

Table of contents

Summary	9
1. INTRODUCTION	11
1.1 RNA INTERFERENCE	11
1.1.1 <i>Designing the perfect siRNA</i>	12
1.2 MURINE EMBRYOGENESIS	13
1.3 GROWTH OF HUMAN CELLS IN CULTURE	14
1.4 HUMAN EMBRYONAL CARCINOMA CELLS	15
1.4.1 <i>Embryonal carcinomas as a model of early development</i>	15
1.4.2 <i>EC and embryo specific cell surface antigens</i>	20
1.5 HUMAN EMBRYONIC STEM CELLS	22
1.5.1 <i>Derivation, culture and propagation</i>	22
1.5.2 <i>Other sources for derivation of human embryonic stem cells</i>	23
1.5.3 <i>Human and mouse ES cells</i>	26
1.5.4 <i>Pluripotency of hES cells and formation of EBs</i>	26
1.5.5 <i>Trophectoderm differentiation</i>	27
1.6 B2-MICROGLOBULIN	27
1.7 OCT4 TRANSCRIPTION FACTOR	29
1.8 AIMS OF THE PROJECT	30
1.9 DOWN REGULATION OF OCT4 USING OTHER STRATEGIES	31
2. MATERIALS AND METHODS	33
2.1 MATERIALS	33
2.1.1 <i>Chemicals</i>	33
2.1.2 <i>Laboratory Consumables</i>	33
2.1.3 <i>Solutions</i>	34
2.1.4 <i>Cell lines</i>	38
2.1.5 <i>Cell culture mediums</i>	39
2.1.5.1 <i>hES medium</i>	39
2.1.5.2 <i>DMEM/FCS</i>	39
2.2 METHODS	40
2.2.1 <i>Tissue culture</i>	40

2.2.1.1	Derivation of mouse embryonic fibroblasts (MEFs)	40
2.2.1.2	Preparation of mouse embryonic fibroblast feeder layers	40
2.2.1.3	Treatment of tissue culture plastic with growth substrates	41
2.2.1.4	Preparation of Conditioned Medium (CM)	41
2.2.2	Microscopy	42
2.2.2.1	Phase Contrast Microscopy	42
2.2.2.2	Fluorescence Microscopy	42
2.2.3	Maintenance of cell lines	42
2.2.3.1	Human ES cells	42
2.2.3.2	NTERA2	42
2.2.3.3	All other cell lines	43
2.2.4	Seeding human EC and ES cell lines for RNA interference	43
2.2.4.1	Human EC cells	43
2.2.4.2	Human ES cells	43
2.2.5	RNA interference	44
2.2.6	Transfection of cell lines with plasmid DNA	45
2.2.7	Fluorescent activated cell sorting and flow cytometry	45
2.2.8	Flow cytometry	47
2.2.9	Indirect immunofluorescence	48
2.2.9.1	Preparation of cells for indirect immunofluorescence	48
2.2.9.2	Indirect immunofluorescence	48
2.2.10	Isolation of RNA from cells and cDNA production using reverse transcriptase	49
2.2.10.1	Total RNA isolation	49
2.2.10.2	Quantitation of nucleic acids	49
2.2.10.3	cDNA production using reverse transcriptase	50
2.2.11	Polymerase chain reaction (PCR)	51
2.2.11.1	Design of oligodeoxynucleotide primers	51
2.2.11.2	PCR reaction conditions and product visualisation	54
2.2.12	Purification of DNA from agarose gel	54
2.2.13	DNA Cloning and plasmid construction	54
2.2.13.1	Ligation of PCR products	54
2.2.13.2	Preparation of competent <i>Escherichia coli</i> cells using rubidium chloride	55
2.2.13.3	Transformation and screening of <i>E. coli</i>	55

2.2.13.4 Plasmid DNA preparation	56
2.2.14 Isolation of protein from cells and Western blotting	57
2.2.14.1 Protein isolation	57
2.2.14.2 Western blotting	57
2.2.15 Northern Blotting	59
2.2.15.1 Blot preparation	59
2.2.15.2 Probe preparation	62
2.2.15.3 Hybridisation and washing procedure	62
3. RNA INTERFERENCE IN HUMAN EMBRYONAL CARCINOMA AND HUMAN EMBRYONIC STEM CELLS	64
3.1 INTRODUCTION	64
3.2 RNAI MEDIATED EGFP KNOCKDOWN IN HEC AND HES CELLS	65
3.2.1 Derivation of hEC and hES cell lines expressing eGFP	65
3.2.2 eGFP knockdown by RNAi	67
3.3 RNAI MEDIATED KNOCKDOWN OF OCT4 IN HEC AND HES CELLS	72
3.3.1 Optimal analysis time following Oct4 RNAi	72
3.3.2 Morphological changes induced by OCT4 RNAi	72
3.3.3 OCT4 RNAi results in differentiation of hEC and hES cells	76
3.3.4 OCT4 RNAi induces trophoblast differentiation in hEC and hES cells	83
3.4 DISCUSSION	90
4. RNAI-MEDIATED KNOCKDOWN OF OCT4 ATTENUATES GROWTH IN HUMAN EMBRYONAL CARCINOMA CELLS	96
4.1 INTRODUCTION	96
4.2 siRNA DIRECTED KNOCKDOWN OF OCT4 CAUSES GROSS MORPHOLOGICAL CHANGES IN BOTH PLURIPOTENT AND NULLIPOTENT HEC CELL LINES	97
4.3 THE EFFECT OF OCT4 KNOCKDOWN ON DIFFERENTIATION OF HEC CELLS	98
4.4 KNOCKDOWN OF OCT4 ATTENUATES GROWTH OF HEC CELLS	98
4.5 OCT4 RNAi RESULTS IN TROPHOBLAST DIFFERENTIATION OF HEC CELLS	105
4.6 SUMMARY	105
4.7 DISCUSSION	107
5. DISCUSSION	110
