

Contents

Preface	
1. Developmental Genetics and Embryology of the Mouse: Past, Present, and Future	1
2. Summary of Mouse Development	31
3. Production of Transgenic and Chimeric Mice: General Issues	141
4. Recovery and In Vitro Culture of Preimplantation-stage Embryos	161
5. Isolation, Culture, and Manipulation of Postimplantation Embryos	209
6. Surgical Procedures	251
7. Production of Transgenic Mice	289
8. Isolation and Culture of Blastocyst-derived Stem Cell Lines	359
9. Vector Designs for Embryonic Stem Cell-based Transgenesis and Genome Alterations	399
10. Introduction of Foreign DNA into Embryonic Stem Cells	431
11. Production of Chimeras	453
12. Detection and Analysis of Mouse Genome Alterations and Specific Sequences	507
13. Parthenogenesis, Pronuclear Transfer, and Mouse Cloning	541
14. Assisted Reproduction: Ovary Transplantation, In Vitro Fertilization, Artificial Insemination, and Intracytoplasmic Sperm Injection	565
15. Cryopreservation, Rederivation, and Transport of Mice	599
16. Techniques for Visualizing Gene Products, Cells, Tissues, and Organ Systems	629
17. Setting Up a Micromanipulation Lab	707
Appendix 1: Buffers and Solutions	725
Appendix 2: Cautions	735
Appendix 3: Suppliers	749
Index	751
