

Basics of Biotechnology

Advent of the Biotechnology Revolution	2
Chemical Structure of Nucleic Acids	4
Packaging of Nucleic Acids	6
Bacteria as the Workhorses of Biotechnology	8
<i>Escherichia coli</i> Is the Model Bacterium	9
Many Bacteria Contain Plasmids	10
Other Bacteria in Biotechnology	11
Basic Genetics of Eukaryotic Cells	12
Yeast and Filamentous Fungi in Biotechnology	12
Yeast Mating Types and Cell Cycle	15
Multicellular Organisms as Research Models	16
<i>Caenorhabditis elegans</i> , a Small Roundworm	16
<i>Drosophila melanogaster</i> , the Common Fruit Fly	18
Zebrafish Are Models for Developmental Genetics	18
<i>Mus musculus</i> , the Mouse, Is Genetically Similar to Humans	19
Animal Cell Culture <i>in Vitro</i>	19
<i>Arabidopsis thaliana</i> , a Model Flowering Plant	21
Viruses Used in Genetics Research	22
Subviral Infectious Agents and Other Gene Creatures	25
