

目 录

细胞兴奋性

Action Potential Initiation and Conduction in Axons	3
Calcium and Signal Transduction.....	10
Calcium Channel and Calcium-Activated Potassium Channel Coupling	16
Calcium Channel Subtypes Involved in Neurotransmitter Release.....	23
Calcium Channels	31
Calcium Channels and SNARE Proteins	39
Calcium Homeostasis in Glia.....	46
Calcium Waves in Glia.....	53
Calcium Waves: Purinergic Regulation	61
Cotransmission	66
Cyclic Nucleotide-Gated and Hyperpolarization-Activated Channels.....	74
Dendritic Signal Integration.....	80
Dorsal Root Ganglion Neurons	88
Glial Influence on Synaptic Transmission.....	93
Glutamate Receptor Clusters: Narp, EphB2 Receptor, Stargazin.....	101
Glutamate Regulation of Dendritic Spine Form and Function	106
Hair Cells: Sensory Transduction	113
Hodgkin-Huxley Models	119
Information Coding.....	127
Inwardly Rectifying Potassium Channels	135
Ion Channel Localization in Axons.....	142
Ion Channel Localization in Cell Bodies and Dendrites	149
Ionic Channels in Glia.....	157
Large Conductance Calcium-Activated Potassium Channels.....	168
Myelin: Molecular Architecture of CNS and PNS Myelin Sheath	177
Neuromodulation of Calcium Channels	189
Neuromodulation of Sodium Channels	197
Neuronal Pacemaking	204
Neurotransmission and Neuromodulation: Acetylcholine.....	214
Potassium Channel Regulation	219
Schwann Cells and Axon Relationship	226

Sodium Channels.....	231
Spike-Timing-Dependent Plasticity (STDP)	238
Spine Plasticity.....	242
Synaptic Transmission: Models.....	249
Transient Receptor Potential (TRP) Channels	258
Two-P-Domain (K _{2P}) Potassium Channels: Leak Conductance Regulators of Excitability	283
Ultrastructural Analysis of Spine Plasticity	297
Voltage Gated Potassium Channels: Structure and Function of Kv1 to Kv9 Subfamilies.....	304
Voltage-Gated Calcium Channels.....	333
Voltage-Gated Potassium Channels (Kv10-Kv12).....	348

神经系统的基因表达与调控

Alternative Splicing in the Nervous System.....	359
Alzheimer's Disease: Molecular Genetics	366
Alzheimer's Disease: Transgenic Mouse Models	369
Aversive Emotions: Genetic Mechanisms of Serotonin.....	374
BAC Transgenesis: Cell-Type Specific Expression in the Nervous System	381
Circadian Gene Expression in the Suprachiasmatic Nucleus.....	390
Clock Gene Regulation of Endocrine Function	398
Clock Genes and Metabolic Regulation	401
Decoding Neuron Transcriptome by SAGE	408
Dendrites: Localized Translation	415
Gene Expression Dysregulation in CNS Pathophysiology	420
Gene Expression in Normal Aging Brain	424
Gene Expression in the Evolution of the Human Brain.....	429
Gene Expression Regulation: Activity-Dependent	436
Gene Expression Regulation: Chromatin Modification in the CNS	441
Gene Expression Regulation: Steroid Hormone Effects	448
Gene Therapy: Direct Viral Delivery.....	455
Gene Therapy: Genetically Modified Cells	462
Genetic Influence on CNS Gene Expression: Impact on Behavior.....	468
Genetic Regulation of Circadian Rhythms in Drosophila	476
Genomic Disorder and Gene Expression in the Developing CNS	483
Genomics of Brain Aging: Apolipoprotein E	489
Genomics of Brain Aging: Nuclear and Mitochondrial Genomes.....	498
Genomics of Brain Aging: Twin Studies.....	505
Hippocampus: Molecular Anatomy.....	513
Hox Genes Expression.....	519

Microarray use for the Analysis of the CNS	530
Molecular Anatomy of the Mammalian Brain.....	537
Neuromuscular Junction: Neuronal Regulation of Gene Transcription at the Vertebrate.....	544
Olfactory Insights from Transcriptional Profiling	553
Pain and Genes	560
Plasticity, and Activity-Dependent Regulation of Gene Expression.....	565
Psychiatric Disorders: Functional Genomics.....	571
Psychiatric Genomics and Expression Profiling.....	577
Single Cell Genomic DNA Analysis.....	583
Sleep and Sleep States: Gene Expression	588
Sox Gene Expression	595
Stress Response: Genetic Consequences.....	602
Thyroid Hormone and Transcriptional Regulation in the CNS.....	611
Transcription and Reward Systems.....	619
Transcription Control and the Circadian Clock.....	627
Transcription Factors in Synaptic Plasticity and Learning and Memory.....	637
Transcriptional Networks and the Spinal Cord.....	649
Transcriptional Silencing.....	655
VelociGene and VelociMouse: High-Throughput Approaches for Generating Targeted Mutations in Mice on a Genome-Wide Scale	661
原书词条中英对照表	669
