PART I Isolation and Subfractionation of Mitochondria

1. Isolation and Subfractionation of Mitochondria from Animal Cells and Tissue Culture Lines

Francesco Pallotti and Giorgio Lenaz

I. Introduction	4
II. General Features of Mitochondrial Preparations	5
III. Mitochondria from Beef Heart	8
IV. Mitochondria from Rat Liver	17
V. Mitochondria from Skeletal Muscle	23
VI. Synaptic and Nonsynaptic Mitochondria from Different Rat Brain Regions	26
VII. Mitochondria from Kidney and Testis	29
VIII. Mitochondria from Hamster Brown Adipose Tissue	29
IX. Mitochondria from Insect Flight Muscle	30
X. Mitochondria from Porcine Adrenal Cortex	30
XI. Mitochondria from Human Platelets	31
XII. Mitochondria from Fish Liver	32
XIII. Mitochondria from Sea Urchin Eggs	33
XIV. Mitochondria and Kinetoplasts from Protozoa	33
XV. Mitochondria from Fish Erythrocytes	35
XVI. Mitochondria from <i>Caenorhabditis elegans</i>	35
XVII. Mitochondria from <i>Drosophila</i>	35
XVIII. Mitochondria and Mitoplasts from Cultured Cells	36
References	39

2. Purification and Subfractionation of Mitochondria from the Yeast *Saccharomyces cerevisiae*

Istvan R. Boldogh and Liza A. Pon

I. Introduction	45
II. Isolation of Mitochondria	46
III. Analysis of Isolated Mitochondria	53

IV. Isolation of Mitochondrial Outer Membranes, Contact Sites, and Inner Membranes	61
References	63
3. Isolation and Subfractionation of Mitochondria from Plants	
<i>A. H. Millar, A. Liddell, and C. J. Leaver</i>	
I. Introduction	66
II. Growth and Preparation of Plant Material	66
III. Isolation of Mitochondria	67
IV. Density Gradient Purification of Mitochondria	69
V. Mitochondrial Yield, Purity, Integrity, Storage, and Function	73
VI. Subfractionation of Mitochondrial Compartments	77
VII. <i>In Organello</i> Translation Analysis	83
VIII. Proteome Analysis	85
IX. Conclusion	87
References	87

PART II Biochemical Assays of Mitochondrial Activity

4. Biochemical Assays of Respiratory Chain Complex Activity	
<i>Denise M. Kirby, David R. Thorburn, Douglass M. Turnbull, and Robert W. Taylor</i>	
I. Introduction	93
II. Materials and Methods	96
III. Interpreting Results of RC Enzymology	114
References	116
5. Polarographic Assays of Respiratory Chain Complex Activity	
<i>Gaetano Villani and Giuseppe Attardi</i>	
I. Introduction	121
II. Measurements of Endogenous Respiration in Intact Cells	122
III. KCN Titration of COX Activity in Intact Cells	124
IV. <i>In Situ</i> Analysis of Mitochondrial OXPHOS	128
References	132
6. Optical Imaging Techniques (Histochemical, Immunohistochemical, and <i>In Situ</i> Hybridization Staining Methods) to Visualize Mitochondria	
<i>Kurenai Tanji and Eduardo Bonilla</i>	
I. Introduction	135
II. Histochemistry	137

III. Immunohistochemistry	142
IV. <i>In Situ</i> Hybridization to mtDNA	148
References	151
7. Assay of Mitochondrial ATP Synthesis in Animal Cells and Tissues	
<i>Cristofol Vives-Bauza, Lichuan Yang, and Giovanni Manfredi</i>	
I. Introduction	155
II. ATP Synthesis Assays	156
III. Methodological Considerations	157
IV. Experimental Procedures	160
V. Measurement of High-Energy Phosphates in Animal Tissue and Cultured Cells by HPLC	165
References	169
8. Measurement of the Ratio of Lactate to Pyruvate in Skin Fibroblast Cultures	
<i>Nevi Mackay and Brian H. Robinson</i>	
I. Introduction	173
II. Principle	174
III. Procedure	175
IV. Results	177
References	178
9. Assays of Fatty Acid β -Oxidation Activity	
<i>Michael J. Bennett</i>	
I. Introduction	179
II. Metabolite Measurements	183
III. Enzyme and Transporter Assays	186
IV. Metabolic Flux Studies	193
V. Discussion	195
References	195
10. Biochemical Assays for Mitochondrial Activity: Assays of TCA Cycle Enzymes and PDHc	
<i>Ann Saada Reisch and Orly Elpeleg</i>	
I. Introduction	199
II. Pyruvate Dehydrogenase Complex	202
III. Citrate Synthase	207
IV. Aconitase	209

