1 Stem Cells and Regenerative Medicine—The Evolving Story

1

Introduction 1

The Evolution of Regenerative Medicine 2

Tissue Engineering 3

Nanotechnology 3

Stem Cells in Regenerative Medicine 4

Adult Stem Cells 7

Concluding Remarks 10

Acknowledgements 11

References 11

PART

Embryonic Stem Cells

2 Zebrafish Stem Cells

21

Introduction 21

Protocol for the Initiation and Maintenance of
Zebrafish Primary Embryo Cell Cultures 23

Derivation of Zebrafish ESC Cultures 25

Germ-Line Chimera Production from ES Cell Cultures 26

Homologous Recombination in the Zebrafish ES Cell Cultures 27

Derivation of Zebrafish PGC Culture 31

PGC Isolation 32

Frequency of Zebrafish Germ-Line Chimera Production from PGC Cultures	34
Conclusion	35
Acknowledgements	35
References	36
3 Medaka Stem Cells	40
Introduction	40
Medaka ES Cells	41
Derivation of Medaka ES Cell Cultures	41
Characteristics of Medaka ES Cells	43
Chimera Formation from Medaka ES Cells	44
Medaka Spermatogonial Stem Cells	46
Application and Future Directions of Medaka Stem Cells	49
Acknowledgement	51
References	51
4 Chicken Embryonic Stem Cells as Another Non-Mammalian Embryonic Stem Cell Type	56
Introduction: Totipotency and Pluripotency in Animal Cells	56
Mouse Embryonic Stem Cells as ESC Archetype	57
Pluripotency and Isolation of Embryonic Stem Cells in Birds	58
Biochemical Characterisation	60
In Vitro Differentiation Potentialities	60
Genetic Modification	61
In Vivo Chimerism	62
Germ-line Competency and In Vivo Contribution of cESC	62
Molecular Characterisation of Chicken Pluripotency:	
OCT4 Is also Present in Chicken	65
Presence of Oct4 in Non-Mammalian Species	66
The Nanog Homeodomain Gene Is also Present in Chicken	67
Industrial Interest of Avian Stem Cells	69
Conclusion	70
References	70
5 Derivation, Culture and Genetic Modification of Mouse Embryonic Stem Cells	76
Introduction	76
Derivation of Mouse Embryonic Stem Cells	77

12	Culture of Mouse Embryonic Stem Cells	79
	Properties of Mouse Embryonic Stem Cells	81
	Genetic Modification of Mouse Embryonic Stem Cells	88
	Factors Affecting Homologous Recombination	97
	Future Applications of Mouse Embryonic Stem Cell Technologies	103
	References	106
6	Derivation of Human Embryonic Stem Cells from Blastocysts	120
	Introduction	120
	Cell Differentiation in Embryos	131
	References	135
7	Developing a Serum-free and a Novel Reporter System for hESCs	138
	Introduction	138
	Current hESC Culture Systems	139
	Feeder-free and Serum-free Defined Culture Systems for hESCs	140
	Conclusion	149
	References	149
8	Epigenetics and Embryonic Stem Cells	152
	Introduction	152
	Molecular Mechanisms in Epigenetic: Tagging of Histones	155
	PcG and Stem Cell Maintenance	159
	Molecular Targets of PcG Protein	160
	Conclusion	160
	Acknowledgements	161
	References	162
9	Embryonic Stem Cells as a Therapy for Diabetes	169
	Introduction	169
	Alternative β -Cell Replacement Therapies	172
	Non-Ontogeny-Based Differentiation of ESCs into Insulin-Producing β -Cells	173
	Limitations in Non-Ontogeny Based Differentiation Strategies	175
	The Generation of Definitive Endoderm from Pluripotent Cells	179
	Development of the Primitive Gut Tube from Definitive Endoderm	182
	Production of PDX-1-Expressing Pancreatic Progenitor Cells	183
	Differentiation of Pancreatic Progenitor Cells to Endocrine Cells	186
	Endocrine Cell Specification to Mature Insulin-Producing β -Cells	188

