

Contents

Preface	vii
Foreword	xiii
Part 1. System Biology Lessons for Stem Cells	1
Chapter 1. Computational Modeling of Biochemical Processes and Cell Differentiation	3
<i>Max Floettmann, Till Scharp, and Edda Klipp</i>	
Chapter 2. Heterogeneity and Flexibility of Stem Cell Fate Decisions — A Conceptual Perspective	31
<i>Ingmar Glauche and Ingo Roeder</i>	
Chapter 3. Comparative Transcriptomics for Global Functional Profiling of Embryonic Stem Cells	63
<i>Yu Sun and Ming Zhan</i>	
Chapter 4. A Common Integrative Nuclear Signaling Module for Stem Cell Development	87
<i>Michal K. Stachowiak, Ewa K. Stachowiak, John M. Aletta, and Emmanuel S. Tzanakakis</i>	
Part 2. From Mechanisms to Enabling Technologies for Stem Cells	133
Chapter 5. Generation, Characterization and Propagation of Human-Induced Pluripotent Stem Cells	135
<i>Sheena Abraham, Marion J. Riggs, Ena Xiao, Khaled Alsayegh, Venkat Gadepalli, and Raj R. Rao</i>	

Chapter 6.	The Importance of Physiologically Inspired Physicochemical Parameters on Hematopoietic Stem-Cell Maintenance and Lineage-Specific Differentiation in <i>Ex Vivo</i> Cultures	159
	<i>Stephan Lindsey and Eleftherios T. Papoutsakis</i>	
Chapter 7.	Stem Cell Bioprocessing for Regenerative Medicine	197
	<i>Donghui Jing, Abhirath Parikh, and Emmanuel S. Tzanakakis</i>	
Chapter 8.	Engineering Bioactive Scaffolds for Stem Cell Vascular Therapy	231
	<i>Abigail C. Cuddy, Yu-I Shen, and Sharon Gerecht</i>	
Chapter 9.	Biofunctionalized Surfaces Controlling Stem Cell Fate Decisions	267
	<i>Leonora Buzanska, Ana Ruiz, and Laura Ceriotti</i>	
Chapter 10.	Human Umbilical Cord Blood-Derived Cells: Implications in Experimental and Clinical Therapy of CNS Disorders	303
	<i>Barbara Lukomska, Leonora Buzanska, and Krystyna Domanska-Janik</i>	
Chapter 11.	Triggering Neuronogenesis by Endogenous Brain Stem Cells with DNA Nanoplexes	333
	<i>Ewa K. Stachowiak, Indrajit Roy, and Michal K. Stachowiak</i>	
Chapter 12.	Cancer Stem Cells — Targets for Future Cancer Therapies	361
	<i>Andrew Puca, Valentina Malafoglia, and Antonio Giordano</i>	
Index		373
