## Chapter-1

|                                                                              |          |
|------------------------------------------------------------------------------|----------|
| <b>Introduction.....</b>                                                     | <b>7</b> |
| 1.1 Taxonomy and Systematics .....                                           | 7        |
| 1.2 Diversity and Unity: The Central Themes of Life Forms.....               | 8        |
| 1.3 History of Taxonomy .....                                                | 9        |
| 1.3.1 Taxonomy through Ages.....                                             | 9        |
| 1.3.1.1 Phase One: Age of Naturalists and Philosophers.....                  | 9        |
| 1.3.1.2 Phase Two: The Age of Herbalists .....                               | 10       |
| 1.3.1.3 Phase Three: Age of Arbitrators (Artificial Classifications) .....   | 11       |
| 1.3.1.4 Phase Four: Age of Scorers (Natural Classifications) .....           | 13       |
| 1.3.1.5 Phase Five: Age of Evolutionists (Phylogenetic Classifications)..... | 14       |
| 1.3.2 History of Taxonomy in India.....                                      | 17       |
| 1.3.2.1 Ancient India.....                                                   | 17       |
| 1.3.2.2 Medieval India (16 <sup>th</sup> Century onward).....                | 18       |
| 1.3.2.3 Modern India (19 <sup>th</sup> Century onward) .....                 | 19       |
| 1.4 Objectives of Taxonomy .....                                             | 20       |

## Chapter-2

|                                                       |           |
|-------------------------------------------------------|-----------|
| <b>Plant Identification .....</b>                     | <b>21</b> |
| 2.1 General Definitions .....                         | 21        |
| 2.2 Conventional Methods of Identification .....      | 21        |
| 2.2.1 First Method-Direct Comparison .....            | 21        |
| 2.2.2 Second Method - Photo Identification .....      | 21        |
| 2.2.3 Third method - Descriptive Identification ..... | 22        |
| 2.3 Use of Keys in the Identification .....           | 22        |
| 2.3.1 Punched Cards Keys .....                        | 22        |
| 2.3.2 Dichotomous Keys.....                           | 23        |
| 2.3.2.1 Indented key.....                             | 23        |
| 2.3.2.2 Bracket or Parallel Key.....                  | 23        |
| 2.4 Unconventional Methods of Identification .....    | 24        |
| 2.4.1 Polyclave Identification Method.....            | 24        |
| 2.4.2 Cyber Algorithm Identification Method.....      | 24        |

## Chapter-3

|                                        |           |
|----------------------------------------|-----------|
| <b>Plant Nomenclature .....</b>        | <b>25</b> |
| 3.1. General Definition.....           | 25        |
| 3.2. Types of Names .....              | 25        |
| 3.2.1. Common or Vernacular Names..... | 25        |

|                                                                                 |            |
|---------------------------------------------------------------------------------|------------|
| 3.2.2 International or Scientific Names .....                                   | 25         |
| 3.2.2.1. Polynomial System .....                                                | 26         |
| 3.2.2.2. Trinomial System .....                                                 | 26         |
| 3.2.2.3 Binomial System .....                                                   | 26         |
| 3.3. International Code of Botanical Nomenclature (ICBN): Vienna Code-2006..... | 27         |
| 3.3.1. Division I. Principles (I -VI).....                                      | 28         |
| 3.3.2. Division II. Rules and Recommendations (Art. 1-62) .....                 | 28         |
| 3.3.2.1. Taxa and Their Ranks (Articles 1-5).....                               | 28         |
| 3.3.2.2. Status Definitions (Art. 6).....                                       | 30         |
| 3.3.2.3. Typification (Articles 7-10) .....                                     | 32         |
| 3.3.2.4. Rules of Priority (Articles 11-15) .....                               | 43         |
| 3.3.2.5. Limitation of the Rules of Priority (Art. 13-15).....                  | 45         |
| 3.3.2.6. Names of Genera and Their Subdivisions (20-22).....                    | 51         |
| 3.3.2.7. Names of species and infraspecific taxa (23-27) .....                  | 56         |
| 3.3.2.8. Names of Plants in Cultivation (Art. 28) .....                         | 64         |
| 3.3.2.9. Effective and Valid Publication (Art. 29-45).....                      | 65         |
| 3.3.2.10. Author Citation (Art. 46-50) .....                                    | 82         |
| 3.3.2.11. Rejection of Names (Art. 51-58).....                                  | 91         |
| 3.3.2.12. Orthography (Art. 60-61).....                                         | 101        |
| 3.3.2.13. Gender of Names (Art. 62) .....                                       | 112        |
| 3.3.3. Division III. Provisions for the Governance of the Code .....            | 114        |
| 3.3.4. Appendices (I-VII).....                                                  | 115        |
| 3.3.4.1 Appendix I. Names of Hybrids .....                                      | 115        |
| 3.3.4.2 Appendix II. Nomina familiarum conservanda et rejicienda.....           | 115        |
| 3.3.4.3 Appendix III. Nomina generica conservanda et rejicienda.....            | 116        |
| 3.3.4.4 Appendix IV. Nomina specifica conservanda et rejicienda .....           | 116        |
| 3.3.4.5 Appendix V. Nomina utique rejicienda .....                              | 116        |
| 3.3.4.6 Appendix VI. Opera utique oppressa.....                                 | 116        |
| 3.3.4.7 Appendix VII. Glossary of terms used and defined in this Code .....     | 116        |
| <b>Chapter-4</b>                                                                |            |
| <b>Principles of Classification .....</b>                                       | <b>117</b> |
| 4.1 Principles of Classification .....                                          | 117        |
| 4.1.1 Taxonomic Structure.....                                                  | 117        |
| 4.1.2 Concepts of Taxa .....                                                    | 118        |
| 4.1.2.1 Concept of Species.....                                                 | 119        |
| I. Morphological - Typological or Taxonomic Species Concept.....                | 120        |
| II. Genetic Species Concept.....                                                | 121        |
| III. Biological Species Concept .....                                           | 122        |
| IV. Alternative Species Concepts .....                                          | 124        |
| 4.1.2.2 Concepts of Infraspecific Categories .....                              | 126        |
| 4.1.2.3 Concept of Genus.....                                                   | 127        |

