

CONTENTS

I INTRODUCTION

The attributes and applications of flow cytometry.

M. L. Mendelsohn 15

II INSTRUMENTATION

A simple, high resolution flow cytometer based on a standard fluorescence microscope.

H. B. Steen, T. Lindmo & O. Sørensen 31

Backward fluorescence detection in flow systems for the measurement of fluorescence emission anisotropy.

W. G. Eisert, W. Beisker, W. Hartmann & R. M. Eisert 34

Dual beam sorting at Livermore.

P. N. Dean 41

Three-dimensional slit-scan flow system.

L. L. Wheelless, D. B. Kay & J. L. Cambier 45

Problems of fast imaging in flow.

V. Kachel, G. Benker, W. Weiss, E. Glossner, G. Valet & O. Ahrens 49

III PREPARATION AND STAINING

Disaggregation of bone marrow spicules for studies by flow cytometry.

S. Soman & L. S. Kaplow 59

A method for quantification of peripheral blood admixture in bone marrow aspirates; its relevance in cell kinetic research.

R. S. G. Holdrinet, J. van Egmond, J. M. C. Wessels & C. Haanen 63

Cell suspension preparation of solid tumours for flow cytometry.

D. H. Rutgers 67

Flow cytometric studies of human leukocyte enzymes: non-fluorescent methods and applications.

L. S. Kaplow & S. Soman 70

Effects of some solvents on the fluorescence intensity of phenantridinic derivatives-DNA complexes: flow cytofluorometric applications.

G. Mazzini & P. Giordano 74

Flow cytometry: tests for cytochemical specificity.

P. F. Mullaney, J. Betz, W. Heinze, G. Seger, F. Sinsel, B. Weiss & M. Achatz 78

Correspondence between flow microfluorometric and absorption image analyses of chromatin.

F. Beltrame, A. Chiabrera, M. Grattarola, P. Guerrini, G. Parodi, D. Ponta & R. Viviani 82

Vital staining of haemopoietic cells with the fluorescent bis-benzimidazole derivatives Hoechst 33342 and 33258.

J. W. M. Visser 86

Separation of viable and nonviable human lymphoma cells influences flow cytometric analysis of DNA content.

O. Alabaster, K. B. Woo & I. T. Magrath 91

A new dual staining technique for simultaneous flow cytometric DNA analysis of living and dead cells.

M. Stöhr & M. Vogt-Schaden 96

Simultaneous DNA and protein measurements of microorganisms.

K.-J. Hutter, M. Stöhr & H. E. Eipel 100

The recovery of living cells by flow sorting machine.

D. K. Green, P. Malloy & M. Steel 103

IV DATA HANDLING

Ultra fast digital calculation of ratios of flow cytometric values.

V. Kachel, H. Meier, P. Stuhlmüller & O. Ahrens 109

Microprocessor-based data acquisition system for flow cytometers.

O. Ahrens, U. Albrecht & M. F. Rajewsky 112

A computer controlled data managing system for multiparameter flow cytometric analyses.

G. Benker, V. Kachel & G. Valet 116

Control unit for on-line handling of three-parameter flow cytometric data.

V. Kachel & H. Meier 120

Graphical representation of three-parameter flow cytometer histograms by a newly developed Fortran IV computer program.

G. Valet 125

V MATHEMATICAL ANALYSIS OF DNA HISTOGRAMS

An iterative method of analysis for DNA histograms.

P. M. van der Linden 133

Analysis of FCM-derived DNA histograms.

J. Bryant, L. F. Guseman, Jr. & D. L. Egle 138

Sequential analysis of FCM-derived DNA histograms.

J. Bryant, L. F. Guseman, Jr. & D. L. Egle 143

The choice of model for deconvolution of DNA distributions measured by flow cytometry.

I. J. Christensen, U. Møller & J. K. Larsen 147

Comparison of evaluation methods for DNA histograms measured by flow cytometry.

H. Baisch, H.-P. Beck, I. J. Christensen, N. R. Hartmann, J. Fried, P. N. Dean, J. W. Gray, J. H. Jett, D. A. Johnston, R. A. White, C. Nicolini, S. Zietz & J. V. Watson 152

VI CELL BIOLOGY

Separation of cytoplasts from nucleated cells by flow sorting using Hoechst 33342.

