

Contents

SECTION 1: METHODOLOGY

1. Wild Species of *Oryza* as an Important Reservoir for Mining of Useful Alleles 3
Sung Ki Cho, Young Soo Chung and Jeong Sheop Shin
2. Plant Genetic Transformation: Methods and Emerging Trends 16
M. Sujatha and V. Dinesh Kumar
3. The Engineering of Recombinant Plastids in Higher Plants 36
Manuel Dubald, Ghislaine Tissot, Nathalie Dufourmantel and Fabien Gontorbe
4. Inducible Gene Expression Systems as Tools for Plant Functional Genomics 60
Wei Tang and Ronald J. Newton
5. Gene Targeting in Higher Plants 78
Dipty Shrivastava, P.C. Sharma and P. Ananda Kumar
6. State-of-the-art Genome Profiling (GP): A Key Tool for Plant Biotechnology 93
Manish Biyani
7. Applications of Gene Silencing in Crops 105
Mohd. Ashraf Ashfaq, V. Dinesh Kumar and M. Sujatha

SECTION 2: PHYSIOLOGY, TISSUE CULTURE, MICROPROPAGATION

8. Effect of Brassinolide on Growth, Yield, Metabolite Content and Enzyme Activities of Tomato (*Lycopersicon esculentum* Mill.) 133
B. Vidya Vardhini, S. Seeta Ram Rao and K.V.N. Rao
9. Ornamental Foliage Plants: Improvement through Biotechnology 140
Jianjun Chen and Richard J. Henny
10. *In vitro* Propagation of Tropical and Sub-Tropical Fruit Crops 157
S.K. Singh and R.N. Khawale

11. <i>In vitro</i> Plantlet Regeneration in <i>Asparagus racemosus</i> through Shoot Bud Differentiation on Nodal Segments <i>Asbwani Kumar and Neetu Vijay</i>	185
12. Micropropagation of Ringal Bamboo <i>Drepanostachyum falcatum</i> (Nees) Keng. F. through Nodal Segments <i>I.D. Arya, Reetu Sharma and Sarita Arya</i>	198
13. Isolated Microspore Embryogenesis in Cereals: Aspects and Prospects <i>Archana Chugh and François Endes</i>	205
14. Plant Regeneration from Cell Suspension Culture-Derived Protoplasts of <i>Phellodendron amurense</i> Rupr. <i>Mustafa Abul Kalam Azad, Shinso Yokota, Futoshi Ishiguri, Shoji Yabara and Nobuo Yoshizawa</i>	227
15. Importance of Micropropagation Technique in Enhancing the Productivity of Crops <i>Sanjay Saccena</i>	245
SECTION 3: PLANT TRANSFORMATION	
16. High Efficiency Transformation in <i>Artemisia annua</i> with <i>Agrobacterium tumefaciens</i> <i>Maumita Bandyopadhyay and Sumita Jha</i>	259
17. Genetic Improvement of Castor (<i>Ricinus communis</i> L.) through Tissue Culture and Biotechnological Tools <i>M. Sujatha</i>	278
18. Genetic Engineering of Orchids <i>Kei-Ichiro Mishiba, Dong Poh Chin and Masahiro Mii</i>	288
19. Identity Preservation in Genetically Modified Crops <i>Ketan M. Doshi and François Endes</i>	303
20. Enhanced Production of Recombinant Proteins from Plant Cells <i>Ryan G. Soderquist and James M. Lee</i>	330
21. Bioengineering of Crops for Biofuels and Bioenergy <i>Asbwani Kumar</i>	346

