

TABLE OF CONTENTS

TABLE OF CONTENTS	I
LIST OF TABLES.....	VII
LIST OF FIGURES	VIII
ACKNOWLEDGEMENTS	XIV
 CHAPTER 1 INTRODUCTION	 1
1.1 MOTIVATIONS.....	2
1.2 BRIEF INTRODUCTION OF TECHNOLOGIES APPLIED IN THIS STUDY	4
1.2.1 Self-assembled monolayers.....	4
1.2.2 Novel biofilm inhibitors — brominated furanones.....	5
1.2.3 Novel antimicrobial agents — antimicrobial peptides.....	6
1.2.4 Silver containing nano-structured hydrogel webs.....	7
1.3 RESEARCH HYPOTHESIS AND OBJECTIVES	8
1.4 REFERENCES	10
 CHAPTER 2 LITERATURE REVIEW	 14
2.1 BIOFILM FORMATION, A CHALLENGE TO BOTH MEDICAL AND ENGINEERING SOCIETIES	15
2.1.1 Overview of biofilm formation and currently available control methods	15
2.1.2 Biofilm-associated corrosions in industrial environment	16
2.1.3 Medical device associated infections.....	17
2.2 SURFACE ENGINEERING APPROACHES.....	18
2.2.1 Self-assembled monolayers.....	18
2.2.2 Controlled release of antimicrobial silvers.....	25
2.3 NOVEL BIOFILM INHIBITORS	29
2.3.1 Brominated furanones.....	29
2.3.2 Antimicrobial peptides.....	36
2.4 REFERENCES	42
 CHAPTER 3 INHIBITION OF <i>ESCHERICHIA COLI</i> BIOFILM FORMATION BY SELF-ASSEMBLED MONOLAYERS OF FUNCTIONAL ALKANETHIOLS ON GOLD.....	 53
3.1 ABSTRACT.....	54
3.2 INTRODUCTION	55
3.3 MATERIALS AND METHODS	58
3.3.1 Bacterial strains and growth media.....	58
3.3.2 Preparation of SAM-modified gold surfaces	59
3.3.3 Fabrication of gold films on glass substrates.....	59
3.3.4 Hydrophobicity of the modified surfaces	60
3.3.5 Microcontact printing of methyl-terminated SAMs surrounded by TEG- or L-gulonamide-terminated SAMs.....	60
3.3.6 Growth measurement	61

3.3.7	Biofilm formation.....	61
3.3.8	CLSM and image analysis	61
3.3.9	Biofilm formation with TEG added as a free molecule in liquid medium.....	62
3.3.10	Chemical-in-plug method for a negative chemotaxis assay	62
3.3.11	Motility assay.....	63
3.4	RESULTS.....	63
3.4.1	<i>E. coli</i> biofilm formation on SAM-modified surfaces.....	63
3.4.2	Biofilm formation on SAM-modified surfaces with patterns.....	64
3.4.3	Biofilm formation with TEG added as a free molecule in liquid medium.....	65
3.4.4	TEG has no effect on <i>E. coli</i> growth.....	66
3.4.5	Long-term resistance by SAMs on gold surfaces.....	66
3.4.6	Negative Chemotaxis to TEG.....	67
3.4.7	TEG controls the motility of <i>E. coli</i>	67
3.4.8	Biofilm formation by strains with different motilities	68
3.5	DISCUSSION.....	69
3.6	ACKNOWLEDGEMENTS.....	73
3.7	REFERENCES	73

CHAPTER 4 PROLONGED CONTROL OF PATTERNED BIOFILM FORMATION BY BIO-INERT SURFACE CHEMISTRY..... 91

4.1	ABSTRACT.....	92
4.2	INTRODUCTION	93
4.3	MATERIAL AND METHODS.....	94
4.3.1	Bacterial strains and growth media.....	94
4.3.2	Synthesis of D-mannitol-terminated alkanethiols.....	94
4.3.3	Preparation of self-assembled monolayers (SAMs) of alkanethiols.....	95
4.3.4	Biofilm formation in batch cultures	96
4.3.5	Biofilm staining methods.....	96
4.3.6	Confocal imaging of biofilms.....	97
4.3.7	Microplate-based biofilm assay.....	98
4.3.8	Biofilm formation in flow cells.....	98
4.3.9	Motility assay.....	99
4.4	RESULTS AND DISCUSSION.....	100
4.5	ACKNOWLEDGEMENTS.....	104
4.6	REFERENCES	105

CHAPTER 5 BACTERIAL ADHESION ON SURFACES WITH GRADIENTS OF SURFACE CHEMISTRY..... 118

5.1	ABSTRACT.....	119
5.2	INTRODUCTION	120
5.3	MATERIALS AND METHODS	121
5.3.1	Chemicals.....	121
5.3.2	SAM-modified surfaces with molecular gradients.....	122
5.3.3	Bacterial strains and growth media.....	122
5.3.4	Biofilm formation of <i>E. coli</i>	123

