

目录

历史简介和概论

CHAPTER 1
历史简介和概论 1

CHAPTER 2
Collecting and Storing Sequences in the
Laboratory, 19

CHAPTER 3
Alignment of Pairs of Sequences, 51

CHAPTER 4
Introduction to Probability and Statistical
Analysis of Sequence Alignments, 99

CHAPTER 5
Multiple Sequence Alignment, 137

CHAPTER 6
Sequence Database Searching for Similar
Sequences, 193

CHAPTER 7
Phylogenetic Prediction, 241

CHAPTER 8
Prediction of RNA Secondary Structure, 283

CHAPTER 9
Gene Prediction and Regulation, 313

CHAPTER 10
Protein Classification and Structure Prediction, 353

CHAPTER 11
Genome Analysis, 431

CHAPTER 12
Bioinformatics Programming Using Perl and Perl
Modules, 481

CHAPTER 13
Analysis of Microarrays, 535

Index, 667
