

IN APPRECIATION

There are numerous individuals to whom we are indebted for their advice and assistance with this book. First, we wish to thank Dr. Wendell Gauger, Chairman of the Department of Botany at the University of Nebraska, for his initial encouragement in the undertaking of this project and for his continual interest and support in all aspects of it.

Next we wish to acknowledge the invaluable support which has come from the Board of Advisors and from the bibliographers for Selected Papers in Phycology. All offered numerous suggestions contributing to the development of this project, actively participated in the reviewing of each others original contributions, and did an outstanding job in meeting rigorous deadlines. We are also very grateful to those authors whose works are included in this compilation and to those who submitted an original commentary to accompany their reprinted paper. In addition, we extend our appreciation to Terry Lyon, Dr. Norma J. Lang, and Dr. John A. West for the original photographs which appear in this book. For the cover design we are indebted to Scott McLaughlin and Doug Scott.

Several persons have participated in other aspects of this undertaking. We are very grateful to Mrs. Susan Rosowski who has played an active role in the organizational development of this book and who has capably assisted us in many ways including the processing of mounds of correspondence. Also, we are very grateful to our secretaries, Irma Gillispie and Diana Straub, for the many long hours they spent typing and for their unfailing efforts to help all of us meet deadlines. Also in this regard, we wish to acknowledge the fine assistance of Martha Mowrey, Joyce Clifton, Bonita Darr, Norma Darr, and Jolene Uher.

There are other individuals to whom we are most grateful for the special effort they made in reviewing materials and in offering helpful suggestions: Dr. John H. McClendon, Dr. Eric Davies, Dr. Robert C. Lommasson, Dr. Rufus H. Moore, Dr. Gary L. Hergenrader, Dr. Gerald D. Harwood, Franklin M. Kestner, Dr. Janet R. Stein, Dr. Frederick P. Healey, and Dr. Gerald W. Prescott. We extend our thanks also to Mrs. Alice Wright for her help with library matters.

Finally, we wish to thank Harold W. Bathel for the printing of Selected Papers in Phycology, and John S. Stafford, the University of Nebraska Teaching Council, and the Department of Botany at the University of Nebraska, for their financial support.

Jim Rosowski and Bruce Parker
