

CONTENTS

Preface	ix
Chapter 1	
The Genome Project: Its Impacts and Implications	1
1 Looking Back In The Future	1
2 Lewis-Clark Dé Jàvu	2
3 The Human Genome Tour.....	3
4 Historical Perspective — The Timeline Of The Human Genome Project.....	5
4.1 Pre-genomic Sequencing Cottage Industry	5
4.2 Scaling up a la Big Science — A Biological Moonshot, A Biological Particle Smasher	6
4.3 Enters the Black Knight.....	7
4.4 Divide-and-Conquer Strategy	8
4.5 Shotgun Strategy.....	9
4.6 The Traveling Salesman Is a Chinese Postman	10
4.7 The Race to the Finishing Line — Bigger is Better	11
4.8 Complementary Strategies — Ally or Foe	12
4.9 From Genome Marathon to Sprint to the Finishing Line	13
4.10 The Gutenberg Press of the Human Genome Project	13
5 A Small Step For Genome, A Giant Step For Humankind.....	17
5.1 Impacts and Implications — Deciphering the Rosetta Tablet.....	19
5.1.1 Genetic Engineering.....	19
5.1.2 Humpty Dumpty	20
5.1.3 Single Nucleotide Polymorphism.....	21
5.1.4 Patentability of Biocommons	21
5.1.5 Ethical, Social, and Legal Issues.....	23
6 What Is In Store?	23
6.1 Gaps Filling	23
6.2 Gene Finding	24
6.3 Other Genomes	24
6.4 Gene Function.....	26
6.5 Single Nucleotide Polymorphisms	26
6.6 The Eclectic Bioinformatics	26
6.7 An Array of Possibilities — New Genomic Technologies.....	27
7 The Next Fifty Years.....	27
8 The Test Of Time.....	29

Chapter 2

Post-Genomics Matters: Send out A Thousand Ships, Not Catalogue a Thousand Genes	33
1 Genome Armada	33
2 Perplexity And Enlightenment	33
2.1 The New Genetic Math — $1.5 \times \text{Caenorhabditis elegans} = \text{Homo sapiens}$	34
2.2 Human Genome Archaeology	37
2.3 The Genome Topography	38
3 How The Statistics Stack Up?	41
3.1 On the Pessimistic Side	41
3.2 On the Mixed Side	42
3.3 On the Positive and Opportunistic Side	42
3.4 Comparatively Speaking	43
4 Genestimate Discrepancies	44
4.1 Humbled by Our Own Ego Genes	45
5 Genome — A Map To Profitability?	47
5.1 Biotech Bay, Biotech Beach, Biotech Beltway, Biotech Corridor	49
5.2 Biotechnology Tools: Friends or Foes?	50
6 The Other Sequencing Centers	51
7 From The Book Of Life To Inventory Of Life	53

Chapter 3

AgBiotechnology: Genetically Modified	55
1 The Biotech Revolution	55
2 Mother Nature, Father Time and Author Children	56
3 From Green Revolution To AgBiotech Revolution	57
3.1 Genetically Modified Crops	58
3.1.1 Yield Increase via Genetics	58
3.1.2 Genetically Fortified Crops — Golden Rice	59
3.1.3 Plant Antibody Factory	60
3.1.4 Petro Alternatives	61
3.2 Genetically Modified Trees	61
3.3 Genetically Engineered Animals	63
3.4 Genetically Modified Microbes	64
3.5 Germ Warfare Agents	65
4 Biotech Backlash	66

5	StarLink For Hogs, Not Humans	67
5.1	FDA Snafu	70
5.2	Bt Not for Butterflies	71
5.3	Corn Dogs	74
5.4	The Extent of Commingling	74
6	Organic Food	75
6.1	Long Term Ramifications	76
6.2	From Taco to Genes	77
6.3	Warranty of Edibility	77

Chapter 4

Aqua Biotechnology	79
1 The Fish Tale	79
2 Need For Aquaculture	80
2.1 Gene Transfer Protocol in Fish	80
2.2 Fish As Medical Tools	81
2.2.1 Knock Out The Fish That Roars	83
2.2.2 Zebrafish in Development Studies	84
2.2.3 The Zebrafish — Closer to Heart than You Know	86
2.3 The Rule of the Game — Growth Enhancement	87
2.4 Antifreeze	88
2.5 Disease Resistance	89
3 Gene Transfer In Fish	89
4 Transgenic Fish	91
4.1 Carp — Food and See Food	91
4.1.1 Genetically Modified Carp	92
4.1.2 Safety Considerations of Transgenic Carp for Human Consumption	92
4.1.3 Environmental Safety — Gene Flow	93
4.1.4 No Carping with Carp — Natural Gene Flow	94
4.2 The Tale of Catfish — Transgenic Creole	94
4.3 Salmon for Sushi	96
4.4 Shrimps	98
5 The Prospect Of Transgenic Fish	99
6 Other Fish To Fry	100