SECTION 4: STRESS TOLERANCE

22. Light and Dark Modulation of Chlorophyll Biosynthetic Genes in Response to Temperature 361
Sasmita Mohanty and B.C. Tripathy
23. Glutathione Homeostasis and Abiotic Stresses in Plants: Physiological, Biochemical and Molecular Approaches 373
Bhumesb Kumar, Sneb Lata Singla-Pareek and Sudhir K. Sopory
24. Signaling Components in Programmed Cell Death: Molecular and Functional Similarities between Animals and Plants 391
Gobar Taj, Anil Kumar, K.C. Bansal and G.K. Garg
25. Regulation of Stomatal Opening and Signal Transduction Components in Guard Cells 410
Venkat Apparao Kolla and A.S. Raghavendra
26. Designing New Plant Genotypes with Enhanced Resistance to Salinity 428
H.W. Koyro and B. Huchzermeyer
27. Defense Response of Moth Bean (*Phaseolus aconitifolius*) to *Macrophomina phaseolina*: Role of Polyphenols, PAL and α -1,3-glucanase 452
Indu Ravi and Vinay Sharma
28. Host-Pathogen Interaction in *Sesamum indicum*: Synthesis of PR-Proteins 466
Anubhuti Sharma, Ashok Munjal, Nilima Kumari and Vinay Sharma
29. *Allium sativum* Leaf Lectin: A Potent Sap Feeding Insect Control Protein Expressed in Rice and Mustard 477
Prasenjit Saha, Indrajit Dutta, Santanu Banerjee and Sampa Das
30. Genetic Engineering: A Powerful Tool to Combat Viral Diseases of Plants 487
Anupam Varma and Shelly Praveen

SECTION 5: BIOTECHNOLOGY OF MEDICINAL PLANTS

31. Molecular Tools in Medicinal Plants: A Review 505
Gayatri K. Vaidya and Vincent J. Braganza S.J.
32. Forskolin Biosynthesis and Invertase Activity in *Agrobacterium rhizogenes* Mediated Transformed Roots of *Coleus forskohlii* 517
A.K. Kukreja and Shilpi Garg

33. A Novel Source for Furanocoumarins: <i>Ruta graveolens</i> L. <i>Renuka Diwan and Nutan Malpathak</i>	534
34. Antioxidant Potential of Plants and their Impact on Human Health <i>Nilesh Kumar Sharma, Sreela Dey and Ramasare Prasad</i>	564
35. Arabinogalactan and Arabinogalactan-Protein Complexes (AGPs): A Natural Plant Derived Macromolecule of Therapeutic Importance <i>Ramasare Prasad, Seema Parveen and Ashish Deep Gupta</i>	582
36. Transgenics of Some Medicinal Plants <i>P.S. Srivastava, Sudhir K. Sopory, M.V. Rajam, Alka Narula, Toolika Srivastava and Sandip Das</i>	594
37. <i>In vitro</i> Regeneration of a Rare Medicinally Potent Plant of Eastern Himalayan Hotspot <i>Pratibha Sharma and C.M. Sarma</i>	604
38. A Comparative Study of Growth Kinetics in Hairy Root Cultures of <i>Solanum khasianum</i> Clark Grown in Shake Flasks and Bioreactors <i>A. Jacob, N.P. Malpathak, G. Sudha and G. A. Ravishankar</i>	610
39. Micropropagation and Alkaloid Production through Somatic Embryo Cultures of <i>Corydalis</i> <i>Noboru Hiraoka and Indra Dutt Bhatt</i>	622
40. Biotechnological Approach on Production of Ginkgolides from Cell Cultures of <i>Ginkgo biloba</i> L. <i>Seung Mi Kang, Young Min Kang and Myung Suk Choi</i>	631
41. Applications of Biotechnology in Indian Ginseng (Ashwagandha): Progress and prospects <i>Mallubhotla Sharada, Ashok Abuja and Suraj Prakash Vij</i>	645
42. Prospects of Ephedrine in the Desert Plants of Rajasthan <i>Rita Singh, Prabha Sharma and P. Radha</i>	668
43. Ayurvedic Medicines: Some Potential Plants for Medicine from India <i>Ashwani Kumar</i>	680