Other Approaches to Embryonic Stem Cell Differentiation into Insulin-Producing β -Cells	189
The Future	190
Conclusion	192
Acknowledgements	193
References	193
10 Manipulation of Biomaterial Interface by Biomimetic Strategies: Possibilities of Exploring Stem Cells	200
Introduction	200
Stem Cells: Origin and Exploration for Tissue Engineering and Regenerative Medicine	203
Inflammation at an Implant Site	202
Stem Cell Behavior in Relation to Inflammatory Response	203
Stem Cells and Chronic Inflammation	205
Stem Cells and Controlled Differentiation	205
Stem Cells and Engraftment	205
Stem Cells and Angiogenesis	206
Stem Cell Behavior in Relation to Immune Response	206
Modulating Immune Response a Lesson from Fetal Engraftment	207
Surface the Culprit	208
Stem Cell Interaction with Biomaterials	208
Biomimetic Approaches in Surface Modification using Dense Thin Solid Films	209
Optimization of Heterogeneous Biomimetic Lipid Composition	210
Stem Cell Adhesion and Proliferation Studies	210
Conclusion	211
Acknowledgements	211
References	211
11 Immunomodulatory Aspects of Human Embryonic and Adult Stem Cells	215
Introduction	215
Transplantation Immunology: Rejection Issues	216
Transplanting Adult Stem Cells	221
Mesenchymal Stem Cells	222
Transplanting Allogeneic Embryonic Stem Cells	224
Strategies for Generating Autologous ES Cells	226
Conclusion	237
References	238

12 Human Embryonic Stem Cells as a Model System to Study Human Genetics	244
Introduction	244
Human Embryonic Stem Cells	245
Differentiating hESCs as a Model System to Study Embryogenesis	245
Derivation of Mutant hESC Lines	247
Nuclear-Transfer-Derived Embryos	251
Transcription-Factor-Induced Pluripotent Stem Cells	251
Potential Applications and Future Goals	252
Summary	257
References	257
13 Germ Cells and Artificial Gametes Production from Embryonic Stem Cells	262
Introduction	262
Gametes Derived from Embryonic Stem Cells	270
Are Artificial Gametes Functional?	275
Benefits of ESC-Derived Gametes	276
Conclusion	276
Acknowledgements	277
References	277
14 Using Embryonic Stem Cells to Introduce Mutations into the Mouse Germ Line: Animal Models and Future Applications	281
Introduction	281
Escs Can be Genetically Manipulated	282
Using Escs to Study Embryonic Development via Random Transgenesis	283
Escs as Cellular Models in Developmental Biology and Pathology	290
Conclusion	291
References	292
15 Application of Human Embryonic Stem Cells in Drug Discovery	293
Introduction	293
Isolation, Propagation and Characterization of hESCs	295
Spontaneous Differentiation of hESCs	296
Drawbacks with hESCs in Regenerative Medicine	297
hESCs in Drug Discovery and Development	297
Developmental Toxicity	299

Measurement Criteria	300
Differential Gene Expression during EB Development	300
Cytotoxicity	300
Role of Genetically Modified hESCs in toxicity screening	300
Application for Cardiomyocytes Derived from hESCs	301
Cardiomyocytes: Derivation and Characteristics	302
Cardiomyocytes: Safety Pharmacology and Discovery of Novel Drug Targets	302
Application for Hepatocytes Derived from hESCs	304
Hepatocytes: Derivation and Characteristics	304
Hepatocytes: Studies of Drug Metabolism and Drug-Induced Hepatotoxicity	306
Conclusion	307
References	308

2

Adult Stem Cells

16 Recent Advancements on Tissue-Resident Adult Stem/Progenitor Cell Biology and Their Therapeutic Applications in Regenerative Medicine and Cancer Therapies	319
Introduction	319
Phenotypic and Functional Properties of Adult Stem/Progenitor Cells	322
Implication of Adult Stem/Progenitor Cell Dysfunctions in Disease Development	326
Tissue-Resident Adult Stem/Progenitor Cell Types and their Therapeutic Applications	327
Conclusion	339
Abbreviations	340
Acknowledgements	340
References	340
17 Mesenchymal Stem Cells and their Therapeutic Potential in the Nervous System	358
Introduction	358
Potential Therapeutic Applications of MSCs	365
MSC-based Therapy in the Treatment of Osseous and Adipose Tissue Defects	366
MSC-based Therapy in the Treatment of Neurological Deficits	367

Mechanisms by which Transplanted MSCs Elicit Recovery in the Damaged Nervous System	370
<i>In Vitro</i> 'Trans'-Differentiation of MSCs into Neural Cell Types	370
<i>In Vitro</i> 'Trans'-Differentiation of into Neural Cell Types—An Artifact of Cell Culture	372
<i>In Vivo</i> 'Trans'-Differentiation of MSCs into Neural Cell Types	375
Spontaneous Cell Fusion of MSCs with Host Neural Cells	377
MSCs as Trophic Mediators of Neural Differentiation	377
Secretion of Neurotrophic Factors by MSCs	378
Secretion of Non-Neurotrophic Factors by MSCs	380
Analysis of MSC-derived Soluble Factors <i>In Vitro</i> :	
A Conditioned Media Approach	381
References	383
18 Mesenchymal Stem Cells: Biology, Culture Optimization and Potential Clinical Use	391
Introduction	391
Historical Background	392
MSC are Present in all the Tissues	392
MSC Niche	393
Optimal Culture Conditions and Up-Scaling	395
Phenotypic Properties of MSC	398
Immunogenicity of MSC	400
Immunomodulatory Properties of MSC	401
MSC Facilitate Tissue Repair	401
MSCs for Clinical Application	403
Conclusion	404
References	405
19 Mesenchymal Stem Cells: Culture, Characterization and Therapeutic Applications in Neurodegenerative Diseases	411
Introduction	411
Isolation and Culture of Rat MSCs	412
Characterization of MSCs	413
Transplantation of MSCs for CNS Repairs	413
Effects of MSCs Transplantation in the Central Nervous System	418
Discussion	421
Conclusion	421

