Preface	v
Contributors	ix
1 Molecular Methods to Study Complex Microbial Communities	1
<i>José M. Vieites, Maria-Eugenia Guazzaroni, Ana Beloqui, Peter N. Golyshin, and Manuel Ferrer</i>	
2 Construction of Small-Insert and Large-Insert Metagenomic Libraries	39
<i>Carola Simon and Rolf Daniel</i>	
3 Construction and Screening of Marine Metagenomic Libraries	51
<i>Nancy Weiland, Carolin Löscher, Rebekka Metzger, and Ruth Schmitz</i>	
4 Metagenomic Analysis of Isotopically Enriched DNA	67
<i>Yin Chen, Josh D. Neufeld, Marc G. Dumont, Michael W. Friedrich, and J. Colin Murrell</i>	
5 Wide Host-Range Cloning for Functional Metagenomics	77
<i>Margaret Wexler and Andrew W.B. Johnston</i>	
6 Cloning and Expression Vectors for a Gram-Positive Host, <i>Streptomyces lividans</i>	97
<i>Kristof Vrancken, Lieve Van Mellaert, and Jozef Anné</i>	
7 Heterologous Gene Expression in the Hyperthermophilic Archaeon <i>Sulfolobus solfataricus</i>	109
<i>Angel Angelov and Wolfgang Liebl</i>	
8 Novel Tools for the Functional Expression of Metagenomic DNA	117
<i>Sonja Christina Troeschel, Thomas Drepper, Christian Leggewie, Wolfgang R. Streit, and Karl-Erich Jaeger</i>	
9 Screening of Functional Promoter from Metagenomic DNA for Practical Use in Expression Systems	141
<i>So-Youn Park and Geun-Joong Kim</i>	
10 Substrate-Induced Gene Expression Screening: A Method for High-Throughput Screening of Metagenome Libraries	153
<i>Taku Uchiyama and Kentaro Miyazaki</i>	
11 Screens for Active and Stereoselective Hydrolytic Enzymes	169
<i>Dominique Böttcher, Marlen Schmidt, and Uwe T. Bornscheuer</i>	
12 Screening for Cellulase-Encoding Clones in Metagenomic Libraries	177
<i>Nele Ilmberger and Wolfgang R. Streit</i>	
13 Screening Metagenomic Libraries for Laccase Activities	189
<i>Manuel Ferrer, Ana Beloqui, and Peter N. Golyshin</i>	
14 Screening for N-AHSL-Based-Signaling Interfering Enzymes	203
<i>Phil M. Oger and Stéphane Uroz</i>	

15	Identification of Molecular Markers to Follow Up the Bioremediation of Sites Contaminated with Chlorinated Compounds	21
	<i>Massimo Marzorati, Annalisa Balloi, Francesca De Ferra, and Daniele Daffonchio</i>	
16	Methods for the Isolation of Genes Encoding Novel PHB Cycle Enzymes from Complex Microbial Communities	23
	<i>Ricardo F. Nordeste, Maria A. Trainer, and Trevor C. Charles</i>	
17	Metagenomic Approaches to Identify and Isolate Bioactive Natural Products from Microbiota of Marine Sponges	24
	<i>Cristian Gurgui and Jörn Piel</i>	
18	Screening for Novel Antibiotic Resistance Genes	26
	<i>Mindy G. Brown, Elizabeth H. Mitchell, and David L. Balkwill</i>	
19	Novel Metal Resistance Genes from Microorganisms: A Functional Metagenomic Approach	27
	<i>José E. González-Pastor and Salvador Mirete</i>	
20	Retrieval of Full-Length Functional Genes Using Subtractive Hybridization Magnetic Bead Capture	28
	<i>Tracy Meiring, Inonge Mulako, Marla I. Tuffin, Quinton Meyer, and Donald A. Cowan</i>	
21	Detection and Isolation of Selected Genes of Interest from Metagenomic Libraries by a DNA Microarray Approach	29
	<i>Gopal P. Pathak and Wolfgang Gärtner</i>	
22	Application of DNA Microarray for Screening Metagenome Library Clones	31
	<i>Soo-Je Park, Jong-Chan Chae, and Sung-Keun Rhee</i>	
23	<i>MetaGenomeThreader</i> : A Software Tool for Predicting Genes in DNA-Sequences of Metagenome Projects	32
	<i>David J. Schmitz-Hübsch and Stefan Kurtz</i>	
	<i>Index</i>	33