V. Isocitrate Dehydrogenase	209
VI. α -Ketoglutarate Dehydrogenase Complex	210
VII. Succinyl CoA Synthetase	212
VIII. Succinate Dehydrogenase	213
IX. Fumarase	214
X. Malate Dehydrogenase	217
XI. Conclusion	217
References	217
 11. Assays of Cardiolipin Levels	
<i>Michael Schlame</i>	
I. Introduction	223
II. Molecular Species of Cardiolipin	225
III. Cardiolipin Analysis by TLC	226
IV. Cardiolipin Analysis by HPLC	230
V. Cardiolipin Analysis by MS	234
VI. Applications of Cardiolipin Measurements	236
References	238
 12. Measurement of VDAC Permeability in Intact Mitochondria and in Reconstituted Systems	
<i>Marco Colombini</i>	
I. Introduction	241
II. Determining the Permeability of the Mitochondrial Outer Membrane to Metabolites	243
III. VDAC Activity After Reconstitution into Phospholipid Membranes	253
IV. Summary	259
References	259
 13. Methods for Studying Iron Metabolism in Yeast Mitochondria	
<i>Sabine Molik, Roland Lill, and Ulrich Mühlenhoff</i>	
I. Introduction	261
II. Determination of Cellular Fe/S Protein Formation and Heme Synthesis	263
III. Determination of Mitochondrial Iron Contents	272
IV. Reporter Assays for Analysis of Iron-Dependent Gene Expression in <i>S. cerevisiae</i>	274
References	279

PART III Assays for Mitochondrial Respiratory Activity and Permeability in Living Cells

14. Imaging of Mitochondrial Polarization and Depolarization with Cationic Fluorophores

John J. Lemasters and Venkat K. Ramshesh

I. Introduction	283
II. Quantitative Imaging of $\Delta\Psi$ with Fluorescent Cations	284
III. Visualization of Depolarized Mitochondria	289
IV. Conclusion	293
References	294

15. Biosensors for the Detection of Calcium and pH

Paolo Pinton, Alessandro Rimessi, Anna Romagnoli, Andrea Prandini, and Rosario Rizzuto

I. Introduction	297
II. Targeting Strategies and Transfection	298
III. Calcium Reporters	300
IV. pH Reporters	316
V. Conclusions	321
References	322

16. Measurement of Membrane Permeability and the Permeability Transition of Mitochondria

Naoufal Zamzami, Carine Maise, Didier M  tivier, and Guido Kroemer

I. Introduction	327
II. Procedures	328
References	338

17. Luciferase Expression for ATP Imaging: Application to Cardiac Myocytes

Christopher J. Bell, Giovanni Manfredi, Elinor J. Griffiths, and Guy A. Rutter

I. Introduction	341
II. ATP Homeostasis in the Heart	343
III. Measurement of Mitochondrial and Cytosolic ATP in Cardiac Myocytes	343
IV. Measurement of ATP in Subcellular Compartments by Luminometry	346
References	351

PART IV Oxidative Stress Measurements

18. Measurement of Reactive Oxygen Species in Cells and Mitochondria

J. S. Armstrong and M. Whiteman

I. Introduction	355
II. Measurement of ROS in Cells	357
III. Measurement of ROS in Mitochondria	369
IV. General Problems Associated with the Measurement of ROS	372
V. Conclusions	373
References	374