G. H. Schaap, A. Verkerk, A. W. M. van der Kamp, F. G. Öry & J. F. Jongkind 159

Flow sorting in studies on metabolic and genetic interaction between human fibroblasts.

J. F. Jongkind, A. Verkerk, G. H. Schaap & H. Galjaard 164

Quantitation of single cell phagocytic capacity by flow cytometry.

C.-F. Bassøe, J. Solsvik & O. D. Lærum 170

Fine needle aspiration biopsies from human testes evaluated by DNA flow cytometry.

E. Thorud, O. P. F. Clausen & T. Åbyholm 175

Growth and differentiation of foetal mouse gonads in culture studied by flow cytometry on nuclear suspensions.

J. K. Larsen, A. G. Byskov & J. Grinsted 178

Fluorescence polarization measurements on human lymphocytes from patients with and without neoplasia.

W. Hartmann, W. Beisker, R. Eisert & W. G. Eisert 183

Flow cytometric measurements of cell surface phenomena.

J. H. Jett 187

Flow cytometric analysis of sperm chromatin structure.

D. P. Evenson, Z. Darzynkiewicz & M. R. Melamed 191

Cellular radiation effects and hyperthermia: The influence of genetically determined radiosensitivity on the cytokinetic behaviour of stationary yeast cells after x-irradiation and hyperthermia.

R. Fingerhut, F. Otto & J. Kiefer 196

VII IMMUNOLOGY

Cell cycle variations in sensitivity to antibody and complement.

M. R. Loken, P. J. Leibson & H. Schreiber 203

Simultaneous measurement of surface immunoglobulins and cell cycle phase of human lymphocytes.

F. A. Vyth-Dreese, J. B. A. Kipp & T. A. M. de Jong 207

Studies on phenotypically distinct lymphocyte subsets isolated by cell sorting.

R. D. Stout 213

Quantitation of cell surface antigen density by flow cytometry.

J. H. Jett, A. P. Stevenson, N. L. Warner & J. F. Leary 215

Flow cytometric analysis of fluorescent lectin binding to surface membranes of human lymphoid and myeloid cells.

G. Blackledge, J. T. Gallagher, R. Swindell & D. Crowther 222

Application of flow cytofluorometry to ligand binding studies on living cells: practical aspects and recommendations for calibration and data processing.

B. Bohn & W. Manske 227

Measurement of the amount of antibody bound to cells or particles by flow cytofluorometry.

H. G. de Bruin, F. W. van der Meulen & C. Aaij 233

Immunofluorescence flow cytometry in immunoproliferative disorders.

G. Zeile 238

Cell volumetry as an assay for the blastogenic response of lymphocytes.

H. B. Steen 243

VIII GENETICS

Slit-scan flow cytometry: Analysis of Chinese hamster M3-1 chromosomes.

J. W. Gray, J. Lucas, D. Pinkel, D. Peters, L. Ashworth & M. A. Van Dilla 249

Low resolution image analysis of spheres and Chinese hamster cells in a flow cytometer/cell sorter.

L. S. Cram, D. J. Arndt-Jovin, B. G. Grimwade & T. M. Jovin 256

Flow sorting of chromatin.

L. Bolund 260

Sorting of chromosomes by velocity sedimentation at unit gravity.

J. G. Collard, A. Tulp, C. Murre, J. B. A. Kipp, J. A. Aien & F. W. Bauer 268

DNA measurements on sperm and blood cells of genetically normal and abnormal humans.

W. Göhde, J. Schumann, F. Otto, U. Hacker, J. Zante, P. Hansen, Th. Büchner, M. Schwale & S. Baranco 273

IX CARCINOGENS, MUTAGENS AND ENVIRONMENTAL POLLUTANTS

Flow cytometry of mammalian sperm: progress report.

M. A. Van Dilla, D. Pinkel, B. L. Gledhill, S. Lake, G. Watchmaker & A. J. Wyrobek 279

Flow cytometric analysis of mutagen induced chromosomal damage.

F. Otto, H. Oldiges, W. Göhde & H. Dertinger 284

Flow-cytofluorometric determination of damage to chromosomes from x-irradiated Chinese hamster cells.

J. A. Aien, J. B. A. Kipp & G. W. Barendsen 287

Effects of ⁶⁰Co-γ irradiation on ductus thoracicus lymphocytes of the rat.

