

CONTENTS

Preface		vii
REVIEWS		1
Chapter 1	Principles of Mass Spectrometry of Glycosaminoglycans <i>Joseph Zaia</i>	3
Chapter 2	Fourier Transform Ion Cyclotron Resonance Mass Spectrometry for Protein Structure Analysis <i>Christian Ihling and Andrea Sinz</i>	37
PAPERS		55
Chapter 3	Identification of Tyrosine-O-Sulfation as Post-Translational Modification of Melanoma Inhibitory Activity (MIA) Protein <i>Marcel P. de Vries, Nicole C.C.J.M. Rullens-Ligtvoet, Wouter J. Hoeberichts, Alain J. van Gool, Mario J.M. van Zeeland, Milou Kouwijzer, Gijs F. Verheijden, Annemieke M.H. Boots, Peter D.E.M. Verhaert, and Ebo S. Bos</i>	57
Chapter 4	Mass Spectrometry Identifies Homologues of Phasin Phap1 Protein of <i>Ralstonia Eutropha</i> on Polyhydroxybutyrate Granules <i>Martin Zeller, Markus Pötter, Frank Reinecke, Alexander Steinbüchel, William I. Burkitt, Peter J. Derrick, and Simone König</i>	75
Münster Conference on Single Cell Analysis		85
Chapter 5	Mass Spectrometry in Single Cell Analysis <i>Simone König</i>	87
Chapter 6	Speaker Abstracts Computational Systems Biology: Towards 'In Silico' Cell Models? <i>Hergo Holzhütter</i>	89 89

The Necessity of Cell- and Cell Type-Specific Expression Analyses in Cardiopulmonary Research <i>Ludger Fink</i>	90
Immunogenetics at Single Cell Level <i>Jan Buer</i>	90
Single Cell Proteomics <i>Norman Dovichi</i>	91
Higher Mass Accuracy, Higher Lateral Resolution: A Closer View of Single Cells <i>Bernhard Spengler, Werner Bouschen, Dieter Kirsch and Martin Köstler</i>	91
MALDI Mass Spectrometric Imaging Applied in the Race to Find New Cures for Diseases <i>Markus Stöckli</i>	92
Laser Micromanipulation and Capture of Single Cells – New Approaches in Cell and Molecular Biology <i>Yilman Niyaz, M. Stich, B. Sägmüller, R. Gangnus, K. Schütze</i>	92
In Situ Proteomics Imaging: Analysing "Real World" Protein Networks within Intact Cells And Tissues <i>Walter Schubert</i>	93
Nanobiology: From Single Molecule Detection and Manipulation Towards Single Cell Analysis in Microfluidic Networks <i>Dario Anselmetti</i>	94
Fluorescence Spectroscopic Techniques to Study Protein/Protein Interactions and Conformational Changes on the Single Molecule Level <i>Jörg Fitter, I. Gregor and J. Enderlein</i>	95
Towards Scanning (Near Field) Infrared Laser Microscopy of Cells  <i>Erik Bründermann, Andreas Bergner, Götz Wollny, Jean-Sebastien Samson and Martina Havenith-Newen</i>	96
Volume, Surface and Stiffness of Individual Cells Measured with Atomic Force Microscopy <i>Hans Oberleithner</i>	96
