpoint arrest.	48
Summary	48

Introduction	49
Results.	55
Discussion	77
Experimental procedures	79
Chapter 4: Mec1 dependent and independent roles of Tel1 in DNA damage checkpoint.	
.	88
Summary	88
Introduction	89
Results.	93
Discussion	110
Experimental procedures	114
Chapter 5: Role of spindle activated checkpoint in DNA damage checkpoint.	119
Summary	119
Introduction	120
Results.	121
Discussion	140
Experimental procedures	142
Chapter 6: Additional results.	145
Dot1 plays a synergistic role with γ -H2AX in maintaining the DNA damage	
checkpoint	145
Conclusions	149
Chapter 7: Conclusions and future directions.	150
Cytoplasmic regulation of the DNA damage checkpoint.	150

Role of vesicular transport in DNA damage checkpoint.	152
The role of the spindle assembly checkpoint in DNA damage checkpoint.	153
Works cited.	156
