iii	Foreword
iv	Abstract
v	Acknowledgements
ix	Acronyms
x	Executive Summary

PART ONE

CLASSIFICATION CONCEPTS

	1. INTRODUCTION
	2. DEFINITIONS
3	2.1 Land Cover
3	2.2 Land use
3	2.3 Classification and Legend
4	2.4 Hierarchical versus Non-Hierarchical Systems
5	2.5 <i>A priori</i> and <i>A posteriori</i> Systems
	3. THE CONCEPTUAL BASIS
7	3.1 Problems with current classification systems
7	3.1.1 Purpose
8	3.1.2 Consistency
8	3.1.3 Underlying common principle
10	3.1.4 <i>A priori</i> classification systems
11	3.2 The basis for a new approach
11	3.2.1 Definition adopted for land cover
12	3.2.2 New approach to classification
13	3.2.3 Land Cover Classification System design criteria
14	3.2.4 Dichotomous Phase
14	3.2.5 Modular-Hierarchical Phase
20	3.3 Working with the LCCS Mode Function
25	3.4 Concepts for <i>Primarily Vegetated Areas</i>
26	3.4.1 Natural and Semi-Natural Vegetation (A12 and A24)
34	3.4.2 Cultivated and Managed Terrestrial Areas (A11 and A23)
38	3.5 Classification Concepts for <i>Primarily Non-Vegetated Areas</i>
38	3.5.1 Artificial Surfaces and Associated Areas (B15)
39	3.5.2 Bare Areas (B16)
40	3.5.3 Artificial and Natural Waterbodies, Snow and Ice (B27 and B28)
41	3.6 Environmental and Specific Technical Attributes
41	3.6.1 Environmental Attributes
43	3.6.2 Specific Technical Attributes
43	3.7 The Advantages of the Method Adopted
43	3.7.1 Advantages from the conceptual point of view
44	3.7.2 Advantages from the practical point of view
46	3.8 From Classification To Legend
46	3.8.1 The Minimum Mappable Area concept
47	3.8.2 The Occurrence of Mixed Mapping Units

PART TWO

LAND COVER CLASSIFICATION SYSTEM: USER MANUAL

	4. INSTALLATION
51	4.1 Minimum system requirements
52	4.2 Installation procedure
52	4.3 Directory structure
	5. OPERATION
53	5.1 Selection techniques
53	5.2 Screen objects
	6. THE PROGRAM MODULES
57	6.1 Classification Module
57	6.1.1 Purpose
57	6.1.2 Dichotomous Phase
59	6.1.3 Modular-Hierarchical Phase
65	6.2 Legend Module
65	6.2.1 Purpose
65	6.2.2 How to create a legend
67	6.2.3 Using the Legend Management Menu
76	6.3 Translator Module
76	6.3.1 Purpose
76	6.3.2 How to translate a classification or legend
80	6.3.3 Comparison of External Classes
83	6.3.4 Comparison of Two LCCS Classes
83	6.3.5 Export table/Import table
85	6.4 Links Function
85	6.4.1 Purpose
85	6.4.2 Links Management Menu
87	6.4.3 How to create a link
90	6.5 Close
91	REFERENCES
95	APPENDIX A: Glossary of classifiers, modifiers and attributes
155	APPENDIX B: Presentation of major land cover categories
175	APPENDIX C: Overview of environmental attributes of each land cover type
181	APPENDIX D: Translator module – comparison and similarity assessment values
189	APPENDIX E: Development teams for versions 1 and 2
