

TABLE OF CONTENTS

Acknowledgements.....	iii
List of Tables.....	xiv
List of Figures.....	xvii
Chapter One: Introduction and Research Aims	1
Chapter Two: Background.....	4
2.1 The Biochemistry of Brain Aging.....	4
2.1.1 Theories of Aging.....	4
2.1.1.1 Free Radical Theory.....	7
2.1.2 Brain Aging	8
2.1.2.1 Neuronal Loss and Cell Growth.....	8
2.1.2.2 Neurochemical Alteration.....	9
2.1.2.3 Calcium Ion Dysregulation.....	11
2.1.2.4 Energy Metabolism Impairment.....	11
2.1.2.5 Protein Abnormality.....	12
2.2 Supports for the Free Radical Theory in Brain Aging.....	13
2.2.1 Free Radical Production	13
2.2.1.1 Reactive oxygen species (ROS).....	14
2.2.1.1.1 Superoxide ($O_2^{\cdot-}$).....	16
2.2.1.1.2 Hydrogen peroxide (H_2O_2) ..	16
2.2.1.1.3 Hypochlorous acid (HOCl).....	17
2.2.1.1.4 Hydroxyl radical ($HO\cdot$).....	18
2.2.1.2 Reactive Nitrogen Species (RNS).....	19
2.2.1.2.1 Nitric oxide (NO).....	19
2.2.1.2.2 Peroxynitrite ($^{\cdot}OONO$).....	22
2.2.1.2.3 Nitrogen dioxide (NO_2).....	22
2.2.2 Antioxidant Defense.....	24
2.2.2.1 Heat Shock Proteins	25
2.2.2.2 Glutathione.....	28
2.2.3 Oxidative stress and Brain Aging.....	31
2.2.3.1 Lipid Peroxidation.....	31

2.2.3.1.1 Phospholipids Composition...	32
2.2.3.1.2 Reactive Aldehyde.....	33
2.2.3.2 Protein Oxidation.....	36
2.2.3.2.1 Protein Carbonyl level.....	38
2.2.3.2.2 Protein 3-Nitrotyrosine (3-NT) level.....	40
2.2.3.2.3 Electron Paramagnetic Resonance (EPR).....	41
2.2.3.2.4 Oxidative Stress Sensitive Enzyme Activity.....	42
2.3 Learning and Memory.....	43
2.3.1 Molecular Learning and Memory.....	44
2.3.1.1 Long Term Potential	45
2.3.1.2 Synaptic Remodeling.....	47
2.3.2 Learning and Memory in Aging.....	52
Chapter Three: Principles Behind Applied Methods	54
3.1 Bicinchoninic acid (BCA) Protein Assay.....	54
3.2 Oxidative Parameters.....	56
3.2.1 Protein Carbonyls.....	56
3.2.2 4-Hydroxynonenal.....	58
3.2.3 3-Nitrotyrosine.....	60
3.2.4 Electron Paramagnetic Resonance Spin Labeling...	62
3.2.5 Thiobarbituric Acid Reactive Substances.....	67
3.3 Enzyme Assay.....	69
3.3.1 Glutamine Synthase.....	69
3.3.2 Lactate Dehydrogenase.....	69
3.3.3 Enolase.....	70
3.3.4 Creatine Kinase.....	70
3.4 Redox Proteomics.....	70
3.4.1 Overview	70
3.4.1 Sample Preparation.....	72

3.4.2 Two-dimensional Electrophoresis.....	74
3.4.3 Image Analysis and Statistical Analysis.....	76
3.4.4 In-gel Digestion and Mass spectrometry.....	77
3.4.4.1 MALDI.....	78
3.4.4.2 ESI.....	80
3.4.5 Bioinformatics and Identification.....	82
Chapter Four: The Antioxidant ••Lipoic Acid Reverse Memory Impairment and Brain Oxidative Stress in Aged SAMP8 mice.....	84
4.1 Introduction.....	84
4.1.1 SAMP8 mode.....	84
4.1.2 Lipoic Acid.....	92
4.2 Experimental Procedures.....	93
4.2.1 Subjects.....	93
4.2.2 LA Administration.....	93
4.2.3 T-maze Footshock Avoidance.....	94
4.2.4 Sample Preparation.....	95
4.2.5 Carbonyl Level	95
4.2.6 TBARS.....	95
4.2.7 W/S Ratio.....	96
4.2.7.1 Synaptosome Isolation.....	96
4.2.7.2 Spin Labeling.....	96
4.2.8 Statistics.....	97
4.3 Results.....	97
4.3.1 T-maze Footshock Avoidance.....	97
4.3.2 Protein Carbonyl level.....	99
4.3.3 W/S Ratio.....	99
4.3.4 TBARS.....	99
4.4 Discussion.....	103
Chapter Five: Quantitative Proteomics Analysis of Specific Protein Expression and Oxidative Modification in Aged Senescence-Accelerated-Prone 8 Mice Brain.....	106