19. Measurements of the Antioxidant Enzyme Activities of Superoxide Dismutase, Catalase, and Glutathione Peroxidase

Cristofol Vives-Bauza, Anatoly Starkov, and Elena Garcia-Aruri

I. Introduction	379
II. Experimental Procedures	380
References	391

20. Methods for Measuring the Regulation of Respiration by Nitric Oxide

Sruti Shiva, Paul S. Brookes, and Victor M. Darley-Usmar

I. Introduction	396
II. Apparatus	398
III. Calibration of the NO [•] Electrode	401
IV. NO [•] Threshold Measurement	406
V. Open-Flow Respirometry	411
VI. An <i>In Vitro</i> Model of Ischemia/Reperfusion Injury	413
VII. Conclusion	414
References	415

21. Methods for Determining the Modification of Protein Thiols by Reactive Lipids

JooYeun Oh, Michelle S. Johnson, and Aimee Landar

I. Introduction	417
II. Rationale	419
III. Methods	421
IV. Discussion	432
References	433

PART V Mitochondrial Genes and Gene Expression**22. Detection of Mutations in mtDNA***Ali Naini and Sara Shanske*

I. Introduction	438
II. Large-Scale Rearrangements of mtDNA	439
III. Detecting mtDNA Rearrangements	440
IV. Details of Southern Blot Hybridization Analysis	443
V. Depletion of mtDNA	447
VI. Point Mutations in mtDNA	449
References	460

23. Diagnostic Assays for Defects in mtDNA Replication and Transcription in Yeast and Humans*Gerald S. Shadel and Bonnie L. Seidel-Rogol*

I. Introduction	465
II. Diagnosis of mtDNA Replication Defects in Yeast and Human Cells	466
III. Analyzing Mitochondrial Transcripts <i>In Vivo</i>	472
IV. Additional Considerations	477
References	477

24. Microdissection and Analytical PCR for the Investigation of mtDNA Lesions*Sion L. Williams and Carlos T. Moraes*

I. Introduction	481
II. Microdissection and DNA Purification	482
III. Analytical PCR for Investigation of mtDNA in Microdissected Samples	487
IV. Concluding Remarks	498
References	499

25. Transmitochondrial Technology in Animal Cells*Sandra R. Bacman and Carlos T. Moraes*

I. Introduction	504
II. Generation of Nuclear Donors	504
III. Generation of mtDNA Donors	510
IV. Generation of Transmitochondrial Cybrids	514
V. Manipulating Heteroplasmy	519
References	520

26. Genetic Transformation of <i>Saccharomyces cerevisiae</i> and <i>Chlamydomonas reinhardtii</i> Mitochondria	
<i>Nathalie Bonnefoy, Claire Remacle, and Thomas D. Fox</i>	
I. Introduction	526
II. Important Features of <i>S. cerevisiae</i> and <i>C. reinhardtii</i> Mitochondrial Genetics	527
III. Delivery of DNA to the Mitochondrial Compartment of ρ^0 Cells and Detection of Mitochondrial Transformants	532
IV. Strategies for Gene Replacement in <i>S. cerevisiae</i> mtDNA	538
V. Transformation of ρ^+ Cells with Plasmids or Linear DNA Fragments	542
VI. Concluding Remarks	544
References	544
27. Generation of Transmitochondrial Mice: Development of Xenomitochondrial Mice to Model Neurodegenerative Diseases	
<i>Carl A. Pinkert and Ian A. Trounce</i>	
I. Introduction	549
II. Spontaneous and Induced Models of Mitochondrial Disease	550
III. Transgenic Models	552
IV. Introduction of Mutant mtDNA into Mitochondria	552
V. The First Transmitochondrial Mice	555
VI. Summary/Future Directions	564
References	565
28. <i>In Vivo</i> and <i>In Organello</i> Analyses of Mitochondrial Translation	
<i>P. Fernández-Silva, R. Acín-Pérez, E. Fernández-Vizcarra, A. Pérez-Martos, and J. A. Enriquez</i>	
I. Introduction	571
II. Rationale	573
III. Methods	576
IV. Materials	583
V. Discussion	584
VI. Summary	585
References	585
PART VI Assays for Mitochondrial Morphology and Motility	
29. Visualization of Mitochondria in Budding Yeast	
<i>Theresa C. Swayne, Anna C. Gay, and Liza A. Pon</i>	
I. Introduction	592
II. Use of Vital Dyes to Stain Yeast Mitochondria	592

