

Contents

<i>Preface</i>	vii
<i>About the Editors</i>	ix
Part I: Pattern Discovery Methods	1
Chapter 1: Large-Scale Gene Regulatory Motif Discovery with NestedMICA <i>Matias Piipari, Thomas A. Down and Tim J. P. Hubbard</i>	3
Chapter 2: R'MES: A Tool to Find Motifs with a Significantly Unexpected Frequency in Biological Sequences <i>Sophie Schbath and Mark Hoebeke</i>	25
Chapter 3: An Intricate Mosaic of Genomic Patterns at Mid-range Scale <i>Alexei Fedorov and Larisa Fedorova</i>	65
Chapter 4: Motif Finding from Chips to ChIPs <i>Giulio Pavesi</i>	93
Chapter 5: A New Approach to the Discovery of RNA Structural Elements in the Human Genome <i>Lei Hua, Miguel Cervantes-Cervantes and Jason T. L. Wang</i>	117
Part II: Performance and Paradigms	133
Chapter 6: Benchmarking of Methods for Motif Discovery in DNA <i>Kjetil Klepper, Geir Kjetil Sandve, Morten Beck Rye, Kjersti Hysing Bolstad and Finn Drablos</i>	135

Chapter 7: Encyclopedias of DNA Elements for Plant Genomes	159
<i>Jens Lichtenberg, Alper Yilmaz, Kyle Kurz, Xiaoyu Liang, Chase Nelson, Thomas Bitterman, Eric Stockinger, Erich Grotewold and Lonnie R. Welch</i>	
Chapter 8: Manycore High-Performance Computing in Bioinformatics	179
<i>Jean-Stéphane Varré, Bertil Schmidt, Stéphane Janot and Mathieu Giraud</i>	
Chapter 9: Natural Selection and the Genome	209
<i>Austin L. Hughes</i>	
Index	221
