

VOLUME - 10

CONTENTS

Preface

v

Contributors

xi

Section I:

Molecular Physiology of Stress Response in Plants

- 1 The Role of Flavonoids in Plant Resistance to Abiotic Stress
— Iker Hernández, Leonor Alegre, Sergi Munné-Bosch 1
- 2 Plasma Membrane-Associated Signaling Proteins in The Absciscic Acid Response Network
— Zhi-Liang Zheng and Zeyu Xin 17
- 3 Plant Secondary Metabolism in Response to the Environment
— L. V. Astarita and E.R. Santarém 31
- 4 Chickpea : Impact of drought and temperature on physiological traits and yield
— Tejpal Singh and P.S. Deshmukh 91
- 5 Salt Stress Tolerance in Crop Plants: Molecular and Physiological Considerations
— P. Agarwal 119
- 6 Mechanism of Aluminium Toxicity and Tolerance in Higher Plant
— Pallavi Sharma and R. S. Dubey 145
- 7 Symbiotic Nitrogen Fixation and the Environmental Constraints
— Neera Garg and Ranju Singla 181
- 8 Oxidative Damage and Oxygen Deficiency Stress
— A. Hemantaranjan, Savita Thakur, Sunil K. Pandey, Zaffar M. Dar, and S. K. Bansal 203

Section II:

Physiology of Germination and Dormancy

- 9 The Physiology of Dormancy of Onion Bulb *Allium cepa*
— Nouredine Benkeblia 233

- 10 Germination: A Crucial Step in Plant Growth 245
 — G. Gavazzi, M. Cocucci, G. Consonni, M. Lucchin, R. Masin,
 N. Negrini and G. Zanin

Section III:
Plant Growth Regulators: Somatic Embryogenesis

- 11 Role of Polyamines during Somatic Embryogenesis 275
 — P.K. Nagar and Madhu Sharma

Section IV:
Molecular Physiology and Biotechnology of Flowering

- 12 Crossroads of Floral Development: Plant Hormone Interactions during Flower Organ Identity and Development in Arabidopsis 295
 — Elisson Romanel, Érica Duarte Silveira,
 Marcelo Carnier Dornelas, and Márcio Alves-Ferreira

Section V:
Recent Advances in Mineral Nutrition Research

- 13 Cellular Boron: So Many Interactions for Such A Few Roles? 319
 — Georgios Liakopoulos, Sotiria Stavrianakou and George Karabourniotis
- 14 Molecular Approach for Enhanced Iron Acquisition to Sustain Crop Productivity under Calcareous Soils 337
 — K. Singh, Yogeshwar Singh, Rajput Pankaj Kumar and S. Mori
- 15 Vanadium in Plants, Fungi, and Bacteria: Structural Aspects and Functions 357
 — Enrique J. Baran
- 16 Metallo-enzymes in Nutrient Constraints Diagnosis in Citrus : Emerging Trends 373
 — A.K.Srivastava, Shyam Singh and Pauline Alila

Section VI:
Molecular Plant Physiology and Metabolism

- 17 Localization of Lipxygenases in Higher Plants 391
 — Ewa Szczuka and Ewa Skórzyńska-Polit
- 18 Genetic Regulation of Signal Transduction Pathways in Rhizobium-Legume Symbiosis 401
 — Neera Garg, Jasleen Kaur, Ranju Singla and Geetanjali
- 19 Importance of Assay of Maximum Catalytic Activity of Enzymes from Plants and their Role in Regulation of Metabolism 411
 — Padmanabh Dwivedi

Section VII:
Plant Organic Acids

- 20 Chlorogenic Acids: Diversity in Green Beans of Wild Coffee Species 421
— *Campa Claudine, Rakotomalala Jean-Jacques R.,
de Kochko Alexandre, Hamon Serge*

Section VIII:
Plant Physiology in Sustainability of Agriculture

- 21 Mycorrhizal Technology in Sustainable Development of Stressed Ecosystems 441
— *Richa Raghuwanshi and Kavita Shah*
- 22 Effects of Gibberellic Acid and Sulphur on Yield Efficiency of Mustard 455
— *Nafees A. Khan, Mohammad Mobin and Sarvajeet Singh*
- INDEX 465