Chapter 5**Clonology and Clonetechnology 103**

1	The Genetic Age	103
2	Clonolgy	104
2.1	Parthenogenesis — Virgin Birth	104
2.2	Photocopying Life Forms	104
2.3	Win a Clone at the Diary Expo	107
3	Clonetechnology	109
3.1	The Celebrated Dolly	109
3.1.1	Adult Cell Reprogramming	110
3.2	Monkeying with Nature	112
3.3	Sheep Factory	113
3.4	Dolly, Polly and “Holly” Calf	115
3.5	Got Milk? Goat Milk	115
3.6	Second Chance — Clone of the Oldest Bull	116
3.7	Artificial Monkey Twins	118
3.8	Inserted DNA and ANDi	119
3.9	Clone of a Clone — More Bulls	120
3.10	Five Piglets: Oink! Oink! Oink! Oink! Oink! — Organs for Sale	121
3.11	Spring Holy Cows	123
3.11.1	Telomerase — A Vignette of the Fountain of Youth	125
3.12	Xena — No Warrior Princess but a Piglet	126
3.13	Cow Pregnant with Clone — Jurassic Amusement Park	129
4	No Jurassic Amusement Yet	130

Chapter 6**Pet Cloning And BioFactory 133**

1	Attempts At Cloning	133
1.1	Cell Specialization	133
1.2	Embryo Splitting	135
1.3	Gaps in Cell Cycle	136
2	Cloning Techniques	136
2.1	Embryo Splitting Technique	136
2.2	The Nuclear Transfer Technique	137
2.2.1	The Roslin Technique	138
2.2.2	The Honolulu Technique	140
3	From Barnyard To PerPETually Yours	143
3.1	K-9 Cloning	145

3.2	Feline the Copy Cat	145
4	Which Comes First? The Chicken Or The Egg?	146
5	White Elephant.....	147
6	A Mammoth Undertaking.....	148
7	Animal Factory — From Farming To Pharming	150
7.1	Animal Bioreactors.....	151
7.1.1	Antimicrobial Peptides.....	153
7.1.2	Transgenic Technology Development	153
7.1.3	Heterologous Protein Production.....	154
7.1.4	Collecting and Purifying Product.....	156
7.2	Key Transgenic Players and Future Trends	156
7.3	Barnyard Organ and Tissue Shops.....	158
7.3.1	Organ Supply and Demand	159
7.3.2	Strides in Xenotransplant.....	161
7.4	Barnyard Teats as Spinnerets — <u>Silk in Milk</u>	163
8	Ethical Issues And Regulatory Compliance	164

Chapter 7

Human Cloning And Stem Cell Research 167

1	Human Cloning, To Be Or Not To Be?	167
2	Politics Of Cloning.....	168
3	To Be Or Not To Be, That Is The Question.....	169
3.1	The Good — Medical Applications.....	170
3.2	The Bad — Clandestine Efforts.....	171
3.3	The Ugly — Cloning Misconceptions	172
4	Louis Brown Of Cloning.....	173
4.1	Infertile Parents.....	173
4.2	Carriers of Defective Genes.....	174
5	Issues.....	175
5.1	The Question of Identity — Like Father Like Son	176
5.2	Silver Linings.....	176
5.3	The Dark Cloud — All Is Fine Unless You Are The Clone	177
5.3.1	Current State of the Art of Cloning.....	178
5.3.2	Preliminary Evidence of Awry Clone — Problems with Reprogramming	181
6	Dream Things That Never Were	181
7	The Law	182
7.1	The Genie Is Out of the Bottle into The Brave New World	183
8	Message In A Bottle From The Future.....	184
9	Sherlock Holmes — The Clone Murder Detective	185