5.1 Introduction.....	106
5.2 Experimental Procedures.....	106
5.2.1 Rodent Subjects.....	106
5.2.2 Sample Preparation.....	106
5.2.3 Two-dimensional electrophoresis.....	107
5.2.4 Western Blotting.....	108
5.2.5 Image Analysis.....	108
5.2.6 Trypsin Digestion.....	109
5.2.7 Mass Spectrometry.....	109
5.2.8 Statistics.....	110
5.3 Results.....	110
5.3.1 Protein expression levels.....	111
5.3.2 Specific Protein carbonyl levels.....	115
5.4 Discussion.....	118
Chapter Six: Metabolic Enzymes Impairment in Aged SAMP8 Mice: Implications of Energy Metabolism in Cognitive Function	129
6.1 Introduction.....	129
6.2 Experimental Procedures.....	130
6.2.1 Rodent Subjects.....	130
6.2.2 Sample Preparation.....	130
6.2.3 Ex-vivo protein oxidation.....	130
6.2.4 Enzyme Activities Assay.....	130
6.2.5 Statistics.....	130
6.3 Results.....	131
6.4 Discussion.....	135
Chapter Seven: Proteomic Analysis of Specific Brain Proteins in Aged SAMP8 Mice Treated with ••Lipoic Acid: Implications for Aging and Age-related Neurodegenerative Disorders.....	138
7.1 Introduction.....	138
7.2 Experimental Procedures.....	138

7.2.1 Rodent Subjects.....	138
7.2.2. Drug Administration.....	138
7.2.3 Sample Preparation.....	138
7.2.4 Two-dimensional electrophoresis	138
7.2.5 Western Blotting.....	138
7.2.6 Image Analysis.....	138
7.2.7 Trypsin Digestion.....	138
7.2.8 Mass Spectrometry.....	138
7.2.9 Statistics.....	138
7.3 Results.....	138
7.3.1 Protein expression levels.....	138
7.3.2 Specific Protein carbonyl levels.....	144
7.4 Discussion.....	146
Chapter Eight: Antisense Oligonucleotides Directed at the Aβ•Region of APP Decreases Brain Oxidative Markers in Aged Senescence Accelerated Mice.....	153
8.1 Introduction.....	153
8.2 Experimental Procedures.....	155
8.2.1 Rodent Subjects.....	155
8.2.2 Antisense Oligonucleotides and Its Permeability to Cell Membrane.....	155
8.2.3 Antisense Administration.....	156
8.2.4 Sample Preparation.....	158
8.2.5 Immunochemistry.....	158
8.2.6 TBARS.....	159
8.2.7 Statistics.....	159
8.3 Results.....	160
8.3.1 Accessibility to Cells and Effects on A β •levels of AO.....	160
8.3.1.1 Accessibility of AO in Cell Cultures.....	160
8.3.1.2 Effect of AO on A β •levels in SAMP 8 mice brain.....	160

8.3.2. Protein oxidation.....	163
8.3.2.1 Glutamine synthetase (GS) Assay.....	163
8.3.2.2 Protein Carbonyl level.....	163
8.3.2.3 3-Nitrotyrosine (3NT).....	163
8.3.3 Lipid Peroxidation.....	168
8.3.3.1 HNE.....	168
8.3.3.2 TBARS	168
8.4 Discussion.....	84
Chapter Nine: Proteomic Identification of Less Oxidized Brain Proteins in Aged Senescence Accelerated Mice Following Administration of Antisense Oligonucleotide Directed at the Aβ Region of Amyloid Precursor Protein.....	176
9.1 Introduction.....	176
9.2 Experimental Procedures.....	177
9.2.1 Rodent Subjects.....	177
9.2.2. Antisense Administration.....	177
9.2.3 Sample Preparation.....	177
9.2.4 Two-dimensional electrophoresis	177
9.2.5 Western Blotting	177
9.2.6 Trypsin digestion.....	177
9.2.7 Image Analysis.....	179
9.2.8 Trypsin Digestion.....	179
9.2.9 Statistic.....	179
9.3 Results.....	180
9.3.1 Protein expression levels.....	180
9.3.2 Specific Protein carbonyl level	180
9.4 Discussion.....	185
Chapter Ten: Quantitative Proteomics Analysis of Specific Protein Expression and Oxidative Modification in Aged Mice Brain – Insight into the Mechanism of Compensation of Activity Lost by Oxidative Modification.....	192
10.1 Introduction.....	192
10.2 Experimental Procedures.....	193