|                                                                                |            |
|--------------------------------------------------------------------------------|------------|
| 4.1.2.4 Concept of Family .....                                                | 128        |
| 4.1.2.5 Concept of Taxa above Family .....                                     | 129        |
| 4.2 Taxonomic Characters .....                                                 | 129        |
| 4.2.1 Definition of Character .....                                            | 130        |
| 4.2.2 Selection of Character .....                                             | 131        |
| 4.2.3 Correlation of Characters .....                                          | 131        |
| 4.2.4 Weighting or Rating of Characters .....                                  | 132        |
| 4.2.4.1 Systems of Weighting of Character .....                                | 133        |
| <b>Chapter-5</b>                                                               |            |
| <b>Systems of Classification .....</b>                                         | <b>135</b> |
| 5.1 The Living World: An Overview .....                                        | 135        |
| 5.2 Nomenclature of Major Plant Taxa .....                                     | 138        |
| 5.3 Some Important Systems of Classifications of Carpophytes (=Angiosperms)... | 141        |
| 5.3.1 Bentham & Hooker's System .....                                          | 141        |
| 5.3.2 Engler & Prantl's System .....                                           | 153        |
| 5.3.3 Bessey's System .....                                                    | 160        |
| 5.3.4 Hutchinson's System .....                                                | 166        |
| 5.3.5 Takhtajan's System .....                                                 | 176        |
| 5.3.6 Cronquist's System .....                                                 | 185        |
| 5.3.7 R.M.T. Dahlgren's System .....                                           | 189        |
| 5.3.8 Robert F. Thorne's System .....                                          | 190        |
| 5.4 The Author's Verdict .....                                                 | 191        |
| <b>Chapter-6</b>                                                               |            |
| <b>Current Trends in Plant Taxonomy .....</b>                                  | <b>195</b> |
| 6.1 Traditional Vs. Current Taxonomy .....                                     | 195        |
| 6.2 Cytotaxonomy (Cytology + Taxonomy) .....                                   | 195        |
| 6.2.1 Chromosome Number .....                                                  | 196        |
| 6.2.2 Chromosome Morphology .....                                              | 197        |
| 6.2.3 Chromosomal Behaviour at Meiosis .....                                   | 198        |
| 6.2.4 Exclusive Examples .....                                                 | 198        |
| 6.3 Palynology and Taxonomy .....                                              | 200        |
| 6.3.1 Pollen Morphology .....                                                  | 200        |
| 6.3.2 Wall Features .....                                                      | 201        |
| 6.3.3 NPC Scheme .....                                                         | 202        |
| 6.3.4 Nuclear Condition of the Pollen Grains .....                             | 203        |
| 6.4 Embryology and Taxonomy .....                                              | 206        |
| 6.4.1 Exclusive Examples .....                                                 | 207        |
| 6.5 Anatomy and Taxonomy .....                                                 | 211        |
| 6.5.1 Vegetative Anatomy .....                                                 | 212        |
| 6.5.1.1 Exclusive Examples .....                                               | 212        |

