

Table of contents

Abbreviations	I
Table of contents	III
1. Introduction	1
1.1. Enzymes	1
1.1.1. Why are enzymes of interest?	1
1.1.2. Enzyme mechanism	2
1.2. Esterases/lipases	4
1.2.1. Structure of esterases and lipases	4
1.2.2. Catalytic activity of lipolytic enzymes	5
1.2.3. Thermodynamics of Esterases and lipases	5
1.2.4. Inhibition of esterases and lipases	7
1.2.5. Differences between esterases and lipases	9
1.2.6. Classification of esterases and lipases	11
1.2.7. Applications of esterases and lipases	12
1.2.8. Esterases/ lipases and chiral drugs	13
1.2.9. Directed evolution of esterases and lipases	14
1.2.10. Esterases and lipases within <i>Streptomyces</i>	15
1.3. Characteristics of <i>Streptomyces</i>	16
1.3.1. Morphology and taxonomy	16
1.3.2. Genomic organisation of <i>Streptomyces</i>	18
1.4. Objectives	20
2. Materials and Methods	22
2.1. Bacterial strains	22
2.1.1. <i>Escherichia coli</i>	22
2.1.2. <i>Streptomyces</i>	22
2.2. Vectors	22
2.2.1. PCR® 4-TOPO	22
2.2.2. pET-16b	22
2.2.3. pET-23b	22
2.3. Reagents and Media	23
2.3.1. Buffers and other general solutions	23
2.3.2. Chemicals	23

Table of contents

2.3.3. Antibiotics	23
2.3.4. Other materials and kits	23
2.4. Media and growth conditions	24
2.4.1. <i>Streptomyces</i> strains	24
2.4.1.1. Liquid medium	24
2.4.1.2. Solid medium	24
2.4.2. <i>E.coli</i> strains	24
2.4.2.1. Liquid Medium	24
2.4.2.2. Solid Medium	25
2.5. Strains preservation	25
2.6. DNA Isolation	25
2.6.1. Isolation of total <i>Streptomyces</i> DNA	25
2.6.2. Isolation of cosmid/plasmid DNA (alkali lyses)	25
2.6.3. Purification of cosmid -/plasmid DNA	26
2.6.3.1. Purification using nucleobond®AX, Macherey-Nagel	26
2.6.3.2. Purification of DNA using GFX™ microplasmid prep kit, Instructions, Amersham Pharmacia Biotech Inc	26
2.7. DNA gel electrophoresis	27
2.7.1. Agarose gel electrophoresis	27
2.7.2. Colouring and evaluation of the gel	27
2.8. DNA manipulation	28
2.8.1. Phenol/Chloroform extraction	28
2.8.2. DNA precipitation	28
2.8.3. DNA restriction	28
2.8.4. Determination of DNA concentration	28
2.8.5. RNase treatment	29
2.8.6. Ligation	29
2.8.6.1. Ligation of cohesive ends	29
2.9. "TOPO TA-cloning"	30
2.10. Transformation	30
2.10.1. Production of electrocompetent cells	30
2.10.2. Transformation through electroporation	31
2.11. PCR	31
2.11.1. Site directed mutagenesis PCR	32
2.11.2. Random mutagenesis	32
2.11.2.1. Error-Prone PCR	32

Table of contents

2.11.3. Purification of PCR products	32
2.12. DNA Sequencing	33
2.12.1. Sequencing reaction	33
2.12.2. Documentation and evaluation of the data	33
2.13. Primers	33
2.14. Protein manipulations	36
2.14.1. Protein expression	36
2.14.2. Protein isolation	36
2.14.3. Protein purification	36
2.14.4. Determination of protein concentration	36
2.14.5. SDS-PAGE (polyacrylamide gel electrophoresis)	37
2.14.6. Detection of protein bands	38
2.14.7. Native Gel	39
2.14.8. Western blot	39
2.14.9. Removal of the His-tag	39
2.15. Detection of enzyme activity	40
2.15.1. Spectrophotometric assay	40
2.15.1.1. Using <i>p</i> -nitrophenylesters	40
2.15.1.2. Using naphthylesters	40
2.15.2. Qualitative detection of activity (plate and well method)	40
2.16. Determination of enantioselectivity	41
2.17. Soft wares and web sites	41
2.17.1. Web sites	41
2.17.2. Software	41
3. Results	42
3.1. Cloning of putative esterase and lipase genes	42
3.1.1. Overview	42
3.1.2. General cloning strategy	42
3.1.3. Amplification of the putative esterase/lipase genes	45
3.1.4. Cloning	46
3.1.4.1. Cloning in TA vector	46
3.1.4.2. Sequencing	47
3.1.4.3. Subcloning in the expression vector	49
3.2. Protein expression	53
3.2.1. Expression, characterization and directed evolution of a novel (HSL) acetylsterase from <i>Streptomyces coelicolor</i> A3(2) "gene locus SCO 7131"	56

