
Acknowledgments

This manual is dedicated to all the friends, colleagues, and technicians (some of whom are all three at once) working in electron microscopy who have helped develop the procedures described. I am fortunate to have been instructed by a large number of technical staff with whom I have worked over the years, but I am particularly indebted to the following individuals who have broadened my horizons and made my life demonstrably easier:

Sarah Bierley
Brendalyn Bradley
Karen Greer
Jacqueline Lee
Nina Rodenroth
Robert Seiler

I wish to express particular thanks to my current assistant, Brendalyn Bradley, for her help in preparing the illustrations for this manual including the use of her hands therein.