III. Use of Immunostaining to Detect Mitochondria in Fixed Yeast Cells	596
IV. Ectopic Expression of Mitochondria-Targeted Fluorescent Fusion Proteins	604
V. Tagging Endogenous Proteins with Fluorescent Proteins	607
VI. Strategies for Visualization of Yeast Mitochondria	614
VII. Methods for Imaging of Mitochondria in Living Yeast Cells	620
References	624
 30. Visualization and Quantification of Mitochondrial Dynamics in Living Animal Cells	
<i>Kurt J. De Vos and Michael P. Sheetz</i>	
I. Introduction	628
II. Labeling of Mitochondria in Living Animal Cells	631
III. Probing Interactions Between Mitochondria and the Cytoskeleton and Molecular Motors in Living Animal Cells	634
IV. Image Acquisition	639
V. Preparation of Cells	645
VI. Time-Lapse Recordings	648
VII. Analysis of Mitochondrial Motility	650
VIII. Analysis of Mitochondrial Morphology	660
IX. Appendix A	666
X. Appendix B	670
References	673
 31. Cell-Free Assays for Mitochondria-Cytoskeleton Interactions	
<i>Istvan R. Boldogh, Liza A. Pon, Michael P. Sheetz, and Kurt J. De Vos</i>	
I. Introduction	683
II. <i>In Vitro</i> Reconstitution of Microtubule-Based Mitochondrial Transport	684
III. Sedimentation Assay for Binding of Actin to Mitochondria	696
References	705
 32. <i>In Vitro</i> Assays for Mitochondrial Fusion and Division	
<i>Elena Ingeman, Shelly Meeusen, Rachel DeVay, and Jodi Nunnari</i>	
I. Introduction	707
II. Mitochondrial Fusion <i>In Vitro</i>	708
III. Analysis of Dynamin-Related GTPase Activity <i>In Vitro</i>	712
References	718

PART VII Methods to Determine Protein Localization to Mitochondria

33. Electrophoretic Methods to Isolate Protein Complexes from Mitochondria

Ilka Wittig and Hermann Schägger

I. Introduction	723
II. Materials and Methods	725
III. Applications	733
IV. Outlook	738
References	739

34. Analysis of Protein-Protein Interactions in Mitochondria

Johannes M. Hermann and Benedikt Westermann

I. Introduction	743
II. Rationale	744
III. Methods	745
References	757

35. Analysis and Prediction of Mitochondrial Targeting Signals

Shukry J. Habib, Walter Neupert, and Doron Rapaport

I. Introduction	761
II. Overview on Protein Translocation into Mitochondria	762
III. Mitochondrial-Targeting Signals	764
IV. Bioinformatics Tools to Predict Mitochondrial Targeting Signals	772
V. Experimental Analysis of Mitochondrial-Targeting Signals	774
VI. Summary	776
References	776

36. Import of Proteins into Mitochondria

Diana Stojanovski, Nikolaus Pfanner, and Nils Wiedemann

I. Introduction	783
II. <i>In Vitro</i> Synthesis of Precursor Proteins	785
III. The Import Reaction	789
IV. Steps to Resolve the Location of Imported Mitochondrial Precursors	794
V. Assaying Protein Complex Assembly by BN-PAGE	797
VI. Resolving Protein Complex Constituents	798

VII. Assaying Protein Import in Yeast Mutants	801
VIII. Concluding Remarks	802
References	803

PART VIII Appendices

1. Basic Properties of Mitochondria	809
2. Direct and Indirect Inhibitors of Mitochondrial ATP Synthesis	813
3. Linearized Maps of Circular Mitochondrial Genomes from Representative Organisms	827
4. Mitochondrial Genetic Codes in Various Organisms	831
5. Gene Products Present in Mitochondria of Yeast and Animal Cells	835
6. Changes in the Mitochondrial Transcriptome and Proteome Under Various Stresses and Growth Conditions	877
Index	889
Volumes in Series	913