5.4	RESULTS AND DISCUSSION.....	124
5.4.1	<i>E. coli</i> biofilm formation on $\text{HS}(\text{CH}_2)_{11}(\text{OCH}_2\text{CH}_2)_3\text{OH}$ / $\text{HS}(\text{CH}_2)_{11}\text{CH}_3$ and $\text{HS}(\text{CH}_2)_{11}(\text{OCH}_2\text{CH}_2)_3\text{OH}$ / $\text{HS}(\text{CH}_2)_{11}\text{OH}$ molecular gradients.....	124
5.5	DISCUSSION.....	125
5.6	ACKNOWLEDGEMENTS.....	127
5.7	REFERENCES.....	127

CHAPTER 6 PATTERNED BIOFILM FORMATION REVEALS CRITICAL INFORMATION ON BACTERIA-SURFACE INTERACTIONS		134
6.1	ABSTRACT.....	135
6.2	INTRODUCTION.....	136
6.3	MATERIALS AND METHODS.....	138
6.3.1	Bacterial strains and growth media.....	138
6.3.2	Chemicals.....	138
6.3.3	Preparation of the well-defined surfaces with chemical patterns.....	138
6.3.4	Biofilm formation.....	139
6.3.5	Biofilm staining assay and fluorescence microscopy.....	139
6.4	RESULTS.....	140
6.4.1	Pattern surfaces revealed critical information of biofilm formations.....	140
6.4.2	Motility related gene expressions in biofilm formation.....	143
6.5	DISCUSSION AND CONCLUSIONS.....	144
6.6	ACKNOWLEDGEMENTS.....	147
6.7	REFERENCES.....	147

CHAPTER 7 PROLONGED CONTROL OF BACTERIAL BIOFILM FORMATION BY CONTROLLED RELEASE OF ANTIMICROBIAL SILVER.....		158
7.1	ABSTRACT.....	159
7.2	INTRODUCTION.....	160
7.3	MATERIALS AND METHODS.....	161
7.3.1	Bacterial strains and growth media.....	161
7.3.2	Materials with and without ionic silver.....	162
7.3.3	UV sterilization.....	162
7.3.4	Long-term biofilm formation assay.....	163
7.3.5	Microscopy assay and image analysis.....	164
7.3.6	Electron microscopy.....	164
7.4	RESULTS AND DISCUSSION.....	165
7.4.1	UV sterilization.....	165
7.4.2	Inhibition of biofilm formation.....	165
7.5	CONCLUSIONS.....	168
7.6	ACKNOWLEDGEMENTS.....	168
7.7	REFERENCES.....	168

CHAPTER 8 IDENTIFYING THE IMPORTANT STRUCTURAL ELEMENTS OF BROMINATED FURANONES FOR INHIBITING BIOFILM FORMATION BY <i>ESCHERICHIA COLI</i>	176
8.1 ABSTRACT	177
8.2 INTRODUCTION	178
8.3 MATERIALS AND METHODS	179
8.3.1 Bacterial strain and medium	179
8.3.2 Chemicals	179
8.3.3 Antimicrobial activities of BF _s on planktonic growth of <i>E. coli</i>	179
8.3.4 Inhibitory effects of BF _s and NF _s on biofilm formation	180
8.3.5 Confocal microscopy and data analysis	180
8.4 RESULTS AND DISCUSSION	181
8.4.1 Inhibition of planktonic growth by brominated furanones	181
8.4.2 Inhibition of biofilm formation by brominated furanones	182
8.5 CONCLUSIONS	183
8.6 ACKNOWLEDGEMENTS	184
8.7 REFERENCES	184

CHAPTER 9 INHIBITING MICROBIAL BIOFILM FORMATION BY BROMINATED FURANONES	197
9.1 ABSTRACT	198
9.2 INTRODUCTION	199
9.3 MATERIALS AND METHODS	200
9.3.1 Bacterial strains and growth media	200
9.3.2 Antimicrobial effects on planktonic growth	200
9.3.3 Biofilm inhibition	201
9.3.4 Bioluminescence assay	201
9.4 RESULTS AND DISCUSSION	202
9.4.1 Inhibition of <i>P. aeruginosa</i> PAO1 growth by brominated furanones	202
9.4.2 Inhibition of <i>P. aeruginosa</i> PAO1 biofilm formation by brominated furanones	203
9.4.3 Novel BF _s inhibited AI-2 activity in <i>E. coli</i>	205
9.5 CONCLUSIONS	206
9.6 ACKNOWLEDGEMENTS	207
9.7 REFERENCES	207