|                                                                      |            |
|----------------------------------------------------------------------|------------|
| 6.5.2 Wood Anatomy .....                                             | 214        |
| 6.5.2.1 Exclusive Examples .....                                     | 214        |
| 6.5.3 Floral Anatomy .....                                           | 215        |
| 6.5.3.1 Exclusive Examples .....                                     | 215        |
| 6.6 Ecotaxonomy (Ecology + Taxonomy) .....                           | 216        |
| 6.6.1 Exclusive Examples .....                                       | 217        |
| <b>Chapter-7</b>                                                     |            |
| <b>Chemotaxonomy .....</b>                                           | <b>218</b> |
| 7.1 Chemotaxonomy (Chemistry + Taxonomy) .....                       | 218        |
| 7.1.1 Exclusive Examples .....                                       | 218        |
| <b>Chapter-8</b>                                                     |            |
| <b>Experimental Taxonomy .....</b>                                   | <b>231</b> |
| 8.1 Speculative and Experimental Taxonomy .....                      | 231        |
| 8.2 Serotaxonomy (Serology + Taxonomy) .....                         | 231        |
| 8.2.1 Technique of Serotaxonomy .....                                | 232        |
| 8.2.2 Exclusive Examples .....                                       | 233        |
| 8.3 Biosystematics .....                                             | 234        |
| 8.3.1 Steps in Biosystematics .....                                  | 234        |
| 8.3.2 Biosystematic Categories .....                                 | 235        |
| 8.3.3 Biosystematic Methods .....                                    | 237        |
| 8.3.4 Exclusive Examples .....                                       | 238        |
| 8.3.5 Limitations of Biosystematics .....                            | 238        |
| <b>Chapter-9</b>                                                     |            |
| <b>Numerical Taxonomy .....</b>                                      | <b>240</b> |
| 9.1 Numerical Taxonomy: A Comprehensive Natural Classification ..... | 240        |
| 9.2 Principles of Numerical Taxonomy .....                           | 240        |
| 9.3 Operational Steps of Numerical Taxonomy .....                    | 241        |
| 9.3.1 Operational Taxonomic Units (OTUs) .....                       | 241        |
| 9.3.2 Unit Taxonomic Characters .....                                | 241        |
| 9.3.3 Coding and Scaling of Characters .....                         | 242        |
| 9.3.4 Estimation of Resemblance .....                                | 243        |
| 9.3.5 Cluster Analysis .....                                         | 244        |
| 9.3.6 Phenons and Ranks .....                                        | 244        |
| 9.3.7 Significance of Numerical Taxonomy .....                       | 244        |
| 9.3.8 Exclusive Examples .....                                       | 245        |
| 9.3.9 Critical Assessment of Numerical Taxonomy .....                | 246        |
| 9.4 Phylogenetics or Molecular Phylogeny .....                       | 247        |
| 9.5 Methods of Constructing Phylogenetic Trees .....                 | 250        |
| 9.5.1 Distance Method .....                                          | 251        |

|                                                             |            |
|-------------------------------------------------------------|------------|
| 9.5.2 Maximum Parsimony .....                               | 258        |
| 9.5.3 Maximum Likelihood Methods .....                      | 260        |
| 9.5.4 Bootstrapping: Confidence in Reconstructed Trees..... | 262        |
| <b>Chapter-10</b>                                           |            |
| <b>Origin &amp; Phylogeny of Angiosperms .....</b>          | <b>263</b> |
| 10.1 Angiosperms or Carpophytes.....                        | 263        |
| 10.2 Salient Features of Angiosperms .....                  | 263        |
| 10.3 Geological Time of Origin of Angiosperms .....         | 265        |
| 10.4 Cradle of Angiosperms .....                            | 265        |
| 10.4.1 Polar Hypothesis .....                               | 265        |
| 10.4.2 Pacific Basin Hypothesis .....                       | 267        |
| 10.5 Probable Ancestors of Angiosperms.....                 | 268        |
| 10.5.1 Isoetes – Monocotyledon Theory .....                 | 269        |
| 10.5.2 Cycadophyteen Theories.....                          | 269        |
| 10.5.2.1 Glossopteridalean or Gonophyll Theory .....        | 270        |
| 10.5.2.2 Caytonialean Theory .....                          | 271        |
| 10.5.2.3 Pentoxylalean Theory .....                         | 272        |
| 10.5.3 Coniferales - Amentiferae Theory .....               | 274        |
| 10.5.4 Gnetales - Angiosperm Theory .....                   | 274        |
| 10.5.5 Phyllospermae – Stachyospermae Theory .....          | 275        |
| 10.5.6 Durian Theory .....                                  | 275        |
| 10.6 Primitive Angiosperms and Evolutionary Lines .....     | 277        |
| <b>Bibliography .....</b>                                   | <b>280</b> |
| <b>Index.....</b>                                           | <b>288</b> |