P. R. Rudloff & H. E. Eipel 293

Binding of chemical carcinogens to classes of rat liver nuclei.

A. Tulp, J. G. Westra & M. G. Barnhoorn 296

Nuclear ploidy of the growing mouse liver: Age variations and effects of a carcinogen (dimethylnitrosamine).

V. Digernes 300

- Disturbances of growth and polyploidy in mouse bladder epithelium by systemic injection of toxic and carcinogenic substances.
T. Farsund 304
- The kinetic response of the mouse epidermis to a single topical application of TPA (12-0-tetradecanoylphorbol-13-acetate).
E. G. Astrup 307
- The detection and sorting of rare sickle-hemoglobin containing cells in normal human blood.
M. L. Mendelsohn, W. L. Bigbee, E. W. Branscomb & G. Stamatoyannopoulos 311
- Flow cytometric analysis of exfoliated respiratory tract cells exposed to environmental pollutants.
J. A. Steinkamp & J. S. Wilson 314
- Flow cytometric analysis of microbial cell constituents after heavy metal intoxication.
K.-J. Hutter, H. E. Eipel & M. Stöhr 317
- X CELL POPULATION KINETICS**
- Cell kinetics.
O. H. Iversen 325
- Comparison of the applicability of flow cytometry and autoradiography for cell kinetic studies.
H.-P. Beck & M. Omnyczynski 327
- RNA content and the cell cycle.
F. Traganos, Z. Darzynkiewicz & M. R. Melamed 331
- Duration of the G₁ and S phase of individual cells in populations correlates with their RNA content.
Z. Darzynkiewicz, D. Evenson, L. Staiano-Coico, T. K. Sharpless & M. R. Melamed 336
- Cell cycle phase durations derived by a flow cytofluorometric method using the mitotic inhibitor vinblastine.
J. B. A. Kipp, A. P. M. Jongsma & G. W. Barendsen 341
- Protein synthesis during the cell cycle of unsynchronized Friend cells.
B. D. Young, A. Lang & G. D. Birnie 345
- Kinetics of entry into S-phase and into the G₁ phase of the subsequent cell cycle for synchronized NHIK 3025 cells.
Ø. W. Rønning, T. Lindmo, E. O. Pettersen & P. O. Seglen 350
- Kinetic response of asynchronously growing L-cells to trypsinization, as determined by flow cytometry.
R.-M. Böhmer & H. Baisch 354
- Effect of internal radiation of tritiated BUdR incorporated into DNA on the progression of cells through the cycle.
H. Baisch & R.-M. Böhmer 359
- The use of cytosine arabinoside and colchicin in FCM analysis of cell cycle effects of inhibitors in an asynchronous cell culture.
P. Langen, H. Graetz & E. Lehmann 362
- Mechanisms of proliferation and polyploidy formation in normal and regenerating mouse urinary bladder epithelium.
T. Farsund 367
- The cell kinetic effect of methotrexate on the epithelium of the hamster cheek pouch. A circadian dependent effect.
U. Møller, J. K. Larsen, J. Hendel & I. J. Christensen 372
- Quantification of deviations of the epidermal DNA distributions in psoriasis and the effect of therapy.
F. W. Bauer, N. H. C. M. N. Crombag, R. M. de Grood & J. Boezeman 377
- XI TUMOUR CELL BIOLOGY**
- Cell kinetics and the management of malignant disease.
B. Barlogie, B. Drewinko, G. Dosik & E. J. Freireich 385