Table of contents

3.2.1.1. Est A expression and purification	56
3.2.1.2. Characterization of Est A	59
3.2.1.2.1. Substrate specificity of Est A	59
3.2.1.2.2. Effect of temperature on Est A activity and stability	59
3.2.1.2.3. Effect of pH on enzyme activity and stability	61
3.2.1.2.4. Effect of metal ions and inhibitors	63
3.2.1.2.5. Effect of water miscible organic solvents	65
3.2.1.2.6. Kinetic parameters of Est A.	66
3.2.1.2.7. Enantioselectivity profile of Est A	68
3.2.1.2.8. Classification of Est A.	69
3.2.1.2.9. Homology modeling of Est A.	72
3.2.2. Est A directed evolution through site directed mutagenesis	77
3.2.2.1. Site directed mutagenesis PCR	77
3.2.2.2. Characterization of Est A mutants	80
3.2.2.2.1. Substrate specificity	80
3.2.2.2.2. Effect of temperature on activity and stability	81
3.2.2.2.3. Effect of pH on activity	83
3.2.2.2.4. Kinetic parameters	84
3.2.2.2.5. Effect of inhibitors	84
3.2.3. Directed evolution through random mutagenesis of Est A	85
3.2.4. Overexpression and biochemical characterization of a cold active esterase from <i>Streptomyces coelicolor</i> A3(2) "Gene locus SCO 6966"	89
3.2.4.1. Est B expression and purification	89
3.2.4.2. Est B characterization	90
3.2.4.2.1. Substrate specificity	90
3.2.4.2.2. Effect of Temperature on the activity and stability of Est B	91
3.2.4.2.3. Effect of pH on the activity and stability of Est B	93
3.2.4.2.4. Effect of metal ions and inhibitors of Est B	94
3.2.4.2.5. Effect of organic solvents on the activity and stability of Est B	95
3.2.4.2.6. Kinetic parameters	97
3.2.4.2.7. Enantioselectivity profile of Est B	97
3.2.4.2.8. Classification of Est B	98
3.2.5. Other Enzymes from <i>S. coelicolor</i> and <i>S. avermitilis</i>	99
3.2.5.1. Overexpression and biochemical characterization of an esterase from <i>Streptomyces coelicolor</i> A3(2) "Gene locus SCO 3644"	99
3.2.5.2. Overexpression of an enzyme from <i>Streptomyces coelicolor</i> A3(2) "Gene locus SCO 1265"	99

Table of contents

3.2.5.3.	Some insoluble lipolytic enzymes from <i>Streptomyces coelicolor</i> and <i>Streptomyces avermitilis</i>	100
3.2.5.4.	Expression of some genes using the expression vector pET-23b	100
4.	Discussion	101
4.1.	Biochemical characterisation of Est A	101
4.1.1.	Substrate specificity and Est A kinetics	101
4.1.2.	Effects of temperature on Est A activity and stability	102
4.1.3.	Effects of pH on Est A	105
4.1.4.	Effect of metal ions and inhibitors	105
4.1.5.	Enantioselectivity profile of Est A	105
4.1.6.	HSL family conserved motifs	106
4.2.	Site directed mutagenesis	108
4.3.	Random mutagenesis	110
4.4.	Biochemical characterisation of Est B	113
4.5.	Other enzymes	114
4.5.1.	Activity of the esterase from the gene locus SCO 3644	114
4.5.2.	The enzyme produced from the gene locus SCO 1265	114
4.5.3.	The insoluble enzymes	115
4.6.	Future perspectives	115
5.	Literature	117
6.	Appendix	126
A:	The hydrolysis of some chiral compounds using Est A	126
B:	The hydrolysis of some chiral compounds using Est B.	129
