

VII	<i>Prologue</i> <i>Yiyu Chen</i>
-----	-------------------------------------

I Introductions

3	<i>Opening Speech</i> <i>Zhihong Xu</i>
5	<i>Congratulation from MOST of China</i> <i>Xian'en Zhang</i>
7	<i>Welcome Speech</i> <i>Yi Rao</i>

II Contributed Essays

10	<i>Investigating Evolutionary Radiations</i> <i>Michael J. Benton</i>
28	<i>The Earliest Arthropods and Other Animals</i> <i>Jan Bergström</i>
44	<i>Mutationism and the Reproductive Struggle: A Fresh Evolutionary Synthesis beyond Neodarwinism</i> <i>Thomas Cavalier-Smith</i>
60	<i>Ascent with Modification: Fossil Fishes Witnessed Their Own Group's Adaptation to the Uplift of the Tibetan Plateau during the Late Cenozoic</i> <i>Mee-mann Chang, Desui Miao, Ning Wang</i>
76	<i>Dynamic Genome Evolution of <i>Oryza</i> – A Genus-Wide Comparative Analysis</i> <i>Mingsheng Chen, Fei Lu, Scott A. Jackson, Rod A. Wing</i>
84	<i>Evolution: The Most Important Theory in Biology</i> <i>Douglas J. Futuyma</i>
102	<i>Whole-Genome Based Prokaryotic Branches of the Tree of Life</i> <i>Bailin Hao</i>
114	<i>The Great Ordovician Biodiversification Event: Finding a Context</i> <i>David A.T. Harper</i>
126	<i>Recent Speciation of Cyprinid Fishes in East Asia Revealed by Molecular Phylogenetics</i> <i>Xuzhen Wang, Xiaoni Gan, Shunping He</i>

- 134 **Evolution of Cis-Regulatory Modules**
Bin He, Martin Kreitman
- 150 **Natural Selection in New Gene Evolution**
Manyuan Long, Maria Vibranovski, Yong Zhang
- 162 **Evolutionary Development and Homoplasy of the Middle Ear in Early Mammal Evolution**
Zhe-Xi Luo
- 180 **The Nearly Neutral Theory of Molecular Evolution**
Tomoko Ohta
- 190 **On Alternation of Generations in Embryophytic Plants**
Hilary A. McManus, Yin-Long Qiu
- 202 **The Effects of Flower Color Transitions on Diversification Rates in Morning Glories (*Ipomoea* subg. *Quamoclit*, Convolvulaceae)**
Stacey D. Smith, Richard E. Miller, Sarah P. Otto, Richard G. FitzJohn, Mark D. Rausher
- 228 **Evolutionary Theory and the Problem of Change: A Historical Perspective**
Olivier Rieppel
- 240 **On the Origin of New Genes**
Wen Wang
- 252 **Timing and Modes of Evolution of Eastern Asian – North American Biogeographic Disjunctions in Seed Plants**
Jun Wen, Stefanie Ickert-Bond, Ze-Long Nie, Rong Li
- 270 **The Great Ordovician Biodiversification in South China: A Synopsis**
Renbin Zhan, Jianbo Liu
- 286 **A Neglected Dimension of Evolution and the Origin of Species**
De-Xing Zhang
- 304 **Positive Darwinian Selection in Gene Evolution**
Jianzhi Zhang
- 326 **On Some Examples of Missing Links – Perspectives from Fossil Evidence in China**
Zhonghe Zhou

III Abstracts of Oral Presentations

- 338 **Darwin's Headache, Caused by the Cambrian Explosion**
Stefan Bengtson
- 338 **Darwin and the Tree of Life**
Michael J. Benton
- 339 **The Earliest Arthropods and Other Animals**
Jan Bergström
- 339 **The Eukaryote Tree: Deep Phylogeny and the Evolution of Protist Body Plans**
Thomas Cavalier-Smith