CHAPTER 10 ANTIMICROBIAL DENDRIMER ACTIVE AGAINST <i>ESCHERICHIA COLI</i> BIOFILMS	216
10.1 ABSTRACT	217
10.2 INTRODUCTION	218
10.3 MATERIALS AND METHODS	219
10.3.1 Peptide design and synthesis	219
10.3.2 Assays of cells in planktonic growth	219
10.3.3 Microplate-based assays of biofilm formation	219
10.3.4 Live/Dead staining assay of biofilm formation	220
10.3.5 Assay of mature biofilms	221
10.4 RESULTS	221

10.4.1	Antimicrobial activity of dendrimeric peptides on planktonic growth	221
10.4.2	Effect on biofilm formation – microplate-based assay	222
10.4.3	Effects on biofilm formation – Live/Dead staining assay	222
10.4.4	The effects of dendrimeric peptides on mature biofilms of <i>E. coli</i> RP437– Live/Dead staining assay	223
10.5	DISCUSSION AND CONCLUSIONS.....	224
10.6	ACKNOWLEDGEMENTS	225
10.7	REFERENCES	225

CHAPTER 11 STRUCTURAL EFFECTS ON INHIBITION OF PLANKTONIC GROWTH AND BIOFILM FORMATION OF *ESCHERICHIA COLI* BY TRP/ARG CONTAINING ANTIMICROBIAL PEPTIDES.....

11.1	ABSTRACT.....	237
11.2	INTRODUCTION	238
11.3	MATERIALS AND METHODS	241
11.3.1	Bacterial strain and growth media	241
11.3.2	Antimicrobial peptides	241
11.3.3	Antimicrobial activity against planktonic growth	242
11.3.4	Inhibition of biofilm formation – microplate-based assay.....	243
11.3.5	Inhibition of biofilm formation–Live/Dead staining	244
11.3.6	Effects of AMPs on preformed biofilms	245
11.3.7	Colony-forming units (CFUs)	245
11.3.8	Swarming and swimming motility assay	245
11.3.9	Statistical analysis.....	246
11.4	RESULTS.....	246
11.4.1	Antimicrobial activity against planktonic growth.....	246
11.4.2	Biofilm inhibition in 96-well plates.....	247
11.4.3	Viability of biofilm cells with and without peptide treatment	248
11.4.4	Effects on <i>E. coli</i> motility.....	251
11.5	DISCUSSION	252
11.6	ACKNOWLEDGEMENTS.....	255
11.7	REFERENCES	255

CHAPTER 12 REMOVAL OF BACTERIAL BIOFILMS BY LOW DIRECT CURRENTS.....

12.1	ABSTRACT.....	275
12.2	INTRODUCTION	276
12.3	MATERIALS AND METHODS	278
12.3.1	Bacterial strains and media.....	278
12.3.2	Experimental system for studying	278
12.3.3	Bioelectric effects on mature biofilms.....	279
12.3.4	Synergic effect with tobramycin.....	280
12.4	RESULTS AND DISCUSSION.....	280
12.4.1	Biofilm removal of <i>E. coli</i> on bare gold surfaces.....	280
12.4.2	Biofilm removal of <i>E. coli</i> from surfaces modified with SAMs	

<i>presenting L-gulonamide</i>	282
12.4.3 <i>Removal of B. subtilis biofilms from bare gold surfaces and synergistic effects of electric current and antibiotic</i>	282
12.4.4 <i>Possible electrode reactions</i>	283
12.5 ACKNOWLEDGEMENTS	285
12.6 REFERENCES	286
CHAPTER 13. CONCLUSIONS AND RECOMMENDATIONS FOR FUTURE WORK	297
13.1 CONCLUSIONS	298
13.2 FUTURE WORKS	300
13.2.1 <i>Cytotoxicity of brominated furanones and antimicrobial peptides in animal models</i>	301
13.2.2 <i>Immobilization of brominated furanones and peptides on surfaces</i>	301
13.2.3 <i>Applications of patterned biofilm formation</i>	302
13.3 REFERENCES	303
APPENDICES	304
I. PROTOCOL FOR MAKING PDMS STAMPS WITH MICRO- FEATURES	305
II. PROTOCOL FOR GOLD DEPOSITION ON GLASS SLIDES AND MICRO-CONTACT PRINTING	315
III. PROTOCOL FOR USING COMSTAT	318
IV. PROTOCOL FOR USING CONFOCAL MICROSCOPY	320
V. BIOFILM ASSAY USING MICROPLATES	322
VI. PROTOCOL FOR CONTINUOUS FLOW CELL	323
VII. ISOLATION OF CHROMOSOMAL DNA FROM BACTERIA	325
VIII. CONSTRUCTION OF A CONSTITUTIVE GFP EXPRESSION VECTOR	327
IX. OTHER PRELIMINARY DATA NOT INCLUDED IN CHAPTERS	334
VITA	339
