

目 录

昼夜节律

Circadian Function and Therapeutic Potential of Melatonin in Humans.....	3
Circadian Gene Expression in the Suprachiasmatic Nucleus.....	11
Circadian Genes and the Sleep-Wake Cycle.....	19
Circadian Metabolic Rhythms Regulated by the Suprachiasmatic Nucleus.....	25
Circadian Organization	34
Circadian Organization in Non-Mammalian Vertebrates	40
Circadian Oscillations in the Suprachiasmatic Nucleus	48
Circadian Regulation by the Suprachiasmatic Nucleus.....	54
Circadian Regulation in Invertebrates.....	60
Circadian Rhythm Models	66
Circadian Rhythms in Sleepiness, Alertness, and Performance.....	73
Circadian Rhythms: Influence of Light in Humans.....	79
Circadian Systems: Evolution	97
Clock Gene Regulation of Endocrine Function	104
Clock Genes and Metabolic Regulation	107
Entrainment of Circadian Rhythms by Light.....	114
Genetic Regulation of Circadian Rhythms in <i>Drosophila</i>	122
Genetics of Circadian Disorders in Humans.....	129
Mammalian Sleep and Circadian Rhythms: Flies.....	135
Melatonin Regulation of Circadian Rhythmicity in Vertebrates	142
Non-Photoreceptor Photoreception	154
Peripheral Circadian Oscillators	161
Photoreceptors and Circadian Clocks	167
Psychiatric Disorders Associated with Disturbed Sleep and Circadian Rhythms.....	175
Serotonin and the Regulation of Mammalian Circadian Rhythms	194
Shift Work and Circadian Rhythms	202
Single Cell Neuronal Circadian Clocks	207
Sleep and Circadian Rhythm Disorders in Human Aging and Dementia	212
Sleep and Waking in <i>Drosophila</i>	219
Sleep: Development and Circadian Control	226
Transcription Control and the Circadian Clock.....	231

季节节律

Photoperiodic Regulation of Reproductive Cycles	243
Seasonal Changes in Night-Length and Impact on Human Sleep	254
Seasonal Hormonal Changes and Behavior	257
Seasonal Timing: Neural Mechanisms	265

睡眠、做梦与清醒

Autonomic Dysregulation During REM Sleep.....	275
Cataplexy	282
Coma.....	289
Dopamine Control of Arousal.....	299
Dream Function.....	305
Dreams and Dreaming: Incorporation of Waking Events	312
Dreams and Nightmares in PTSD.....	320
Dreams, Dreaming Theories and Correlates of Nightmares.....	327
Endocrine Function During Sleep and Sleep Deprivation.....	334
Hibernation.....	338
Immune Function During Sleep and Sleep Deprivation	343
Metabolic Syndrome and Sleep.....	348
Napping	353
Narcolepsy.....	359
Nightmares.....	367
Parasomnias.....	373
Pharmacology of Sleep: Adenosine.....	377
Reticular Activating System	387
Sleep and Circadian Rhythm Disorders in Human Aging and Dementia	394
Sleep and Sleep States: Gene Expression	401
Sleep and Sleep States: Hippocampus-Neocortex Dialog.....	408
Sleep and Sleep States: Histamine Role.....	415
Sleep and Sleep States: Hypothalamic Regulation	425
Sleep and Sleep States: Network Reactivation.....	433
Sleep and Sleep States: PET Activation Patterns	441
Sleep and Sleep States: Phylogeny and Ontogeny	448
Sleep and Sleep States: Thalamic Regulation	457
Sleep Apnea.....	461
Sleep Architecture	468
Sleep Deprivation and Brain Function	475

Sleep Deprivation: Neurobehavioral Changes.....	480
Sleep in Adolescents	488
Sleep in Aging	496
Sleep Mentation in REM and NREM: A Neurocognitive Perspective.....	503
Sleep Oscillations.....	509
Sleep Oscillations and PGO Waves.....	517
Sleep Research and Sleep Medicine in Historical Perspective	525
Sleep-Dependent Memory Processing	531
Sleeping Sickness	542
Sleep-Wake State Regulation by Acetylcholine.....	549
Sleep-Wake State Regulation by Noradrenaline and Serotonin.....	553
Stimulant and Wake-Promoting Substances.....	558
The AIM Model of Dreaming, Sleeping, and Waking Consciousness.....	564
Thermoregulation during Sleep and Sleep Deprivation	572
原书词条中英对照表.....	577