- Proliferation and differentiation of normal and leukemic lymphocytes as analyzed by flow cytometry.
Z. Darzynkiewicz, M. Andreeff, F. Traganos & M. R. Melamed 392
- Sequential flow cytometric analysis of the single cell DNA content in recurrent human brain tumours.
P. Frederiksen & P. Bichel 398
- DNA distribution in human gliomas *in vivo* and *in vitro*.
S. J. Mørk & O. D. Lærum 403
- Cytometric analysis of DNA content, nuclear size and chromatin texture in benign breast lesions.
C. J. Cornelisse, H. W. Venekamp, A. W. M. Smeulders, J. Hermans & P. van Heerde 407
- A mosaic subpopulation structure of human colorectal carcinomas demonstrated by flow cytometry.
S. E. Petersen, M. Lorentzen & P. Bichel 412
- DNA flow cytometry (FCM) in carcinomas of the large bowel compared with the two functional cell markers secretory component (SC) and carcinoembryonic antigen (CEA), the histological tumour grade, and the clinical stage.
T. O. Rognum, E. Thorud, K. Elgjo, P. Brandtzæg, H. Ørjasæter, K. Nygaard & O. P. F. Clausen 417
- Multiparameter flow cytometry of postirradiation cervical smears.
M. Stöhr, S. Froberg, H. Sander, D. Heberlin & K. Goertler 424
- DNA microdensitometry and flow cytofluorometry of human tumour biopsies.
B. Dixon & C. J. Carter 427
- DNA distribution pattern of prostatic lesions measured by flow cytometry.
M. Roters, A. Laemmel, H. Kastendieck & H. Becker 431
- The nuclear DNA content of a transplantable rat tumour: Comparison of primary growths and metastases.
C. J. Carter, H. Speakman & B. Dixon 436
- ## XII CANCER DIAGNOSTICS
- Flow cytometric analysis of cervical smears and solid tumours.
W. A. Linden, H.-P. Beck, H. Baisch, J.-O. Gebbers, W. Heienbrok, P. Junghanns, M. Roters, K.-U. Scholz, H. E. Stegner, R. Winkler & W. Wöllmer 443
- Expectation values for parameter sets measured in slit-scan flow cytometry: Cancer prescreening.
P. F. Mullaney, M. Achatz, G. Seger, F. Sinsel, W. Heinze, B. Weiss & R. Mann 448
- Analysis by image processing of cells sorted by two-parameter flow cytometry.
A. M. J. van Driel-Kulker, M. Stöhr, K. Goertler & H. Tanke 453
- Malignancy in pleomorphic adenomas of the parotid gland. DNA flow cytometric analysis of fine needle aspiration biopsies.
E. Thorud, E. A. Rolstad & P. Lexow 458
- Automatic cell identification and enrichment in lung cancer: IV. Small cell carcinoma analysis by light scatter and two fluorescence parameters.
H. W. Tyrer, J. K. Frost, N. J. Pressman, L. A. Adams, C. D. Albright, M. H. Vansickel & S. M. Tiffany 464
- Characterization of chronic atrophic gastritis by means of pulse cytophotometry.
H. Weiss, H.-J. Gütz, G. P. Wildner, K. Ebeling & W. Schmidt 473

The determination of cellular DNA content in neoplastic and non-neoplastic lymphoid populations by flow cytofluorometry.

*L. W. Diamond, R. C. Braylan,
R. M. Bearman, C. D. Winberg &
H. Rappaport* 478

XIII CANCER THERAPY

Flow cytometry and cell kinetics: Relation to cancer therapy.

J. W. Gray 485

Limitations and achievements of DNA flow cytometry in monitoring human leukemias.

C. Haanen 492

Flow cytometry and cell kinetics during treatment of human acute leukemias - Kinetic manipulations of leukemic cells by cytosine-arabioside (ARA-C) in correlation to therapeutic response.

*Th. Büchner, W. Hiddemann,
B. Wörmann, W. Göhde & J. Schumann* 499

Monitoring of leukemia by representative bone marrow cell kinetic analysis using biopsy material.

*W. Hiddemann, Th. Büchner,
B. Wörmann, W. Göhde &
J. Schumann* 504

Thymidine (TdR)- as a potential chemotherapeutic agent: Cytokinetic studies.

J. Mendelsohn & S. B. Howell 509

Rapid, automatic analysis of the cell cycle point of action of cytostatic drugs.

*F. Traganos, Z. Darzynkiewicz,
L. Staiano-Coico, D. Evenson &
M. R. Melamed* 511

Flow cytofluorometric analysis of unbalanced cell growth.

*I. W. Taylor, M. H. N. Tattersall &
R. M. Fox* 516

Monitoring of cancer treatment by flow cytometry measurements.

*S. C. Barranco, J. J. Costanzi,
W. Göhde & J. Schumann* 522

Use of two-parameter (DNA and cell size) flow cytometric analysis for determining the effects of potential chemotherapeutic agents.

*H. A. Crissman, D. J. Orlicky &
R. J. Kissane* 526

A sensitive method for the determination of vinblastine in rat blood plasma and tumour tissue using flow cytofluorometry.

J. B. A. Kipp & G. W. Barendsen 531

Author index 533
