<i>Introduction and Aims</i>	vii	2.3 Protozoa in the alimentary canal	7
<i>Acknowledgements</i>	ix	2.4 Protozoa in the kidney	13
Part 1 Frog Parasites and their Biology	1	2.5 Protozoa in the blood	14
1. Examination for parasites: basic procedures	1	3. Trematoda	19
1.1 Frogs as hosts	1	3.1 Note on procedure	19
1.2 Preparation of frogs for dissection	1	3.2 Commonly occurring trematodes	19
1.3 Preparation for parasite collection	3	3.3 Examination of living trematodes	20
1.4 Summary of practical procedures	3	3.4 Monogenea	23
1.5 External examination: skin and associated cavities	3	3.5 Digenea: Identification	24
1.6 Internal examination	4	3.6 Digenea: Paramphistomidae	28
2. Protozoa	6	3.7 Digenea: Gorgoderidae	29
2.1 Examination of living protozoa	6	3.8 Digenea: Lecithodendriidae	38
2.2 Making rapid, stained 'smears' of protozoa	6	3.9 Digenea: Hemiuridae	40
		3.10 Digenea: Cephalogonimidae	42
		3.11 Digenea: Plagiorchiidae	42
		4. Cestoda	56
		4.1 Identification of adult cestodes	56

vi CONTENTS

4.2 Adult cestodes in <i>R. temporaria</i> and <i>R. esculenta</i>	57	Part 2 Techniques and Experimental Methods	81
4.3 Adult cestodes in <i>R. pipiens</i>	57	8. Experimental methods: Protozoa	81
4.4 Larval cestodes	61	8.1 Fixation and staining	81
5. Nematoda	62	8.2 <i>In vitro</i> culture	82
5.1 Examination of nematodes	62	8.3 Trypanosomes: the haematocrit centrifuge technique (of Woo) for examining small quantities of blood	84
5.2 Identification of nematodes	63	8.4 Staining blood films	85
5.3 Order: Rhabditida	64	8.5 Opalinids and ciliates: induction of sexual reproduction	85
5.4 Order: Strongylida	66	9. Experimental methods: Trematodes	87
5.5 Order: Oxyurida/Ascaridada	68	9.1 Cercariae release and encystment	87
5.6 Order: Spirurida	68	9.2 Demonstration of argentophilic 'papillae' in cerariae (= chetotaxie)	88
6. Acanthocephala	73	9.3 Egg embryonation and hatching of trematode eggs	90
7. The ecology of <i>Rana</i> species in relation to their parasite fauna	76	9.4 Demonstration of the nervous system in trematodes by the indoxyl acetate method for esterase (e.g. cholinesterase)	90
7.1 Basic ecology of <i>Rana temporaria</i>	76	9.5 Demonstration of egg-shell precursors in trematodes	91
7.2 Basic ecology of <i>Rana esculenta</i>	77	9.6 <i>In vitro</i> culture of lung flukes and lung tissues	93
7.3 Basic ecology of <i>Rana pipiens</i>	78	References	95
7.4 Ecological factors and the parasite fauna of <i>R. temporaria</i> and <i>R. esculenta</i>	79	Index	102
7.5 Ecological factors and the parasite fauna of <i>R. pipiens</i>	80