- 340 Dynamic Genome Evolution of the *Oryza* Genomes
Mingsheng Chen
- 340 Deep Root of the Modern Animal Diversity
Junyuan Chen
- 341 Darwin and the Dinosaurs
Philip J. Currie
- 342 Global Biogeographic Patterns in “Higher Landbirds”
Per Ericson
- 342 The Genetic Architecture of a Complex Trait:
What Evolutionary Biology Can Tell Us about Genome-Wide Association Studies
Adam Eyre-Walker
- 342 Giant Panda Genomic Data Provide Insight into the Birth-and-Death Process
of Mammalian Major Histocompatibility Complex Class II Genes
Shengguo Fang
- 343 Early Cretaceous Flowers and the Darwin Mystery
Else Marie Friis, Kaj Raunsgaard Pedersen, Peter R. Crane
- 344 Evolution: The Most Important Theory in Biology
Douglas J. Futuyma
- 344 Whole-Genome Based Prokaryotic Branches of the Tree of Life
Bailin Hao
- 345 The Great Ordovician Biodiversification Event (GOBE):
Causes and Consequences of Diversity’s Big Bang
David A.T. Harper
- 345 The Fast Speciation of Cyprinid Fish in Eastern Asia
Revealed by Molecular Phylogenetic Study
Shunping He
- 346 Evolution of the Regulatory Network for Floral Development
Hongzhi Kong
- 346 Linking Darwinian Mechanisms with the Evolution of Form
Marty Kreitman
- 347 Some Problems in Biogeographic Studies in China
Dezhu Li
- 348 The Pattern of New Gene Evolution Shaped by Darwinian Selection
Manyuan Long
- 348 Asymmetry in the Strength of Sexual Antagonism in XY vs. ZW Systems
– Evidence from Whole-Genome Expression
Xuemei Lu
- 349 Development and Evolution of the Mammalian Ears
Zhe-Xi Luo
- 350 The Evolution of Mammalian Brain – from Darwin’s
The Origin to the New Evidence of Mesozoic Mammals
Jin Meng

- 352 Microevolutionary Processes and Macroevolutionary Patterns of Diversification
in Cichlid Fishes: Lessons from Extremely Young Species Flocks
Axel Meyer
- 352 The Nearly Neutral Theory of Molecular Evolution
Tomoko Ohta
- 353 Evolution of Life Cycle in Land Plants
Yin-Long Qiu
- 354 Are Certain Types of Mutation Used Preferentially in Evolutionary Change?
Mark Rausher
- 354 The History of Evolutionary Thought
Olivier Rieppel
- 355 Unique Genetic Behavior of Nucleotide Insertion/Deletion in Living Organism
Dacheng Tian
- 355 Constraints on Multivariate Evolution
Bruce Walsh
- 356 Phylogeography of Plants in the Qinghai-Tibetan Plateau
Xiaoquan Wang
- 356 Origin and Functions of New Genes
Wen Wang
- 357 Early Diversification of Vascular Plants – Evidence from South China
Deming Wang
- 357 Giant Panda: The Evolutionary Dead-End?
Fuven Wei
- 358 Darwin and Biogeography
Jun Wen
- 358 Comparative Genomics and the Aftermath of Ancient Polyploidization
Kenneth H. Wolfe
- 359 Genes and Speciation – 150 Years of Darwin and (nearly) 150 Years of Mendel
Chung-I Wu
- 359 On the Eve of the Cambrian Animal Radiation: The Ediacaran Fossil Record and
Its Implications for the Early Evolution of Complex Life Forms and Ecosystems
Shuhai Xiao
- 360 The Evolution of Theropod Hand
Xing Xu
- 361 Calibrating the Molecular Clock to Date Species Divergences
Ziheng Yang
- 361 QTL Mapping and Genetics Basis of Adaptation
Zhaobang Zeng
- 361 The Great Ordovician Biodiversification in South China: A Synopsis
Renbin Zhan, Jianbo Liu

- 363 Domestications of Animals in East Asia
Ya-Ping Zhang
- 364 Gene Expression Noise and Evolution
Jianzhi Zhang
- 364 Origin and Early Diversification of Jawed Vertebrates
Min Zhu

IV Selected Photos of the Conference

- 366 Group
- 368 Orgnizers
- 369 Presentation
- 377 Discussion
- 381 *Epilogue*