10	Stem Cell Research	186
10.1	Stem Cell 101	186
10.2	Derivation of Stem Cells.....	187
10.3	Sources of Embryos	188
10.4	Applications of Stem Cell Research	189
10.5	From Degenerative Disorders to Regenerative Medicines.....	190
10.6	Embryonic Stem Cells versus Adult Stem Cells	190
10.7	Federal Support	191
11	Private Companies In Stem Cell Business.....	191
12	Reactions To Bush's Decision	192
13	What Next?	193
14	Hotbed For Stem Cell Research — University Of Wisconsin.....	195
14.1	6,200,806.....	195
14.2	6,200,806 Reasons to Worry About.....	195
15	Hot Off The Press	197

Chapter 8

Genomic And Proteomic Technologies And Beyond		199
1	Biochip.....	199
2	The DNA Chip Technology	200
2.1	The DNA Chip Array	201
2.2	Formats	202
2.3	Applications of DNA Microarray Technology	204
2.3.1	Functional Genomics Research.....	204
2.3.2	Disease Diagnosis	204
2.3.3	Sequencing and Gene Discovery	205
2.3.4	Drug Discovery.....	206
2.3.5	Toxicogenomics and Pharmacogenomics	206
2.3.6	Environmental Studies	207
2.3.7	Agricultural Science.....	207
3	Biochip Market	207
3.1	Market Segments	208
4	Microchip But Macro Impacts	210
4.1	A Chip off the Old Block.....	210
5	Future Outlook	212
5.1	Challenges	212
5.2	Future Development	212
6	Crossing The Chasm From Genomics To Proteomics.....	214
6.1	The Cell, DNA and Protein Synthesis	215
6.2	Proteomics — Direct Impact on Drug Discovery	219

6.2.1	Reducing Drug Toxicity.....	219
6.2.2	Diagnosing Disease.....	219
6.2.3	Increasing Throughput of Drug Discovery	219
6.3	Turning Discovery Into Cure	220
7	Automation Of Proteomics.....	221
8	Picks And Shovels Of Proteomics.....	223
8.1	2D Gel Electrophoresis.....	223
8.2	Classification by Absorption.....	224
8.3	Emerging Approaches.....	225
9	Promise Of Antibody Microarray.....	225
10	Two Useful Twists In The Protein Junkyard.....	226
11	Paleontology Of Diseases — Beyond Genomics And Proteomics.....	228
12	Omics This And Omics That.....	229
13	Directed Evolution	230

Chapter 9

Submicron Technology And Nanotechnology		235
1	Midas! Gold In Potentia.....	235
2	From Alchemy To Algeny.....	235
3	Now Nanotechnology.....	237
3.1	Nano Research And Development.....	238
3.2	Self Assembly Versus Positional Assembly.....	240
3.3	Nature's Assembler.....	242
3.4	The Diamond of Living System — Stem Cell	243
3.5	A Caveat in Mimicking Nature	244
3.6	Drexler's Assemblers.....	245
3.7	Manipulations In Nanoscale	247
4	From Controlled Environment To Work Environment	248
5	From Algeny To Almoly	249
6	Biomimetics — The Confluence Of Biotechnology, And Nanotechnology...	251
7	Nano Dragon.....	251

Chapter 10

Patentability in Biotechnology		253
1	Decoding A Genetic Announcement.....	253
2	Enclosing The Genetic Commons	254
2.1	Europe	254

2.1.1	Tudor England	254
2.1.2	Medieval Europe.....	255
2.1.3	Social Impact of Land Enclosure	255
2.1.4	Other Enclosures: Land, Sea, Air and the Invisible	255
2.2	The Middle Kingdom	256
2.2.1	West Meets East	256
2.2.2	Maritime Expeditions.....	257
2.2.3	East Meets West	258
2.3	The New World — USA	258
2.3.1	Opening of the Genetic Floodgate	259
2.3.2	Impacts of the Supreme Court's Decision.....	260
3	The Final Frontier — Where No Life Scientists Have Gone Before.....	261
3.1	Biopatentability	261
4	Biopiracy And Biocolonialism.....	262
4.1	Cash Cows from Crops	263
4.2	Ethnobotany and Bioprospecting	263
4.3	Pirating Indigenous Knowledge.....	264
4.3.1	Taxol for Cancer	265
4.3.2	Rose Periwinkle for Leukemia.....	266
4.3.3	Repackaging Indigenous Knowledge for Sale	267
4.3.4	Sweet Profit	268
4.4	International Governing Bodies.....	269
5	Just Price	270
6	The Biotech Century	270
7	Who Owns What?	272