10.2.1. Rodent Subjects.....	194
10.2.3 Sample Preparation.....	194
10.2.4 Two-dimensional electrophoresis	194
10.2.5 Western Blotting	194
10.2.6 Trypsin digestion.....	194
10.2.7 Image Analysis.....	194
10.2.8 Trypsin Digestion.....	194
10.2.9 Immunochemical Detection of Lactate Dehydrogenase (LDH2), Glutamine Synthase (GS) and Dynamin-1 (DNM1).....	194
10.2.10 Enzyme Activity Assay.....	195
10.2.11 Immunochemical Detection of Total Protein Carbonyl Level, α -Actin (ACTB) Carbonyl Level and Neurofilament 66 (NF-66) Carbonyl Level.....	195
10.2.12 Statistics.....	197
10.3 Results.....	197
10.4 Discussion.....	214
Chapter Eleven: Redox Proteomics Identification and Interactome of Oxidatively Modified Hippocampal Proteins in Mild Cognitive Impairment: Involvement of Energy Metabolism, Neuroplasticity, and Cell Cycle Events Initiation in Development of Alzheimer's Disease From Mild Cognitive Impairment.....	221
11.1 Introduction.....	221
11.2 Experimental procedures.....	223
11.2.1 Human Subjects.....	223
11.2.2 Neuropathology.....	223
11.2.3 Sample Preparation.....	224
11.2.4 Total Protein Carbonyl level.....	224

11.2.5 Two-dimensional electrophoresis.....	225
11.2.6 Western Blotting.....	225
11.2.7 Image Analysis.....	225
11.2.8 Trypsin digestion.....	225
11.2.9 Mass Spectrometry.....	225
11.2.10 Immunoprecipitation.....	225
11.2.11 Post-Western Blot Immunochemical Detection of Protein Carbonyl Level.....	227
11.2.12 Enzyme Activities.....	227
11.2.13 Protein Interactome.....	228
11.2.14 Statistics.....	229
11.3 Results.....	229
11.4 Discussion.....	244
Chapter Twelve: Conclusions and Future Studies.....	249
12.1 Conclusions.....	249
12.2 Future Studies.....	250
Appendix A: Mitochondrial Associated Metabolic Proteins Are Selectively Oxidized in A30P ••Synuclein Transgenic Mice - A Model of Familial Parkinson's Disease.....	252
A1 Introduction.....	252
A2 Experimental Procedures.....	255
A3 Results	258
A4 Discussion.....	265
Appendix B: Redox Proteomics Analysis of Oxidatively Modified Proteins in G93A-SOD1 Transgenic mice – A Model of Familial Amyotrophic Lateral Sclerosis.....	268
B1 Introduction.....	268
B2 Experimental Procedures.....	270
B3 Results	275
B4 Discussion.....	283

Appendix C: Proteomic Analysis of HNE-modified Proteins in G93A-SOD1 Transgenic Mice - A Model of Familial Amyotrophic Lateral Sclerosis.....	289
C1 Introduction.....	289
C2 Experimental Procedures.....	292
C3 Results	297
C4 Discussion.....	305
Appendix D: Proteomics Analyses of Specific Protein Oxidation and Protein Expression in Aged Rat Brain and Its Modulation by L-Acetylcarnitine: Insights into the Mechanisms of Action of This Proposed Therapeutic Agent for CNS Disorders Associated with Oxidative Stress.....	309
D1 Introduction.....	309
D2 Experimental Procedures.....	311
D3 Results	314
D4 Discussion.....	332
Appendix E: Proteomics Analysis provides Insight into Caloric Restriction Mediated Oxidation and Expression of Brain Proteins Associated with Age-Related Impaired Cellular Processes: Mitochondrial dysfunction, Glutamate Dysregulation and Impaired Protein Synthesis.....	345
E1 Introduction.....	347
E2 Experimental procedures.....	351
E3 Results.....	351
E4 Discussion.....	364
E5 Conclusion.....	374
Appendix F: Proteomic Identification of Differentially Expressed Proteins in the Aging Murine Olfactory System and Transcriptional Analysis of the Associated Genes.....	377
F1 Introduction.....	377
F2 Experimental procedures.....	379
F3 Results	384
F4 Discussion.....	406

Appendix G: Exercise Mediated Protein Oxidative Modification in Plasma is Induced by Lipid peroxidation End Product, 4-Hydroxynonenal, but Not 3-Nitrotyrosine.....	412
G1 Introduction.....	412
G2 Experimental procedures.....	414
G3 Results	416
G4 Discussion.....	420
Appendix H: Data Supporting Figures and Tables.....	423
Reference	434
Vita.....	551
