Evolution of Interferon Genes

*Takashi Miyata, Hidenori Hayashida, Reiko Kikuno, Hiroyuki Toh,
and Yoshimi Kawade*

I Introduction	1
II Some Features of Molecular Evolution.....	2
III Method for Analyzing Gene and Protein Sequences	4
IV Nucleotide Sequence Divergence of Interferon Genes	10
V Divergence of Interferon α and β Genes by Gene Duplication	16
VI Gene Conversion in Human Interferon α Multigene Family .	19
VII Concluding Remarks	26
References.....	28

Interferons and Cell Differentiation

Giovanni B. Rossi

I Introduction	31
II Differentiation Systems	33
III Production of "Induced" Enzymes and Hormones	48
IV Other Interferon Effects Somehow Related to Cell Differentiation.....	50
V Reversibility of Interferon Effects on Cell Differentiation ...	52
VI Mechanisms of Interferon Effects on Cell Differentiation....	53
References.....	62

Immunomodulation by Interferons: Recent Developments

Jaqueline De Maeyer-Guignard and Edward De Maeyer

I Introduction	69
II Immune-Specific Induction of Interferon γ	70
III Immunomodulation by Interferon γ	73
IV Is Interferon γ a More Potent Immunomodulator Than Interferon α/β ?	78
V Back to the Animal: Will We Ever Have an Integrated View?	80
VI X-Linkage of Early Circulating Interferon α and β Production: An Area for Further Exploration	82
VII Interferon and Disease	84
VIII Concluding Remarks	86
References	86

How Does Interferon Inhibit Tumor Growth?

Ion Gresser

I Introduction	93
II Stating the Problem	94
III One Experimental Animal Tumor System	95
IV Does Interferon Act Directly on FLC in the Peritoneum? ...	100
V Introducing Interferon-Resistant Cells	101
VI On Possible Interferon-Enhanced Host Mechanisms	107
VII Seeking Unconventional Explanations	113
VIII Last Editorial Comments	122
References	123

Interferon: A Model for Future Biologicals

Robert K. Oldham

I Historical Prospective	127
II Drug Development	129

III Development of Biologicals and Biological Response	
Modifiers	132
IV Interferons: The Model	134
V Future Prospects	139
References	141
