

目 录

细胞内信号级联与第二信使

Calcium-Calmodulin Kinase II (CaMKII) in Learning and Memory	3
Cyclic AMP (cAMP) Role in Learning and Memory	11
Eph Receptor Signaling and Spine Morphology	24
MAP Kinase Signaling in Learning and Memory	29
Neural Crest Cell Diversification and Specification: ErbB Role	35
Notch Pathway: Lateral Inhibition	43
Notch Signal Transduction: Molecular and Cellular Mechanisms	52
Retinoic Acid Signaling and Neural Patterning	62
Sonic Hedgehog and Neural Patterning	68
Synaptic Plasticity: Diacylglycerol Signalling Role	76
Wnt Pathway and Neural Patterning	85

细胞内转运与细胞骨架

Actin Cytoskeleton in Growth Cones, Nerve Terminals, and Dendritic Spines	93
AMPA Receptor Cell Biology/Trafficking	100
Axonal and Dendritic Identity and Structure: Control of	108
Axonal and Dendritic Transport by Dyneins and Kinesins in Neurons	116
Axonal mRNA Transport and Functions	124
Axonal Transport and ALS	133
Axonal Transport and Alzheimer's Disease	140
Axonal Transport and Huntington's Disease	146
Axonal Transport and Neurodegenerative Diseases	150
Axonal Transport Disorders	155
Axonal Transport Tracers	159
Cytoskeletal Interactions in the Neuron	167
Cytoskeleton in Plasticity	176
Dendrites: Localized Translation	182
Dendritic RNA Transport: Dynamic Spatio-Temporal Control of Neuronal Gene Expression	187
Dystrophin, Associated Proteins, and Muscular Dystrophy	195
Intermediate Filaments	209
LIM Kinase and Actin Regulation of Spines	215

Lysosome and Endosome Organization and Transport in Neurons	221
Microtubule Associated Proteins in Neurons	228
Microtubules: Organization and Function in Neurons	234
Mitochondrial Organization and Transport in Neurons.....	242
Myosin Transport and Neuronal Function.....	251
Neurofilaments: Organization and Function in Neurons	258
Neuronal Motility and Structure: MARK and GSK Pathways.....	262
NMDA Receptors, Cell Biology and Trafficking	268
Nuclear Movements in Neurons	276
Peroxisomes: Organization and Transport in Neurons.....	281
Prion Transport.....	287
Proteasome Role in Neurodegeneration	292
Protein Folding and the Role of Chaperone Proteins in Neurodegenerative Disease.....	298
Retrograde Neurotrophic Signaling.....	302
Slow Axonal Transport.....	309
Spectrin: Organization and Function in Neurons	318
Transport Dependent Damage Signaling	324
Vesicular Sorting to Axons and Dendrites.....	329

分泌与囊泡循环

Active Zone	337
Botulinum and Tetanus Toxins.....	344
Calcium Channel Subtypes Involved in Neurotransmitter Release.....	350
Calcium Channels and SNARE Proteins	358
CIRL/Latrophilins.....	365
Clathrin and Clathrin-Adaptors.....	370
Complexins.....	375
Cysteine-String Proteins (CSPs).....	382
Dynamin	390
Endocytosis: Kiss and Run	401
Exocytosis: Ca²⁺-Sensitivity	408
Fusion Pore	414
Large Dense Core Vesicles (LDCVs).....	422
Latrotoxin	430
Liprins, ELKS, and RIM-BP Proteins.....	434
Lysosomal System.....	441
Munc13 and Associated Molecules	451
Munc18.....	457

Neurexins.....	466
Neuroligins	473
Neurosecretion (Regulated Exocytosis in Neuroendocrine Cells)	477
Neurotransmitter Release from Astrocytes	485
Neurotransmitter Release: Synchronous and Asynchronous	491
NSF and SNAPs.....	496
Optical Monitoring of Exo- and Endocytosis.....	503
PHR (Pam/Highwire/RPM-1).....	508
Piccolo and Bassoon	515
Presynaptic Receptor Signaling	520
Rab3.....	529
Rab3A Interacting Molecules (RIMs).....	534
RNA Granules: Functions within Presynaptic Terminals and Postsynaptic Spines.....	542
SNAREs.....	549
Synapsins.....	558
Synaptic Plasticity: Short-Term Mechanisms.....	562
Synaptic Vesicle Protein-2 (SV2).....	568
Synaptic Vesicles.....	572
Synaptotagmin	580
Synaptotagmins	586
SynCAMs	589
Synucleins.....	595
Vesicle Pools	600
Vesicular Neurotransmitter Transporters.....	607
Voltage-Gated Calcium Channels	614
原书词条中英对照表.....	629