<i>Acknowledgements</i>	422	
<i>References</i>	422	
20 Dental Pulp Stem Cells and Perspectives of Future Application in Cell Therapy		420
Introduction	426	
Isolation of Stem Cells from Dental Pulp	427	
Tissue Processing, Expansion in Culture and Dental Pulp Cell Banking	432	
<i>In Vitro</i> Differentiation Assays	434	
<i>In Vivo</i> Differentiation Assays	434	
Conclusion	437	
Glossary	438	
<i>Acknowledgements</i>	438	
<i>References</i>	438	
21 Hematopoietic Stem Cells and Their Dynamics		442
Introduction	442	
Evidence for Hematopoietic Stem Cells	442	
Properties of Hematopoietic Stem Cells	443	
Sources of Hematopoietic Stem Cells	445	
The Stem Cell Niche	446	
How Many Stem Cells	447	
Expansion of the HSC During Human Ontogeny	448	
Stem Cell Aging/Clonal Succession	449	
Stochastic Dynamics within the HSC Pool	450	
Symmetry of Stem Cell Replication and Fitness	454	
Stem Cell Pool, Longevity and Cancer	456	
Inherited and Acquired Hematopoietic Stem Cell Disorders	458	
Acquired Hematopoietic Stem Cells Disorders with CML and PNH as Prototypes	459	
Future Developments	462	
<i>Acknowledgements</i>	464	
<i>References</i>	464	
22 Spermatogonial Stem Cells		473
Introduction	473	
Basic Principles and Jargons Related to Spermatogonial Stem Cells	474	
Testicular Compartment and Cellular Interaction	475	
Proliferation and Differentiation of SSCs	476	

Regulation of SSCs Development	479
Current Status of the Research	483
Markers Express on SSCs during Their Development	484
Future Applications and Caution	489
Conclusions	490
References	490
23 Epigenetics as a Cause for the Eloquent Silence of Stem Cells	505
Introduction	505
What Is Epigenetics?	505
Stark Examples of Epigenetic Phenomena in Biology	507
Markers of Epigenetic Imprint	511
Cellular Memory Modules	516
Epigenetic Regulators of Stem Cell Pluripotency	529
Epigenetics: A Trail from Stem Cells to Cancer	534
Acknowledgements	537
References	537
24 Cancer Stem Cells: The Enemy within Cancers	551
Introduction to Cancer	551
Clonality in Cancer	554
Cancer Heterogeneity	555
Stochastic and Hierarchy Models	559
Stem Cells and Hierarchy	559
Cancer Stem Cells	561
Techniques used to Isolate CSCs	562
Techniques used to Assess CSCs	574
Identification and Isolation of CSCs from Solid Tumours	580
CSCs and Metastasis	583
Cell of Origin of CSC	585
Therapeutic Implications of CSCs	586
Future Directions	592
Definitions of Important Terms	593
References	595
25 Exploring the Potential of Adult Stem Cells: Why Umbilical Cord Blood?	603
Introduction	603
Umbilical Cord Blood: An Important Source of Stem Cells	603

Umbilical Cord Blood Stem Cells and Transplants	604
General and Ethical Topics about UCB Banking	605
Umbilical Cord Blood as a Source of Mesenchymal Stem Cells	606
Umbilical Cord Derived Stem Cells for Tissue Therapy: Current and Perspectives	608
References	613
26 Cell Therapy and Tissue Engineering Strategies in Regenerative Medicine	617
Introduction	617
The Basic Components of Tissue Engineering	618
Tissue Engineering of Specific Tissues and Organs	625
Other Emerging Technologies	633
Conclusion	636
Acknowledgement	637
References	637
27 Biomaterials for Enhancing Corneas and Spinal Cord Regeneration	645
Introduction	645
Models of the Nervous System	648
Corneal Substitutes	652
Spinal Cord Repair and Regeneration	658
Conclusions	661
References	662
Index	669
