

目 录

神经胶质细胞: 起源、多样性与功能

Activity-Dependent Metabolism in Glia and Neurons	3
Astrocyte: Calcium Signaling	11
Astrocyte: Identification Methods	19
Astrocyte: Neurotransmitter and Hormone Receptors	24
Astrocyte: Response to Injury	31
Axon Guidance by Glia	38
Axonal Regeneration: Role of the Extracellular Matrix and the Glial Scar	48
Bergmann Glial Cells	56
Calcium Homeostasis in Glia	67
Calcium Waves in Glia	74
Cytokine Receptors in Glia	82
Enteric Nervous System: Glial Cells and Interstitial Cells of Cajal	88
Ependymal Cells	94
Gap Junctions and Hemichannels in Glia	102
Glia and Stroke	108
Glia Control of Blood Flow	117
Glial Cells: Astrocytes and Oligodendrocytes during Normal Brain Aging	123
Glial Cells: Invertebrate	128
Glial Cells: Microglia during Normal Brain Aging	139
Glial Cells: T Cell Interactions	142
Glial Energy Metabolism: A NMR Spectroscopy Perspective	150
Glial Energy Metabolism: Overview	159
Glial Glutamate and GABA Metabolism	165
Glial Glutamate Transporters	169
Glial Glutamate Transporters: Electrophysiology	181
Glial Glycogen Metabolism	186
Glial Growth Factors	194
Glial Influence on Synaptic Transmission	201
Glial Ion Homeostasis: A Fluorescence Microscopy Approach	209
Glial Plasticity and Neuroendocrine Regulation	218
Glial Responses to Injury	226
Glial Responses to Virus Infection	233

Glial Steroid Metabolism	242
Glioma	248
Intermediate Filaments	256
Ionic Channels in Glia	262
Macroglial Lineages	273
Microglia Identification Methods	276
Microglia Properties	280
Microglial Response to Injury	287
Myelin: Molecular Architecture of CNS and PNS Myelin Sheath	291
Neuron-Glia pH Regulation	303
Neuron-Glia Coupling in Glutathione Metabolism	312
Neuropeptides and Receptors in Glia	317
Neurotransmitter and Hormone Receptors on Oligodendrocytes and Schwann Cells	326
Neurotransmitter Release from Astrocytes	335
Oligodendrocyte and Schwann Cell Identification Methods	341
Oligodendrocyte Morphology	347
Oligodendrocyte Specification	353
Potassium Homeostasis in Glia	360
Radial Glial Cells: Brain Functions	366
Retinal Glia	373
Schwann Cell Development	381
Schwann Cell Morphology	392
Schwann Cells and Axon Relationship	402
Schwann Cells and Plasticity of the Neuromuscular Junction	407
Transplantation of Myelin Forming Cells	413
Transporter Proteins in Neurons and Glia	425

能量与离子的细胞内调控

Activity-Dependent Regulation of Glucose Transporters	435
Brain Glucose Metabolism: Age, Alzheimer's Disease, and ApoE Allele Effects	440
Brain Injury: Magnetic Resonance Studies of Metabolic Aspects	451
Brain Na,K-ATPase	458
Cell-Cell Communication Through the Extracellular Space	463
Intracellular Calcium and Neuronal Death	473
Mitochondrial Dysfunction in Nervous System Injury	479
Monocarboxylate Transporters	487
Regulation of Cell Volume in Neural Cells	492
原书词条中英对照表	499