Chapter 11

Biological and Biology-Related Information as a Commodity and the Rise of Bioinformatics 273

1	The Dynamic High Tech World.....	273
2	Types Of Focused Companies.....	274
2.1	Operationally Efficient Companies.....	274
2.2	Service-oriented Companies	275
2.3	Product-driven Companies	276
3	Biology And Biology-Related Disciplines — Place In Science	276
4	Pharmaceutical Companies As Product-Driven Companies.....	277
5	The Economics Of Drug Discovery	279
6	Future Pharmaceutical Discoveries	280
7	The Rise Of Bioinformatics	281
7.1	The Beginning	282

7.2	Subsequent Years.....	284
7.3	Bioinformatics Conference Going Commercial.....	287
8	Genomic Companies As Service-Oriented Companies	287
8.1	Bioinformatics — Mission and Goals.....	289
8.2	Bioinfobahn	292
9	A New Paradigm Of Discovery.....	293
10	Historical Déjà Vu?	294

Chapter 12

Turbo-Charging Bioinformation for Drug Discovery		297
1	From Gathering To Information Gathering	297
2	Information Economy.....	297
3	Drug Discovery	298
4	The Human Genome Project.....	301
5	Enabling Bioinformatics — The Enabler	301
6	Proliferation Of Bioinformatics.....	303
7	Market Structures	303
7.1	Perfect Competition	304
7.2	Monopoly	304
7.3	Monopolistic Competition	304
7.4	Oligopoly	305
8	Market Structures Of Bioinformatics, Sequencing, Biotechnology And Pharmaceutical Companies	305
8.1	Goals of Bioinformatics Companies to Monopolize.....	306
8.2	Competition	308
9	Bioinformatics Entrepreneurs And New Entrants	308
9.1	Bioinformatics Labor Supply.....	309
10	Technology-Push, Market-Pull Or Interactive Marketing Strategies	311
11	New Paradigm Adoption.....	313
12	Who Prevails.....	314
12.1	Short-run Profit/Loss Optimization	314
12.2	Long-run Economic Profits.....	316
13	Perfect Versus Monopolistic	316
14	Bioinformatics Gorillas, Chimpanzees And Monkeys	317
15	Early And Late Majority Asian Bioinformatics And Biotechnology Countries.....	318
15.1	Singapore — One of the Four Tigers.....	318
15.2	Korea — A Tiger	319
15.3	The Republic of China — A Tiger	320
15.4	Enter the Dragon — People's Republic of China	322

15.5	Rise with the Dragon	323
15.6	Asia and Pacific Rim Rising	326
16	Who Owns What?	327
16.1	Loopholes In Intellectual Property System	327
16.2	Brain Drain Or Gain?	329

Chapter 13

A New Kind Of War: Biowarfare And Info Warfare 331

1	A New Kind Of War	331
2	United States Of Anxiety	332
3	High Tech, Low Tech And No Tech	333
3.1	Germ Warfare Agents	333
3.2	Aum Shinrikyo — Japanese Cult	336
3.3	Anthrax As Bioweapon	337
3.4	Smallpox — Eradicated but Not Gone for Good	339
3.5	Deadly Past in History — Smallpox	339
3.6	Countermeasures to Combat Bioterrorism	341
4	Anthrax Vaccines	342
4.1	Ciprofloxacin	342
4.2	Antimicrobial Nanoemulsion	344
5	Promises But Not Yet A Sure Cure	345
5.1	Hypothetical Bioterrorism	345
5.2	Protective Gear	346
5.3	Surveillance and Monitoring	346
5.4	Quick Counter Jabs	348
6	BTWC Treaty — Firm But Unfair	349
7	Forcing Genie Back Into The Bottle?	351
8	Cyber Warfare — A Keyboard Is Truly Mightier Than A Gun	352
8.1	The Mighty Electron	353
8.2	WWW — World Wide Weapon	353
8.2.1	Computer Plagues	354
8.2.2	Cyber Weapons	355
8.2.3	The Bulgarian Virus Factory	356
8.2.4	The Computer Plague Threat	357
8.2.5	Democratization of Hacking	358
8.2.6	The Nimda Worm — A Case Study	358
8.3	The New Villain	360
8.3.1	CV Please	360
8.3.2	911, Help Please	361
8.3.3	Power Grid	361
