

Contents

Preface	
Chapter 1 Thermodynamics of the Dissociation of Weak Acids	1
Chapter 2 Introduction to Apparent Equilibrium Constants	29
Chapter 3 Biochemical Reactions at Specified Temperature and Various pHs	43
Chapter 4 Biochemical Reactions at Various pHs and Various Temperatures	71
Chapter 5 Biochemical Reactions at Various pHs, pMgs, and Various Temperatures	109
Chapter 6 Development of a Database on Species	131
Chapter 7 Uses of Matrices in Biochemical Thermodynamics	149
Chapter 8 Oxidoreductase Reactions (Class 1) at 298.15 K	173
Chapter 9 Transferase Reactions (Class 2) at 298.15 K	209
Chapter 10 Hydrolase Reactions (Class 3) at 298.15 K	221
Chapter 11 Lyase Reactions (Class 4), Isomerase Reactions (Class 5), and Ligase Reactions (Class 6) at 298.15 K	243
Chapter 12 Survey of Reactions at 298.15 K	259
Chapter 13 Survey of Reactions at Various Temperatures	321
Chapter 14 Thermodynamics of the Binding of Ligands by Proteins	355
Chapter 15 Calorimetry of Biochemical Reactions	365
Appendix	381
1. BasicBiochemData3.nb	383
2. Tables of Transformed Thermodynamic Properties	409
3. Glossary of Names of Reactants	425
4. Glossary of Symbols for Thermodynamic Properties	431
5. List of <i>Mathematica</i> Programs	437
6. Sources of Biochemical Thermodynamic Information on the Web	457
Index	459
